### **MECHANICAL IGNITION HANDBOOK**

Bentley Pub Easy-to-apply, scientifically-based approaches for engaging students in the classroom Cognitive scientist Dan Willingham focuses his acclaimed research on the biological and cognitive basis of learning. His book will help teachers improve their practice by explaining how they and their students think and learn. It reveals-the importance of story, emotion, memory, context, and routine in building knowledge and creating lasting learning experiences. Nine, easy-to-understand principles with clear applications for the classroom Includes surprising findings, such as that intelligence is

malleable, and that you cannot develop "thinking skills" without facts How an understanding of the brain's workings can help teachers hone their teaching skills "Mr. Willingham's answers apply just as well outside the classroom. Corporate trainers, marketers and, not least, parents -anyone who cares about how we learn-should find his book valuable reading." —Wall Street Journal

Cengage Learning Mechanically timed ignition is easy to understand and wonderfully straightforward to diagnose and repair, which is good because it's one of the most likely things on an older car to die and leave you in the lurch. Rob Siegel--better known as the Hack Mechanic-- explains how mechanical ignition works and discusses in detail how to set timing and advance. There is also a full chapter on troubleshooting mechanical ignition problems. Illustrated with over 100 photos and

diagrams and supported by clear, step-by-step instructions, the Mechanical Ignition Handbook features sections on: \*mechanical ignition basics and components \*common repairs and recommended tools \*adjusting point gap \*setting dwell angle \*locating the timing mark \*finding top dead center \*setting static and dynamic ignition timing \*using both a standard and an advance timing light \*testing coil resistance \*Retrofitting breakerless electronic ignition (for those who say "enough!") Applies to vintage cars from the 1950s up through the mid 1980s that have either points and breakers or mechanical ignition advance, including: Porsche 356, Mechanically-timed Porsche 911, BMW 1600, BMW 2002, Ferrari 365, MGB, Austin-Healey Sprite, Jaguar E-Type, Triumph Spitfire, Triumph TR3, Mercedes models including the Mercedes 190 SL, Volkswagen Beetle, early Volvo, Pontiac GTO, vintage Chevrolet Camaro and other American muscle cars.
