MICROBE-ASSISTED PHYTOREMEDIATION OF ENVIRONMENTAL POLLUTANTS

Manchester University Press

Borrowing its title from Madeline Harrison Caviness's influential work on the modes of seeing articulated by the twelfth-century cleric Richard of Saint Victor, this interdisciplinary collection brings together the work of thirty scholars from England, France, Germany, Italy, Switzerland, and the United States. Each author has contributed an original article that engages with ideas formulated in Caviness's wide-ranging scholarship. The historiographic introduction discusses themes in Caviness's publications and their importance for art historical and medieval studies today. The book's thematic matrix groups together essays concerned with: The Material Object, Documentary Reconstruction, Post-Disciplinary Approaches, Multiple Readings, Gender and Reception, Performativity, Text and Image, Collecting and Consumption, and Politics and Ideology. The contributors include curators, art historians, historians, and literary scholars. Their subjects range from medieval stained glass to the nineteenth-century Gothic Revival, the *Sachsenspiegel*, and Mel Gibson's *The Passion of the Christ*. Many foreground issues of gender, reception, and textuality, which have permeated Caviness's scholarship. Some also present approaches to sites that have been the subject of important studies by Caviness, including Canterbury, Chartres, Reims, Saint-Denis, Sens, and Troyes. The volume offers a broad range of methodological approaches to key topics in the study of medieval imagery and thus highlights the vitality of the field today.

The revised 13th edition of the essential reference for the prescribing of drugs for patients with mental health disorders The revised and updated 13th edition of *The Maudsley Prescribing Guidelines in Psychiatry* provides up-to-date information, expert guidance on prescribing practice in mental health, including drug choice, treatment of adverse effects and how to augment or switch medications. The text covers a wide range of topics including pharmacological interventions for schizophrenia, bipolar disorder, depression and anxiety, and many other less common conditions. There is advice on prescribing in children and adolescents, in substance misuse and in special patient groups. This world-renowned guide has been written in concise terms by an expert team of psychiatrists and specialist pharmacists. The Guidelines help with complex prescribing problems and include information on prescribing psychotropic medications outside their licensed indications as well as potential interactions with other medications and substances such as alcohol, tobacco and caffeine. In addition, each of the book's 165 sections features a full reference list so that evidence on which guidance is based can

be readily accessed. This important text: Is the world's leading clinical resource for evidence-based prescribing in day-to-day clinical practice and for formulating prescribing policy Includes referenced information on topics such as transferring from one medication to another, prescribing psychotropic medications during pregnancy or breastfeeding, and treating patients with comorbid physical conditions, including impaired renal or hepatic function. Presents guidance on complex clinical problems that may not be encountered routinely Written for psychiatrists, neuropharmacologists, pharmacists and clinical psychologists as well as nurses and medical trainees, *The Maudsley Prescribing Guidelines in Psychiatry* are the established reference source for ensuring the safe and effective use of medications for patients presenting with mental health problems.

The feast of Corpus Christi, one of the most solemn feasts of the Latin Church, can be traced to the Fourth Lateran Council in 1215 and its resolution of disputes over the nature of the Eucharist. The feast was first celebrated in Liège in 1246, thanks largely to the efforts of a religious woman, Juliana of Mont Cornillon, who not only popularized the feast, but also wrote key elements of an original office. This volume presents for the first time a complete set of source materials germane to the study of the feast of Corpus Christi. In addition to the multiple versions of the original Latin liturgy, a set of poems in Old French, and their English translations, the book includes complete transcriptions of the music associated with the feast. An introductory essay lays out the historical context for understanding the initiation and reception of the feast.

This study explores the shared history of the French empire from the perspective of material culture in order to re-evaluate the participation of colonial, Creole, and indigenous agency in the construction of imperial spaces. The decentred approach to a global history of the French colonial realm allows a new understanding of power relations in different locales. Providing case studies from four parts of the French empire, the book draws on illustrative evidence from the French archives in Aix-en-Provence and Paris as well as local archives in each colonial location. The case studies, in the Caribbean, Canada, Africa, and India, each examine building projects to show the mixed group of planners, experts, and workers, the composite nature of building materials, and elements of different 'glocal' styles that give the empire its concrete manifestation. Building the French empire gives a view of the French overseas empire in the early modern period not as a consequence or an outgrowth of Eurocentric state-building, but rather as the result of a globally interconnected process of empire-building.

Essays in Honour of Alastair Hamilton BRILL

From 1661 to 1664, France was mesmerized by the arrest and trial of Nicolas Fouquet, the country's superintendent of finance. Prosecuted on trumped-up charges of embezzlement, mismanagement of funds, and high treason, Fouquet managed to exonerate himself from all of the major charges over the course of three long years, in the process embarrassing and infuriating Louis XIV. The young king overturned the court's decision and sentenced Fouquet to lifelong imprisonment in a remote fortress in the Alps. A dramatic critique of absolute monarchy in pre-revolutionary France, *Embezzlement and High Treason in Louis XIV's France* tells the gripping tale of an overly ambitious man who rose rapidly in the state hierarchy—then overreached. Vincent J. Pitts uses the trial as a lens through which to explore the inner workings of the court of Louis XIV, who rightly feared that Fouquet would expose the tawdry financial dealings of the king's late mentor and prime minister, Cardinal Mazarin. -- Gail Bossenga, Elizabethtown College, author of *The Politics of Privilege: Old Regime and Revolution in Lille*

Addressing the numerous gaps in current information, *Target Organ Toxicology in Marine and Freshwater Teleosts* is an essential resource for researchers and professionals in aquatic toxicology and environmental risk assessment. All the chapters are written by researchers who are internationally recognised for their work in mechanistic aspects of aquatic toxicology. Each chapter focuses on a specific target organ or physiological system and describes how various agents disrupt the normal physiological system and processes. This volume is devoted to specific organs with coverage of the gill, kidney, skin, liver and gut. The companion volume, *Systems*, provides coverage of toxic effects in the central nervous, immune, neurobehavioural and reproductive systems as well as describing general mechanisms of toxicity.

Historians of the ancien régime have long been interested in the relationship between religion and politics, and yet many issues remain contentious, including the question of sacral monarchy.

Scholars are divided over how - and, indeed, if - it actually operated. With its nuanced analysis of the cult of Saint Louis, covering a vast swathe of French history from the Wars of Religion through the zenith of absolute monarchy under Louis XIV to the French Revolution and Restoration, *Sacral Kingship in Bourbon France* makes a major contribution to this debate and to our overall understanding of France in this fascinating period. Saint Louis IX was the ancestor of the Bourbons and widely regarded as the epitome of good Christian kingship. As such, his cult and memory held a significant place in the political, religious, and artistic culture of Bourbon France. However, as this book reveals, likenesses to Saint Louis were not only employed by royal flatterers but also used by opponents of the monarchy to criticize reigning kings. What, then, does Saint Louis' cult reveal about how monarchies fostered a culture of loyalty, and how did sacral monarchy interact with the dramatic religious, political and intellectual developments of this era? From manuscripts to paintings to music, Sean Heath skilfully engages with a vast array of primary source material and modern debates on sacral kingship to provide an enlightening and comprehensive analysis of the role of Saint Louis in early modern France.

The social consequences of anti-parasitic urbanism, as efforts to expunge supposedly biological parasites penalize those viewed as social parasites. According to French philosopher Michel Serres, ordered systems are founded on the pathologization of parasites, which can never be fully expelled. In *Paris and the Parasite*, Macs Smith extends Serres's approach to Paris as a mediatic city, asking what organisms, people, and forms of interference constitute its parasites. Drawing on French poststructuralist theory and philosophy, media theory, the philosophy of science, and an array of literary and cultural sources, he examines Paris and its parasites from the early nineteenth century to today, focusing on the contemporary city. In so doing, he reveals the social consequences of anti-parasitic urbanism.

Microbe-Assisted Phytoremediation of Environmental Pollutants: Recent Advances and Challenges provides comprehensive information on the principles and practical knowledge of microbe-assisted phytoremediation of organic and inorganic pollutants for environmental safety. This book describes the physiological, biochemical, microbiological, and molecular basis of microbe-assisted phytoremediation and contains many relevant topics to fill the gaps in developing an understanding of microbe-assisted phytoremediation of environmental pollutants. The book provides state-of-the-art knowledge on fundamental, practical, and purposeful utilization of plant-associated bacteria (plant growth-promoting rhizobacteria [PGPR] and endophytes) and arbuscular mycorrhizal fungi for plant-growth promotion and enhanced phytoremediation of environmental pollutants in the contaminated matrix. Features: Provides a state-of-the-art overview of microbe-assisted phytoremediation Emphasizes the roles of PGPR, endophytes, and mycorrhizal fungi in assisted phytoremediation Elucidates biochemical and molecular mechanisms of microbe-assisted phytoremediation Details field studies and success stories of microbe-assisted phytoremediation Explores advances, challenges, and future directions in microbe-assisted phytoremediation The book serves as a valuable resource for researchers, ecotoxicologists, environmental scientists and engineers, environmental microbiologists and biotechnologists, environmental health and risk scientists, environmental science managers and administrators, remediation practitioners, environmental policymakers, and students at the postgraduate and doctoral levels in the relevant fields who wish to work on microbe-assisted phytoremediation of pollutants for environmental safety and sustainability.

This study first examines the marginal repertoire in two well-known manuscripts, the Psalter of Guy de Dampierre and an Arthurian Romance, within their material and codicological contexts. This repertoire then provides a template for an extended study of the marginal motifs that appear in eighteen related manuscripts, which range from a Bible to illustrated versions of the encyclopedias of Vincent de Beauvais and Brunetto Latini. Considering the manuscript as a whole work of art, the marginalia's physical relationship to nearby texts and images can shed light on the reception of these illuminated books by their medieval viewers.

Crusades covers the seven hundred years from the First Crusade (1095-1102) to the fall of Malta (1798) and draws together scholars working on theatres of war, their home fronts and settlements from the Baltic to Africa and from Spain to the Near East and on theology, law, literature, art, numismatics and economic, social, political and military history. Routledge publishes this journal for The Society for the Study of the Crusades and the Latin East. Particular attention is given to the publication of historical sources - narrative, homiletic and documentary - but studies and interpretative essays are welcomed too. *Crusades* also incorporates the Society's Bulletin. The editors are Professor Benjamin Z. Kedar, Hebrew University of Jerusalem, Israel; Professor Jonathan Phillips, Royal Holloway, University of London, UK; Nikolaos G. Christis, Democritus University of Thrace, Greece; and Iris Shagrir, The Open University of Israel.

Set in Paris in the 1780s, *Rétif de la Bretonne's novel Ingénue Saxancour* is a thinly veiled account of his daughter's disastrous marriage to an abusive husband. From the time of her marriage in January 1780, until she left her husband in July 1785, Agnès Rétif suffered continually from severe physical, sexual, and emotional abuse. Published in 1789, Rétif's novel scandalized the public with its graphic descriptions of his son-in-law's sexual perversity and brutal violence. Rétif's novel remains shocking even two centuries later and continues to raise disturbing questions about power relations within abusive relationships. Perhaps most disturbing of all are the accusations leveled against Rétif himself concerning his motives for writing and publishing this account: Was he, as some charged, a shameless exhibitionist willing to reveal his family's darkest secrets merely to attract attention and broaden his readership? Was he an unscrupulous opportunist willing to capitalize on his daughter's misfortunes and risk her reputation simply to pay his debts? Or was he, as he himself claimed, trying to warn young women about the dangers of marrying men of dubious backgrounds against their parents' wishes? Rétif was all this and more: a reform-minded pioneer far in advance of his time with his graphic portrayal of spousal abuse, his call for greater public awareness of this perennial problem, and his crusade for liberal divorce laws that would allow women to escape from abusive relationships and to remarry. This is the first English translation of *Ingénue Saxancour* ever published and offers a wealth of background material on the novel and the real-life events that inspired it. It serves as a companion piece to the annotated French edition edited by Professor Trouille and published by the MHR in 2014.
