**USING
CORPORA TO
LEARN
ABOUT
LANGUAGE
AND
DISCOURSE**

"O'Reilly
Media, Inc."
This book
deals with the
construction
of the 'other'
in European
media at a
time when the
recently
expanded EU
is facing new
political,

economic and
social
challenges.
The aim of the
book is to
document the
diverse
discursive
forms of
othering,
ranging from
differentiation
to
discrimination,
that are
directed
against
various 'other
Europeans' in
both
institutionalized
media and
such non-elite
semi-public
contexts as
discussion
forums and
citizen blogs.
Drawing on
data from
British, Polish,
French, Czech,

Italian,
Hungarian,
Spanish and
Estonian
contexts, the
individual
papers
investigate
how various
social
groupings -
regions,
nations,
ethnicities,
communities,
cultures - are
discursively
constructed as
'outsiders'
rather than
'insiders', as
'them' rather
than 'us'.
While most of
the papers are
grounded in
linguistics and
critical
discourse
studies, the
book will also
appeal to

numerous other social scientists interested in the interface between language, media and social issues. Interdisciplinary Research Discourse John Benjamins Publishing Company Informed by the APPRAISAL Theory, this book analyses the construction of evaluative meanings in web-based English tourism texts (ETTs). It investigates the semantic potentiality of evaluative meaning in English tourism texts on Chinese, British and American websites, as well as the similarities and differences in constructing evaluation among the three varieties of ETTs. It is aimed to discover the characteristic preferences for particular appraisal resources in constructing evaluation in native ETTs, and to find out the deficiencies in using evaluation in ETTs on Chinese websites. Two analytical procedures are adopted: first, based on large corpus files, it discusses the semantic potentiality for evaluative meaning in the three types of ETTs; then, various evaluation features are explored in detail concerning resources of ATTITUDE, ENGAGEMENT and GRADUATION under the APPRAISAL framework. All discussions are conducted by combining quantitative

statistics with qualitative analyses. Theoretically, the study modifies and extends some aspects of the APPRAISAL Theory so as to facilitate the analysis of evaluation in tourism discourse. The study is also instructive for Chinese ESL/EFL writers in writing English tourist texts or translating Chinese tourism texts into English. Phraseology and Style in Subgenres of the Novel Springer Nature

Discourse topics are a frequently mentioned but rarely operationalised concept in linguistics. Taking a text linguistic approach and defining discourse topics as clusterings of concepts, this book examines and compares methods for investigating topic boundaries, topic identification and topic development. The first book to be devoted to topics in extended discourse,

Discourse Topics examines topics in several genres and generates new insights into the nature of discourse topics that challenge the status quo. It is essential reading for researchers in linguistics, discourse analysis, natural language processing and psychology whose work concerns topics. **Academic Vocabulary in Learner Writing** Routledge

<p>Methods of approaching the study of discourse have developed rapidly in the last ten years, influenced by a growing interdisciplinary spirit among linguistics and anthropology, sociology, cognitive and cultural psychology and cultural studies, as well as among established sub-fields within linguistics itself. Among the more recent developments are an increasing 'critical' turn</p>	<p>in discourse analysis, a growing interest in historical, ethnographic and corpus-based approaches to discourse, more concern with the social contexts in which discourse occurs, the social actions that it is used to take and the identities that are constructed through it, as well as a revaluation of what counts as 'discourse' to include multi-modal texts and interaction. Advances in</p>	<p>Discourse Studies brings together contributions from leading scholars in the field, investigating the historical and theoretical relationships between new advances in discourse studies and pointing towards new directions for the future of the discipline. Featuring discussion questions, classroom projects and recommended readings at the end of each section, as well as case studies</p>
--	---	---

illustrating each approach discussed, this is an invaluable resource for students of interdisciplinary discourse analysis.

Textual Patterns John Benjamins Publishing
This collection of original research highlights the legacy of Michael Toolan's pioneering contributions to the field of stylistics and in so doing provides a critical overview of the ways in which language,

text, and context are analyzed in the field and its related disciplines. Featuring work from an international range of contributors, the book illustrates how the field of stylistics has evolved in the 25 years since the publication of Toolan's seminal *Language, Text and Context*, which laid the foundation for the analysis of the language and style in literary texts. The volume demonstrates

how technological innovations and the development of new interdisciplinary methodologies, including those from corpus, cognitive, and multimodal stylistics, point to the greater degree of interplay between language, text, and context exemplified in current research and how this dynamic relationship can be understood by featuring

examples from a variety of texts and media. Underscoring the significance of Michael Toolan's extensive work in the field in the evolution of literary linguistic research, this volume is key reading for students and researchers in stylistics, discourse studies, corpus linguistics, and interdisciplinary literary studies. Textual Patterns
John Benjamins Publishing
DISCOURSE TOPICS
Cambridge University Press
It is increasingly clear that, in order to understand language as a phenomenon, we must understand the phenomenon of text. Our primary experience of language comes in the form of texts, which embody the complete communicativ

e events through which our language-using lives are lived. These events are shaped by communicative needs, and this shaping is reflected in certain characteristic patterns in the texts. However, the nature of texts and text is still elusive: we know which forms are typically found in text but we do not yet have a full grasp of how they constitute its textuality, how they make a text [tick]. The

twelve contributions to this volume show how texts across a wide range of text types hold together by different patterns of chunking and linking. The common purpose in all the contributions is to explore the nature of text patterning as the functional environment within which language operates. Academic Evaluation Peter Lang János S. Petőfi (1931-2013) was one of the founders of

Text Linguistics in Germany in the early '70s. He developed different text models, the most famous of which were the Text Structure World Structure Theory (TeSWeST) and Semiotic Textology. In this volume, some of his colleagues and disciples discuss his theoretical contributions to prove the enormous impact of his thoughts in the fields of linguistics, literary theory,

rhetoric and semiotics. The essays here consider the notion of coherence, which Petőfi deemed to be the only sufficient condition for textuality, the relationships between his textual models and disciplines such as cognitive, computational and corpus linguistics, and his contributions to the analysis of literary and multimedial texts.

JOURNAL OF**

ENGLISH**LINGUISTICS****(VOLUME 2)**

<p>Springer Building on Raymond Williams' iconic "Keywords" released in 1975, Jeffries and Walker show how some pivotal words significantly increased in use and evolved in meaning during the years of the 'New Labour' project. Focussing on print news media, this book establishes a set of socio-political</p>	<p>keywords for the 'Blair Years', and demonstrates how their evolving meanings are indicative of the ideological landscape in Britain at that time, and the extent to which the cultural hegemony of the New Labour project influenced the language of the commentariat. Combining corpus linguistic approaches with critical stylistics the authors conduct an analysis of two</p>	<p>newspaper corpora using computational tools. Looking closely at textually-constructed meanings within the data, their investigation of the keywords has a qualitative focus, and sets out a clear methodology for combining corpus approaches with systematic co-textual analysis. <i>International Journal of Language Studies (IJLS) - volume 7(4)</i> Textual Patterns</p>
---	--	--

Textual Patterns introduces corpus resources, tools and analytic frameworks of central relevance to language teachers and teacher educators. Specifically it shows how key word analysis, combined with the systematic study of vocabulary and genre, can form the basis for a corpus informed approach to language teaching. The first part of the book gives	the reader a strong grounding in the way in which language teachers can use corpus analysis tools (wordlists, concordances, key words) to describe language patterns in general and text patterns in particular. The second section presents a series of case studies which show how a key word / corpus informed approach to language education can work in practice. The	case studies include: General language education (i.e. students in national education systems and those following international examination programmes), foreign languages for academic purposes, literature in language education, business and professional communication, and cultural studies in language education. <i>Textual and Contextual Analysis in Empirical</i>

<p><i>Translation Studies</i> John Benjamins Publishing Interdisciplinary Research Discourse: Corpus Investigations into Environment Journals provides cutting-edge insights into the nature of communication in interdisciplinary research domains. Using a corpus of nearly 12,000 articles taken from 11 journals, this book addresses the key questions that surround writing for an</p>	<p>interdisciplinary audience. This books also explores: the ways in which writers write if they are writing for an interdisciplinary audience as well as for a specialist disciplinary audience; the different natures and instances of the term 'interdisciplinarity'; and whether an analysis of the rhetorical contexts in which research is relayed to interdisciplinary audiences is critical to understanding</p>	<p>interdisciplinary research activities and communications. Written by two leading figures in the field of Corpus Linguistics, this is an essential text for researchers and upper-level undergraduates working in the areas of Corpus Linguistics, Discourse Analysis and Linguistics in areas of interdisciplinary communication. <u>Keyness in Texts</u> John Benjamins Publishing</p>
--	--	--

Company Corpus Linguistics has revolutionised the world of language study and is an essential component of work in Applied Linguistics. This book, now in its second edition, provides a thorough introduction to all the key research issues in Corpus Linguistics, from the point of view of Applied Linguistics. The field has progressed a great deal since the first	edition, so this edition has been completely rewritten to reflect these advances, whilst still maintaining the emphasis on hands-on corpus research of the first edition. It includes chapters on qualitative and quantitative research, applications in language teaching, discourse studies, and beyond. It also includes an extensive discussion of the place of Corpus	Linguistics in linguistic theory, and provides numerous detailed examples of corpus studies throughout. Providing an accessible but thorough grounding to the fascinating, fast-moving field of Corpus Linguistics, this book is essential reading for the student and the researcher alike. <u>Textual Patterns of the Eight-Part Essays and Logic in Ancient Chinese Texts</u>
--	---	---

<p> Bloomsbury Publishing This book offers a highly accessible introduction to natural language processing, the field that supports a variety of language technologies, from predictive text and email filtering to automatic summarization and translation. With it, you'll learn how to write Python programs that work with large collections of unstructured text. You'll access richly </p>	<p> annotated datasets using a comprehensive range of linguistic data structures, and you'll understand the main algorithms for analyzing the content and structure of written communication. Packed with examples and exercises, Natural Language Processing with Python will help you: Extract information from unstructured text, either to guess the topic or identify </p>	<p> "named entities" Analyze linguistic structure in text, including parsing and semantic analysis Access popular linguistic databases, including WordNet and treebanks Integrate techniques drawn from fields as diverse as linguistics and artificial intelligence This book will help you gain practical skills in natural language processing using the Python </p>
---	---	--

programming language and the Natural Language Toolkit (NLTK) open source library. If you're interested in developing web applications, analyzing multilingual news sources, or documenting endangered languages -- or if you're simply curious to have a programmer's perspective on how human language works -- you'll find Natural Language Processing with Python both

fascinating and immensely useful. *Key Cultural Texts in Translation* John Benjamins Publishing This book explores how academics publically evaluate each others' work. Focusing on blurbs, book reviews, review articles, and literature reviews, the international contributors to the volume show how writers manage to critically engage with others' ideas,

argue their own viewpoints, and establish academic credibility.

CORPUS STYLISTICS AND DICKENS'S FICTION

John Benjamins Publishing The Cambridge Handbook of English Corpus Linguistics (CHECL) surveys the breadth of corpus-based linguistic research on English, including chapters on collocations, phraseology, grammatical

variation, historical change, and the description of registers and dialects. The most innovative aspects of the CHECL are its emphasis on critical discussion, its explicit evaluation of the state of the art in each sub-discipline, and the inclusion of empirical case studies. While each chapter includes a broad survey of previous research, the primary focus is on a detailed description of the most important corpus-based studies in this area, with discussion of what those studies found, and why they are important. Each chapter also includes a critical discussion of the corpus-based methods employed for research in this area, as well as an explicit summary of new findings and discoveries. The State of Stylistics John Wiley & Sons Textual Patterns introduces corpus resources, tools and analytic frameworks of central relevance to language teachers and teacher educators. Specifically it shows how key word analysis, combined with the systematic study of vocabulary and genre, can form the basis for a corpus informed approach to language teaching. The first part of the book gives the reader a strong grounding in

the way in which language teachers can use corpus analysis tools (wordlists, concordances, key words) to describe language patterns in general and text patterns in particular. The second section presents a series of case studies which show how a key word / corpus informed approach to language education can work in practice. The case studies include: General	language education (i.e. students in national education systems and those following international examination programmes), foreign languages for academic purposes, literature in language education, business and professional communication, and cultural studies in language education. <u>The Routledge Handbook of Language and Religion</u> John Benjamins Publishing This book	systematically depicts the theory of textual patterns (chengshi) of the eight-part essays and logic in ancient Chinese texts. With the rare materials, it covers all the basic and important aspects of the whole process and values of chengshi, such as the transformation of different parts and the coherent expression of the doctrines, the planning of writing, and the application to the aesthetic
---	---	---

and pedagogic fields. It also explores the similarities and disparities of logical patterns between ancient Chinese and Western texts. Though entirely fresh and tentative, the contrastive studies get new insights into the logic and philosophical concepts hidden in the writings for better understanding of the uniqueness and richness implied in Chinese culture.

Advances in Discourse Studies Peter Lang
Token focuses on English linguistics in a broad sense, taking in both diachronic and synchronic work, grammatical as well as lexical studies. That being said, the journal favors empirical research. All submissions are double-blind peer reviewed. Token is the original medium of publication for all articles that the journal prints. ISSN

2299-5900
Corpora, Grammar and Discourse Jan Kochanowski University
Articles in this volume discuss the role and effectiveness of corpora and corpus-linguistic techniques for language teaching but also deal with broader issues such as the relationship between corpora and second language teaching and how the different perspectives of foreign language

teachers and applied linguists can be reconciled.	broad collection of papers that investigate how stylistics has evolved throughout the late 20th and early 21st centuries. In so doing, it considers how	stylisticians currently perceive their own respective fields of enquiry. It also defines what stylistics is, and how we might use it in research and teaching.
