The papers in this volume in honor of Sandra Annear Thompson deal with complex sentences, an important topic in Thompson's career. The focus of the contributions is on the ways in which the grammatical properties of complex sentences are shaped by the communicative context in which they are produced, an approach to grammatical analysis that Thompson pioneered and

developed in the course of her distinguished career.

Grammatical Complexity in Academic English uses corpus-based analyses to challenge a number of dominant stereotypes and assumptions within linguistics. Biber and Gray tackle the nature of grammatical complexity,

demonstrating that embedded phrasal structures are as important as embedded dependent clauses. The authors also overturn ingrained assumptions about linguistic change, showing that grammatical change occurs in writing as well as speech. This work establishes that academic writing is structurally compressed (rather than elaborated); that it is often not explicit in the expression of meaning; and that scientific academic writing has been the locus of some of the most important grammatical changes in English over the past 200 years (rather than being conservative and resistant to change). Supported throughout with textual evidence, this work is essential reading for discourse analysts, sociolinguists, applied linguists, as well as descriptive linguists and historical linguists.

Grammar Instruction in a Digital Age

Guilford Press This book presents a comprehensive study of how children acquire complex sentences. Drawing on observational data from English-speaking children aged 2 to 5, Holger Diessel investigates the acquisition of infinitival and participial complement clauses, finite complement clauses, finite and nonfinite relative clauses, adverbial clauses, and coordinate clauses. His investigation shows that the development of complex sentences originates from simple non-embedded sentences and that two different developmental pathways can be distinguished: complex sentences including complement and relative clauses evolve from simple sentences that are gradually expanded to multiple-clause constructions, and complex sentences including adverbial and coordinate clauses develop from simple sentences that are integrated in a specific biclausal unit. He argues that the acquisition process is determined by a variety of factors: the frequency of the various complex sentences in the ambient language, the semantic and syntactic complexity of the emerging constructions, the communicative functions of complex sentences, and the social-cognitive development of the child.

An unforgettable German bestseller about the European refugee crisis: "Erpenbeck will get under your skin" (Washington Post Book World) *Go, Went, Gone* is the masterful new novel by the acclaimed German writer Jenny Erpenbeck, "one of the most significant German-language novelists of her generation" (The Millions). The novel tells the tale of Richard, a retired classics professor who lives in Berlin. His wife has died, and he lives a routine existence until one day he spies some African refugees staging a hunger strike in Alexanderplatz. Curiosity turns to compassion and an inner transformation, as he visits their shelter, interviews them, and becomes embroiled in their harrowing fates. *Go, Went, Gone* is a scathing indictment of Western policy toward the European refugee crisis, but also a touching portrait of a man who finds he has more in common with the Africans than he realizes. Exquisitely translated by Susan Bernofsky, *Go, Went, Gone* addresses one of the most pivotal issues of our time, facing it head-on in a voice that is both nostalgic and frightening. *A Practical Handbook for Writers and Students* Lulu.com
