Product strategy is the key driver of business strategy and corporate success. This book brings out several important aspects of product strategy, drawing upon examples from the Indian automobile industry, which is verily the bellwether of the Indian economy. The automobile industry is not only a strategic industry economically but also an instructive industry intellectually. The industry is the cradle of modern management and is a synthesis of various functional strategies. The growth of the automobile industry or, for that matter, any consumer-facing industry lies in its ability to maintain a continuous pipeline of new and innovative products, substantive in functionality and stylistic in appearance. The automobile industry provides the perfect backdrop for discussing products as the core of the corporate business strategy. The global automobile industry, including the Indian automobile industry, is at an inflection point with portends of an unprecedented transformation. The drivers of this transformation are already seen in terms of connected vehicles,

autonomous mobility, electric vehicles and digital technologies. The book, through its eighty chapters, demonstrates the synergistic interplay between technology and business, strategy and execution, innovation and inventiveness, enterprise and regulation, indigenization and globalization, structure and process, resourcing and spend, and leadership and management. This interplay would determine India's ability to become a major player in this transformation. This book will be of interest to industry professionals, policy makers, the academic community and the general public.

Auto manufacturing holds the promise of employing many young Indians in relatively well-paid, high-skill employment, but this promise is threatened by the industry's role as a site of immense conflict in recent years. This book asks: how do we explain this conflict? What are the implications of conflict for the ambitious economic development agendas of Indian governments? Based upon extensive field research in India's National Capital Region, this book is the first to focus on labour relations in the Indian auto industry. It proposes the theory that conflict in the auto industry has been driven by twin forces: first, the intersection of global

networks of auto manufacturing with regional social structures which have always relied on informal and precariously-employed workers; and, second, the systematic displacement of securely-employed 'regular workers' by waves of precariously-employed 'de facto informal workers'.

MEANING AND IMPORTANCE OF INVENTORY Inventory means stock of goods. To finance managers inventory connotes the value of raw material, consumables spares and stores, work in progress and finished goods, in which the company's fund have been invested. We can identify inventory as those goods which are procured, stored and used for day-to-day functioning of the

organisation. Today's inventory is tomorrow's consumption. The classical definition of inventory is that it is an ideal resource of anything having an economic value. From this it follows that inventory control is a planning and devising procedure to maintain an optimal level of idle resources. Inventory deals with the determination of optimal procedures for procuring stock of commodities to meet future demand. The inventory of the retailer or the manufacturer, can be taken as a paradigm. In order to sell an item he must maintain a stock of that item to meet the demand.

The last years have seen a profusion of books and articles on managing technology, focused almost exclusively on leading edge firms in leading edge countries. This book argues that succeeding as a follower-firm requires learning from many experiences and avoiding simplistic 'how-to' approaches that prescribe one best practice. Individual chapters cover: * the role of innovation on the shop-floor * the importance of mixing process and product innovation * the challenges involved in building an innovation culture * the special role of R&D and design. These topics instruct a deeper understanding of strategy in follower-firms, simultaneously providing insight for public policy in building local technological capacity. Forbes and Wield argue that there are many 'leading edges' which appear in the most unlikely places. Their book contains major case studies from many different firms in twelve countries over five continents, in industry segments as diverse as pharmaceuticals, software, garments, beer and steel. This informative book for students, researchers and professionals in the fields of business, management and information technology shows that successful experiences can arise anywhere in the world.

India Today Tata McGraw-Hill Education

From the early Vedic period, the Vaishyas, the oldest mercantile community of India, generated wealth for the nation through their remarkable efforts. Their Marwari offshoots were appointed by many rulers as ministers, advisors and diwans and were recognised as the first philanthropists in India. The Marwari Heritage takes the reader on a voyage of discovery of the Marwaris who migrated from Rajputana, Haryana, Malwa and its

adjoining regions to other parts of India. They braved trials and tribulations in unchartered territories, supporting others of their community, never losing faith in their ability to succeed, and focused on their goal, they became the uncrowned kings, first of trade and business, and later of industry. They joined the freedom struggle with a true spirit of patriotism, philanthropy and active political involvement. Many courted imprisonment and even achieved martyrdom. Today, the roots of the Marwari community are deeply enmeshed in the social, cultural and economic fabric of India. Their innate psyche of giving back to society has seen them donate generously to education, empowerment of women and vocational training leading to employment. Shedding some traditions and retaining many, they have stepped into the modern age, achieving an enviable cultural mix. At the helm of most successful entrepreneurial enterprises, their focus on innovation and technological advancement has resulted in governments of several countries seeking their advice on economic growth. Of the many who have left an indelible mark on the history, socio-political and economic foundations of the country, this book is enriched with rich cameos of some of these 'greats' and the reader derives insights into numerous newly discovered and hitherto unrecorded facts. The younger generation of Marwaris continue to dream big and build on the foundations their forefathers planted. They continue to grow from strength to strength, marching towards new horizons. The plethora of welfare schemes and trusts responsible for development of the nation's needy continue to be monitored with precision. Meticulously researched over five years and richly illustrated with over 100 rare, coloured photographs, paintings,

and 600 black and white photographs, illustrations and rare documents published for the first time, readers have much to feast their eyes on. This pictorial book also serves as an inspiration to any and everyone who dares to dream and reach for the skies.
