*Anatomy Tutor for Surgeons in Training* Scientific Publishers

Anatomy: 1800 Multiple Choice Questions contains 1,800 multiple choice questions related to anatomy. The questions are supported by illustrations and arranged into nine sections: Upper Limb, Lower Limb, Thorax, Abdomen, Pelvis and Perineum, Head and Neck, Nervous System, Histology, and Embryology. In the Histology section, the questions in each of the six standard formats are

arranged in the same sequence, as follows: the Cell; the Tissues (commencing with the Epithelia and ending with Nervous Tissue); and the Systems (commencing with the Cardiovascular and ending with the Reproductive). Readers will encounter questions dealing with the spine of the scapula, the vein that pierces the clavipectoral fascia, branch of the axillary artery, and the quadriceps femoris muscle. Other topics include muscle pair inserted into iliotibial tract, bony prominences on which you kneel, muscle that flexes hip and knee, and the chromosomal formula of the oocyte at ovulation. This text also discusses the rate of regeneration of peripheral nerves following injury; structures that occupy the carotid sheath; and the location of sphincter urethrae. This book will be extremely valuable to students and teachers of anatomy.

This thoroughly revised and rewritten edition of a popular book can be used to review and revise anatomy while preparing for professional examination. While aimed at the MBBS students, candidates preparing for PG entrance examinations will also find it extremely useful. This is an ideal MCQs book to review and revise the subject of anatomy while preparing to face the professional examination and aiming for high scores. Candidates preparing for postgraduate entrance examinations will also find it extremely useful.

**Multiple Choice Questions in Anatomy** Createspace Independent Pub

This comprehensive revision aid is an invaluable learning and reference tool for all Anatomy and Physiology students, containing everything you need to help pass your exams. Having been fully revised in line with the latest specifications for all major awarding bodies, this popular text book is being used by students all over the world in countries such as Britain, Ireland, Europe, Singapore, South Africa, Australia and USA. It is suitable for any student training to become: A Massage

Therapist, Beauty Therapist, Reflexologist, Aromatherapist, Health Care Assistant, 1st Year Nursing, Ambulance Technician, Qualified Practitioner and Tutor. There are 13 chapters in total, with 1,160 Multiple Choice Questions. Each question has 4 possible answers with an answer grid at the end of each chapter. Also found inside are 58 crosswords with hundreds of clues, covering all systems of the body. These crosswords are designed to be interactive and fun and should be repeated several times until your confidence grows. Anatomy & Physiology Revision Questions can be used either in class or as a separate self study guide. Beauty & Holistic Studies has been established since 2007 and in that time, has become one of the beauty industries leading providers in education resources. With subjects being added on a regular basis, it has helped over 30,000 students worldwide to gain success in their exams. Beauty & Holistic Studies was created by Kate Tierney, an experienced beauty and complementary tutor who understands the demands placed on today's busy students. As well as having jobs and families, students must attend a rigorous class schedule, one that includes intense practical and theory based subjects. With all of these demands, there is hardly any time left to follow a proper study program. With this in mind, these revision guides have been designed to provide students with the necessary knowledge and tools to pass their exams with ease. Students are able to practice the skills they have learned in college, all from the comfort of their own homes.

This practical, comprehensive anatomy book arms FRCA candidates with detailed, robust anatomical knowledge via a question-based approach.

### MCQs IN ANATOMY, 2E

Jaypee Brothers, Medical Publishers Pvt. Limited

The ultimate aim of any teaching system is to produce the best scholars & the best professionals in the today's scenario with futuristic approach so that when given a chance they must be able to exhibit their past knowledge. To verify or quantify this knowledge the student/scholar has to

undergo certain exam. Nowadays the best exams are supposed to be those having Multiple Choice Questions i.e. MCQ's as integral part because of two important reasons, First easy to conduct & uniform evaluation for all students, that is no bias, Second MCQ's checks memory/recall memory/ reasoning & ability to be precise in terms of reading /understanding and speed with ability to record answers with accuracy too. The book on this subject "Exam Success Review ANATOMY MCQ's- Volume-1, Head Neck & Brain for Medical Students - MBBS 1st Prof & PG Entrance" will be helpful as a companion for fast revision during examination and will help them certainly to secure full marks in the Multiple Choice Questions in examination. These MCQ's make about 20% to 40% of total marks in the 1st prof. MBBS exam and anybody who knows the concepts and art to answer the MCQ's is going to be winner not only at MBBS level but also at various Postgraduate entrance Examinations at national & state level to get the PG Course of their choices.

MCQ's in Anatomy Elsevier Health Sciences

This second edition provides 2400 multiple choice questions on human anatomy and physiology, and some physical science, separated into 40 categories. The answer to each question is accompanied by an explanation. Each category has an introduction to set the scene for the questions to come. However, not all possible information is provided within these Introductions, so an Anatomy and Physiology textbook is an indispensable aid to understanding the answers. The questions have been used in end-of-semester examinations for undergraduate anatomy and physiology courses and as such reflect the focus of these particular courses and are pitched at this level to challenge students that are beginning their training in anatomy and physiology. The question and answer combinations are intended for use by teachers, to select questions for their next examinations, and by students, when studying for an upcoming test. Students enrolled in the courses for which these questions were written include nursing, midwifery, paramedic, physiotherapy, occupational therapy, nutrition and dietetics, health sciences, exercise science, and students taking an anatomy and physiology course as an elective.

Multiple Choice Questions in Anatomy and Neurobiology for Undergraduates Cambridge University Press

The ultimate aim of any teaching system is to produce the best scholars & the best professionals in the today's scenario with futuristic approach so that when given a chance they must be able to exhibit their past knowledge. MBBS exam and anybody who knows the concepts and art to answer the MCQ's is going to be winner not only at MBBS level but also at various Postgraduate entrance Examinations at national & state level to get the PG Course of their choices.

**Clinical Anatomy MCQs** Elsevier

Multiple Choice Questions in Anatomy and Neurobiology for Undergraduates is a collection of multiple choice questions in anatomy and neurobiology for undergraduate students. Questions are grouped for each visceral system and the nervous system. In the case of the body framework (including peripheral nerves and blood vessels), however, a regional grouping is used. Each question has the corresponding correct answer. This book is comprised of eight chapters covering the upper limb, head and neck, musculoskeletal trunk, lower limb, cardiovascular and respiratory systems, gastrointestinal and genito-urinary systems, and neurobiology. Each chapter contains three types of questions designed to test knowledge in different ways. Type A items involve choosing a single correct answer from five available choices. Type L items are used to elicit information on the cause-effect relationship between sets of data. Type E items call for the perception of one or more correct responses among four alternatives, and the responses may be grouped in five different ways. Most questions are also accompanied by an indication of the percentage of students who obtained the correct answer on occasions of previous settings and by a biserial correlation coefficient ( $r$  biserial), indicative of the capacity of the question to distinguish between more able and less able students. This monograph is primarily intended for medical undergraduates and will also be useful to academic anatomists building up their own question banks.
