contains  
accepted  
papers  
presented in  
the main track  
of ECC 2015,  
the Second  
Euro-China  
Conference on  
Intelligent  
Data Analysis  
and  
Applications.  
The aim of  
ECC is to  
provide an  
internationally

respected forum for scientific research in the broad area of intelligent data analysis, computational intelligence, signal processing, and all associated applications of AIs. The second edition of ECC was organized jointly by VSB - Technical University of Ostrava, Czech Republic, and Fujian University of Technology, Fuzhou, China. The conference, organized under the

patronage of Mr. Miroslav Novak, President of the Moravian-Silesian Region, took place in late June and early July 2015 in the Campus of the VSB - Technical University of Ostrava, Czech Republic. *ACSM's Exercise Testing and Prescription* Oxford University Press The premier text for therapeutic exercise Here is all the guidance you need to customize

interventions for individuals with movement dysfunction. You'll find the perfect balance of theory and clinical technique—in-depth discussions of the principles of therapeutic exercise and manual therapy and the most up-to-date exercise and management guidelines. [Is This Change Real?](#) Elsevier Health Sciences This 'Very Short Introduction' explores the concept of

measurement, its mathematical underpinnings, and its wide range of application from the sciences and social sciences to economics and commerce. The Encyclopedia of Elder Care AOTA Press Practical and concise, Stroke Rehabilitation provides everyday clinical guidance on current methods, techniques, evidence, and controversies in this

important area. This focused resource by Drs. Richard Wilson and Preeti Raghavan consolidates today's available information in an easy-to-navigate format for today's practicing and trainee physiatrists, as well as other members of the rehabilitation team. **Neurologic Stem Cell Surgery** Kohlman Evaluation of Living Skills (KELS)

Praise for the Third Edition: "The third edition of this outstanding resource reflects the many advances in the care of older people that have occurred since the publication of the second edition...The vast bulk of the content is accessible and relevant to an international audience. The indexing and cross-referencing are excellent... Score: 5/5 stars." -- Margaret Arthur,

<p>Nursing Standard "The information [in this book] is amazing. I reviewed topics in which I have expertise and was very satisfied. This is an excellent addition to my library and I will refer to it often, much like a medical dictionary... Score: 90, 4 Stars." -- Doody's Medical Reviews "Provides 273 comprehensive, yet succinct, entries on a variety of topics related to elder care. In addition,</p>	<p>many of the entries include see also references that help readers easily navigate the book. Recommended." --Choice: Current Reviews for Academic Libraries This expanded, one-of-a-kind reference of more than 250 entries provides a comprehensive guide to all of the essential elements of elder care across a breadth of health and social service disciplines. Responding to</p>	<p>the needs of providers, directcare workers, family, and other caregivers, the diverse array of entries included in this encyclopedia recognize and address the complex medical, social, and psychological problems associated with geriatric care. In addition to a brief, accessible summary of each topic, entries include several key references, including web</p>
---	--	---

links and mobile apps for additional sources of information. This updated edition contains more than 30 new entries written by renowned experts that address a variety of elder care topics. New to the Fourth Edition: New entries addressing Ethics Consultation, Eye Disorders, Pain - Acute and Chronic, and many others Key Features: Provides succinct descriptions of over 250 key

topics for health and social service clinicians Offers crucial information for elder care providers across all settings and disciplines Distills current, evidence-based literature sources Written by nationally recognized expert researchers and clinicians Includes links to useful websites and mobile apps **Brain Injury Medicine, 2nd Edition** Demos Medical

Publishing NOTE: NO FURTHER DISCOUNT ON THIS PRODUCT TITLE -- OVERSTOCK SALE -- Significantly reduced list price Traumatic brain injury (TBI) is a complex condition for which limited research exists. The recent conflicts in Iraq and Afghanistan have resulted in numerous service members returning home after sustaining TBI, and

healthcare providers scrambling to find resources on how to treat them. This toolkit is a comprehensive source of inventories and therapy options for treating service members with mild TBI. All aspects of mild TBI are covered, including vestibular disorders, vision impairment, balance issues, posttraumatic headache, temporomandibular dysfunction,

cognition, and fitness, among others. With easy-to-follow treatment options and evaluation instruments, this toolkit is a one-stop resource for clinicians and therapists working with patients with mild TBI.

### **Rehabilitation Outcome Measures**

Elsevier Health Sciences Master the role of the physical therapist or physical therapist assistant in neurologic rehabilitation! Neurologic

Interventions for Physical Therapy, 3rd Edition helps you develop skills in the treatment interventions needed to improve the function of patients with neurologic deficits. It provides a solid foundation in neuroanatomy, motor control, and motor development, and offers clear, how-to guidelines to rehabilitation procedures. Case studies help you follow best practices for the treatment

of children and adults with neuromuscular impairments caused by events such as spinal cord injuries, cerebral palsy, and traumatic brain injuries. Written by physical therapy experts Suzanne 'Tink' Martin and Mary Kessler, this market-leading text will help you prepare for the neurological portion of the PTA certification exam and begin a successful career in

physical therapy practice. Comprehensive coverage of neurologic rehabilitation explores concepts in neuroanatomy, motor control and motor learning, motor development, and evidence-based treatment of adults and children with neuromuscular impairments. Over 700 photos and drawings clarify concepts, show anatomy, physiology, evaluation, and

pathology, and depict the most current rehabilitation procedures and technology. Case studies demonstrate the patient examination and treatment process, and show how to achieve consistency in documentation. Proprioceptive Neuromuscular Facilitation chapter describes how PNF can be used to improve a patient's performance of functional tasks by increasing strength,

flexibility, and range of motion - key to the treatment of individuals post stroke. Review questions are included at the end of each chapter, with answers at the back of the book. Illustrated step-by-step intervention boxes, tables, and charts highlight important information, and make it easy to find instructions quickly. Use of language of the APTA Guide to Physical Therapist

Practice ensures that you understand and comply with best practices recommended by the APTA. NEW photographs of interventions and equipment reflect the most current rehabilitation procedures and technology. UPDATED study resources on the Evolve companion website include an intervention collection, study tips, and additional

review questions and interactive case studies.

**THE

SPINAL  
CORD  
INJURY  
MEDICINE  
QUESTION  
BANK**

F.A. Davis  
Preceded by A case manager's study guide / Denise Fattorusso, Campion Quin. 4th ed. c2013. Advances in Human Aspects of Transportation Oxford University Press Billions of dollars are

spent on stroke-related rehabilitation research and treatment techniques but most are not well communicated to the patient or caregiver. As a result, many stroke survivors are treated with outdated or ineffective therapies. Stronger After Stroke puts the power of recovery in the reader's hands by providing simple to follow instructions for reaching the highest possible level of healing. Written for stroke survivors, their caregivers, and loved ones, Stronger After Stroke presents a new and more effective treatment philosophy that is startling in its simplicity: stroke survivors recover by using the same learning techniques that anyone uses to master anything. Basic concepts are covered, including: Repetition of task-specific movements Proper scheduling of practice Challenges at each stage of recovery Setting goals and recognizing when they have been achieved The book covers the basic techniques that can catapult stroke survivors toward maximum recovery. Stronger After Stroke bridges the gap between stroke survivors and what they desperately

need: easily understandable and scientifically accurate information on how to achieve optimal rehabilitation.

**Pediatric Evaluation of Disability Inventory (PEDI).**

Springer Publishing Company  
Rely on this comprehensive, curriculum-spanning text and reference now and throughout your career! You'll find everything you need to know about the rehabilitation

management of adult patients... from integrating basic surgical, medical, and therapeutic interventions to how to select the most appropriate evaluation procedures, develop rehabilitation goals, and implement a treatment plan. Online you'll find narrated, full-color video clips of patients in treatment, including the initial examination, interventions, and outcomes

for a variety of the conditions commonly seen in rehabilitation settings.

**Therapeutic Exercise** John Wiley & Sons  
Scientific evidence from different countries around the globe shows that those with low or inadequate health-related knowledge and skills include all ages, social, and economic backgrounds. The consequences of this inadequacy simultaneously affect individuals,

healthcare systems, and society in many ways, such as healthcare quality and cost. Research on health literacy can provide insight on how to improve the communication of health issues, raise awareness, and promote the lifelong learning of patients and healthcare professionals. *Optimizing Health Literacy for Improved Clinical Practices* examines the latest advances in

providing and helping patients and medical professionals to understand basic health information and the services that are most appropriate. Featuring coverage on a broad range of topics such as patient engagement, mobile health, and health communication, this book is geared towards medical professionals, hospital administrators, healthcare providers, academicians, and

researchers in the field. *Intelligent Data Analysis and Applications* Springer Nature Increasing health literacy among patients is a difficult task as medical jargon and healthcare directions can be overwhelming and difficult to comprehend. In today's digital world, people are more connected than ever before and have the ability to find healthcare information in

a way that was not possible in recent years. Mass media and social media have become particularly influential in conveying health information to the public. With the amount of misinformation being spread, coupled with poor health literacy skills, it is imperative that new strategies and policies are undertaken to ensure that patients and the general public receive

accurate information and are appropriately educated in order to provide them with the best possible knowledge and care. The Research Anthology on Improving Health Literacy Through Patient Communication and Mass Media provides an overview of the importance of health literacy and the various means to achieve health literacy for patients using several

strategies and elements such as patient communication and mass media. The book covers health awareness challenges that have been faced recently and historically and pushes for better patient-provider communication. The book also examines the use of social media, virtual support groups, and technological tools that aid in the facilitation of health knowledge. Covering a

range of key topics such as patient safety, health illiteracy, and eHealth, this anthology is crucial for healthcare professionals, researchers, academicians, students, and those interested in understanding the importance of health literacy and how it connects to media and communication.

Springer  
Nature  
Rehabilitation Outcome

Measures is a comprehensive review and comparison of measurement instruments in rehabilitation. It includes a high-level section on professional practice in physiotherapy and an introduction to the World Health Organisation's (WHO) International Classification of Health. For those who wish to learn more about the relevance of reported measurement properties, the text focuses on how this knowledge

can assist clinical decision-making. Additionally, the book reviews a range of measurement s in neurological rehabilitation as well mobility, fatigue, physical activity and patient satisfaction. Rehabilitation Outcome Measures is directed at students preparing for clinical practice, as well as researchers and practitioners seeking

information about a range of measurement instruments. Provides details on how to manage a project and select an outcome measure

Introduction to WHO's International Classification of Functioning, Disability and Health Boxes with specific links to clinical decision-making

Easy format for review of measurement possibilities in each domain

Clear review of 36 measurement

instruments

**Stronger After Stroke**

Human Kinetics Publishers

The go-to resource for class, clinical, and practice...now in full color! A team of noted OTA and OT leaders and educators deliver practical, in-depth coverage of the most common adult physical conditions and the corresponding evidence-based occupational therapy interventions.

The authors

blend theory and foundational knowledge with practical applications to OTA interventions and client-centered practice. This approach helps students develop the critical-thinking and clinical-reasoning skills that are the foundation for professional, knowledgeable, creative, and competent practitioners.

New & Updated!

Content that incorporates language from

the 4th Edition of the Occupational Therapy Practice Framework and aligns with the latest ACOTE standards New & Updated! Full-color, contemporary photographs that reflect real clients and OT practitioners in diverse practice settings New Chapters! Occupational Justice for Diverse and Marginalized Populations, Motor Control and Neurotherapeutic	Approaches, Sexual Activity and Intimacy, Dementia: Understanding and Management, and The Influence of Aging on Occupational Performance “Evidence-Based Practice,” highlights recent research articles relevant to topics in each chapter, reinforcing the evidence-based perspective presented throughout the text. “Putting It All Together: Sample	Treatment and Documentatio n” uses evaluation, treatment, and documentatio n based on one relevant case from each diagnosis chapter to connect what students are learning in the classroom and the lab to real-world, skilled, client-centered care. “Technology & Trends” highlights new and relevant technology or treatment trends and also shows how common technologies
---	--	--

may be used in unique ways. Client examples provide context for how the conditions impact function and how to consider the person when doing an intervention. “Case Studies” based on real-life examples illustrate important learning points and feature questions to develop critical-thinking and problem-solving skills. Review questions at

the end of each chapter assess progress, knowledge, and critical thinking while offering practice with certification-style questions.

### **DOCUMENTATION FOR REHABILITATION - E-BOOK**

Elsevier Health Sciences  
This book highlights some of the most fascinating current uses, thought-provoking changes, and biggest challenges

that Big Data means for our society. The explosive growth of data and advances in Big Data analytics have created a new frontier for innovation, competition, productivity, and well-being in almost every sector of our society, as well as a source of immense economic and societal value. From the derivation of customer feedback-based insights to fraud detection and preserving privacy; better medical

treatments; agriculture and food management; and establishing low-voltage networks – many innovations for the greater good can stem from Big Data. Given the insights it provides, this book will be of interest to both researchers in the field of Big Data, and practitioners from various fields who intend to apply Big Data technologies to improve their strategic and operational

decision-making processes. **Neurologic Interventions for Physical Therapy- E-Book** Government Printing Office Better patient management starts with better documentation! Documentation for Rehabilitation: A Guide to Clinical Decision Making in Physical Therapy, 3rd Edition shows how to accurately document treatment progress and

patient outcomes. Designed for use by rehabilitation professionals, documentation guidelines are easily adaptable to different practice settings and patient populations. Realistic examples and practice exercises reinforce concepts and encourage you to apply what you've learned. Written by expert physical therapy educators Lori Quinn and James Gordon,

this book will improve your skills in both documentation and clinical reasoning. A practical framework shows how to organize and structure PT records, making it easier to document functional outcomes in many practice settings, and is based on the International Classification for Functioning, Disability, and Health (ICF) model — the one adopted by the APTA. Coverage of practice

settings includes documentation examples in acute care, rehabilitation, outpatient, home care, and nursing homes, as well as a separate chapter on documentation in pediatric settings. Guidelines to systematic documentation describe how to identify, record, measure, and evaluate treatment and therapies — especially important when insurance companies require

evidence of functional progress in order to provide reimbursement. Workbook/text book format uses examples and exercises in each chapter to reinforce your understanding of concepts. NEW Standardized Outcome Measures chapter leads to better care and patient management by helping you select the right outcome measures for use in evaluations, re-

evaluations, and discharge summaries. UPDATED content is based on data from current research, federal policies and APTA guidelines, including incorporation of new terminology from the Guide to Physical Therapist 3.0 and ICD-10 coding. EXPANDED number of case examples covers an even broader range of clinical practice areas.

## **A CASE MANAGER'S STUDY GUIDE**

Springer  
This text serves as a high-yield review of spinal cord injury medicine in a multiple choice question-based format. The content covered reflects key topics relevant to clinical practice and subspecialty certification through the American Board of Physical Medicine and Rehabilitation

(ABPMR) Spinal Cord Injury (SCI) Medicine examination. The 22 chapters are arranged topically to address the full scope of information relevant to the field of spinal cord injury medicine. Included with each question is a corresponding in-depth explanation, as well as pertinent references to supporting literature. The questions and educational explanations are written by leading

experts in the field of spinal cord injury medicine and are designed to be board-relevant in both content and style. This question bank should be of use to anyone wishing to test and expand their knowledge of spinal cord injury medicine, including therapists, medical students, residents, fellows, and attending physicians of any specialty.

**Long-Term Care in an Aging Society** F.A.

Davis Develop problem-solving strategies for individualized, effective neurologic care! Under the new leadership of Rolando Lazaro, Umphred's Neurological Rehabilitation, 7th Edition, covers the therapeutic management of people with activity limitations, participation restrictions, and quality of life issues following a neurological event. This comprehensive reference

reviews basic theory and addresses the best evidence for evaluation tools and interventions commonly used in today's clinical practice. It applies a time-tested, evidence-based approach to neurological rehabilitation that is perfect for both the classroom and the clinic. Now fully searchable with additional case studies through Student Consult, this edition includes updated

chapters and the latest advances in neuroscience. Comprehensive reference offers a thorough understanding of all aspects of neurological rehabilitation. Expert authorship and editors lend their experience and guidance for on-the-job success. UNIQUE! A section on neurological problems accompanying specific system problems includes hot topics such as poor vision, vestibular

dysfunction, dementia and problems with cognition, and aging with a disability. A problem-solving approach helps you apply your knowledge to examinations, evaluations, prognoses, and intervention strategies. Evidence-based research sets up best practices, covering topics such as the theory of neurologic rehabilitation, screening and diagnostic tests, treatments

and interventions, and the patient's psychosocial concerns. Case studies use real-world examples to promote problem-solving skills. Comprehensive coverage of neurological rehabilitation across the lifespan — from pediatrics to geriatrics. Terminology adheres to the best practices, follows The Guide to Physical Therapy Practice and the WHO-ICF World Health model. NEW!

enhanced eBook on Student Consult. UPDATED! Color photos and line drawings clearly demonstrate important concepts and clinical conditions students will encounter in	practice. NEW and EXPANDED! Additional case studies and videos illustrate how concepts apply to practice. Updated chapters incorporate the latest advances and the newest information in	neurological rehabilitation strategies. NEW and UNIQUE! New chapter on concussion has been added. Separate and expanded chapters on two important topics: Balance and Vestibular.
