Generally regarded as the most important of the Civil War campaigns conducted in the Shenandoah Valley of Virginia, that of 1864 lasted more than four months and claimed more than 25,000 casualties. The armies of Philip H. Sheridan and Jubal A. Early contended for immense stakes. Beyond the agricultural bounty and the boost in morale a victory would bring, events in

the Valley also would affect Abraham Lincoln's chances for reelection in the November 1864 presidential canvass. The eleven original essays in this volume reexamine common assumptions about the campaign, its major figures, and its significance. Taking advantage of the most recent scholarship and a wide range of primary sources, contributors examine strategy and tactics, the performances of key commanders on each side, the campaign's political repercussions, and the experiences of civilians caught in the path of the armies. The authors do not always agree with one another, yet, taken together, their essays highlight important connections between the home front and the battlefield, as well as ways in which military affairs, civilian experiences, and politics played off one another during the campaign. The British campaign in Norway in 1940 was an ignominious and abject failure. It is perhaps best known as the fiasco which directly led to the fall of Prime Minister Neville Chamberlain and his replacement by Winston Churchill. But what were the reasons for failure? Why did the decision makers, including Churchill, make such poor decisions and exercise such bad judgement? What other factors played a part? John Kiszely draws on his own experience of working at all levels in the military to assess the campaign as a whole, its context and evolution from strategic failures, intelligence blunders and German air superiority to the performance of the troops and the serious errors of judgement by those responsible for the higher direction of the war. The result helps us to understand not only the outcome of the Norwegian campaign but also why more recent military campaigns have found success so elusive.

Beginning in 1943, US Army leaders such as John M. Palmer, Walter L. Weible, George C. Marshall, and John J. McCloy mounted a sustained and vigorous campaign to establish a system of universal military training (UMT) in America. Fearful of repeating the rapid demobilization and severe budget cuts that had accompanied peace following World War I, these leaders saw UMT as the basis for their postwar plans. As a result, they promoted UMT extensively and aggressively. In *Every Citizen a Soldier: The Campaign for Universal Military Training after World War II*, William A. Taylor illustrates how army leaders failed to adapt their strategy to the political realities of the day and underscores the delicate balance in American democracy between civilian and military control of strategy. This story is vital because of the ultimate outcome of the failure of the UMT initiative: the birth of the Cold War draft.

The popular perception of the performance of British armour in the Normandy campaign of 1944 is one of failure and frustration. Despite overwhelming superiority in numbers, Montgomery's repeated efforts to employ his armour in an offensive manner ended in a disappointing stalemate. Explanation of these and other humiliating failures has centred predominantly on the shortcomings of the tanks employed by British formations. This new study by John Buckley challenges the standard view of Normandy as a failure for British armour by analysing the reality and level of the supposed failure and the causes behind it.

**Dictionary of Military Terms** Cambridge University Press  
From a master historian comes an astonishing chronicle of life in medieval Europe and the battle that altered the course of an empire. Although almost six centuries old, the Battle of Agincourt still captivates the imaginations of men and women on both sides of the Atlantic. It has been immortalized in high culture (Shakespeare's Henry V) and low (the New York Post prints Henry's battle cry on its editorial page each Memorial Day). It is the classic underdog story in the history of warfare, and generations have wondered how the English -- outnumbered by the French six to one -- could have succeeded so bravely and brilliantly. Drawing upon a wide range of sources, eminent scholar Juliet Barker casts aside the legend and shows us that the truth behind Agincourt is just as exciting, just as fascinating, and far more significant. She paints a gripping narrative of the October 1415 clash between outnumbered English archers and

heavily armored French knights. But she also takes us beyond the battlefield into palaces and common cottages to bring into vivid focus an entire medieval world in flux. Populated with chivalrous heroes, dastardly spies, and a ferocious and bold king, Agincourt is as earthshaking as its subject -- and confirms Juliet Barker's status as both a historian and a storyteller of the first rank.

Despite the great English victories at Crécy, Poitiers and Agincourt, the French eventually triumphed in the Hundred Years War. This book examines the last campaign of the war, covering the great battles at Formigny in 1450 and Castillon in 1453, both of which hold an interesting place in military history. The battle of Formigny saw French cavalry defeat English archers in a reverse of those earlier English victories, while Castillon became the first great success for gunpowder artillery in fixed positions. Finally, the book explains how the seemingly unmartial King Charles VII of France all but drove the English into the sea, succeeding where so many of his predecessors had failed.

Osprey's Campaign title for The battle of Lake Peipus, which took place in 1242 between the Teutonic Knights and the Russian city-state of Novgorod, led by its inspirational leader Alexandre Nevskii. The Teutonic Knights were a powerful military order, backed with the crusading zeal of Europe, the blessing of the Pope and the support of the Holy Roman Emperor. This battle, although little-known in the west, was important in the history of the medieval eastern crusades, the Teutonic defeat having a serious effect on future events. David Nicolle's excellent text examines the Crusade against Novgorod and the fierce fighting around the frozen shores of Lake Peipus.

The Spotsylvania Campaign marked a crucial period in the confrontation between Ulysses S. Grant and Robert E. Lee in Virginia. Waged over a two-week period in mid-May 1864, it

included some of the most savage fighting of the Civil War and left indelible marks on all involved. Approaching topics related to Spotsylvania from a variety of perspectives, the contributors to this volume explore questions regarding high command, tactics and strategy, the impact of fighting on officers and soldiers in both armies, and the ways in which some participants chose to remember and interpret the campaign. They offer insight into the decisions and behavior of Lee and of Federal army leaders, the fullest descriptions to date of the horrific fighting at the "Bloody Angle" on May 12, and a revealing look at how Grant used his memoirs to offset Lost Cause interpretations of his actions at Spotsylvania and elsewhere in the Overland Campaign. The contributors: \_William A. Blair, Grant's Second Civil War: The Battle for Historical Memory \_Peter S. Carmichael, We Respect a Good Soldier, No Matter What Flag He Fought Under: The 15th New Jersey Remembers Spotsylvania \_Gary W. Gallagher, I Have to Make the Best of What I Have: Robert E. In War Crimes, Lieutenant Colonel Robert "Buzz" Patterson

(USAF, Ret.) lays bare the Left's campaign against their own nation's armed forces—in the media, on campuses, in popular culture, in Washington, and elsewhere, revealing: ·The roots of liberal enmity toward our military ·The five liberal lies about the war on terror ·How the mainstream media, Hollywood, and academia perpetuate these myths ·How liberal politicians engage in seditious acts for political gain, and what the costs of these acts are ·How America can and must defeat the liberal assault on America's ability to defend itself against its enemies Interviews with hundreds of soldiers, sailors, and airmen—including many on the ground in Iraq—reveal the alarming degree to which their burden is increased by second-guessing, pessimism, and outright revulsion for their mission on the part of the people they are fighting for. Studded with shocking quotations and astonishing actions from members of the Left, *War Crimes* is an eye-opening indictment of the true motivations and agenda of the American Left.
