With a thirty-year run of award-winning, critically acclaimed, and commercially successful plays, from *Rosencrantz and Guildenstern Are Dead* (1967) to *The Invention of Love* (1997), Tom Stoppard is arguably the preeminent playwright in Britain today. His popularity also extends to the United States, where his plays have won three Tony awards and his screenplay for Shakespeare in Love won the 1998 Academy Award for Best Original Screenplay. John Fleming offers the first book-length assessment of Stoppard's work in nearly a decade. He takes an in-depth look at the three newest plays (*Arcadia*, *Indian Ink*, and *The Invention of Love*) and the recently revised versions of *Travesties* and *Hapgood*, as well as at four other major plays (*Rosencrantz, Jumpers, Night and Day*, and *The Real Thing*). Drawing on Stoppard's personal papers at the University of Texas Harry Ransom Humanities Research Center (HRHRC), Fleming also examines Stoppard's previously unknown play *Galileo*, as well as numerous unpublished scripts and variant texts of his published plays. Fleming also mines Stoppard's papers for a fuller, more detailed overview of the evolution of his plays. By considering Stoppard's personal views (from both his correspondence and interviews) and by examining his career from his earliest scripts and productions through his most recent, this book provides all that is essential for understanding and appreciating one of the most complex and distinctive playwrights of our time.

Stoppard's Theatre Faber & Faber

Post-war European adaptations of Hamlet are defined by ambiguities and inconsistencies. Such features are at odds with the traditional model of adaptation, which focuses on expanding and explaining the source. Inspired by Derrida's deconstruction, this book introduces a new interpretative paradigm. Central to this paradigm is the idea that an act of adaptation consists in foregrounding gaps and incoherencies in the source; it is about questioning rather than clarifying. The book explores this paradigm through seven representative European adaptations of Hamlet produced between the 1960s and the 2010s: dramatic texts, live theatre productions, and a mixed reality performance. They systematically challenge the post-Romantic idea of Hamlet as a tragedy of great passions and heroic deeds. What does this say about Hamlet's impact on post-war theatre and culture? The deconstructive analyses offered in this book show how adaptations of Hamlet capture crucial anxieties and concerns of post-war Europe, such as political disillusionment, postmodern scepticism, and feminist resistance, revealing exciting connections between European traditions.

Critical Essays on Tom Stoppard Macmillan

Tom Stoppard is widely regarded as one of the leading contemporary British playwrights, a writer who has earned an intriguing mix of both critical and commercial success. *Arcadia* is considered by many critics to be Stoppard's masterpiece, a work that weds his love for words and ideas in his early career, with his emphasis on storytelling and emotional engagement in his later career. With its engaging alteration between past and present *Arcadia* offers a comedic and entertaining exploration of chaos theory, entropy, the Second Law of thermodynamics, iterated algorithms, fractals, and other concepts culled from the realms of math and science.

New Messengers: Short Narratives in Plays by Michael Frayn, Tom Stoppard and August Wilson

How playwrights from Alfred Jarry and Samuel Beckett to Tom Stoppard and Simon McBurney brought the power of abstract mathematics to the human stage The discovery of alternate geometries, paradoxes of the infinite, incompleteness, and chaos theory revealed that, despite its reputation for certainty, mathematical truth is not immutable, perfect, or even perfectible. Beginning in the last century, a handful of adventurous playwrights took inspiration from the fractures of modern mathematics to expand their own artistic boundaries. Originating in the early avant-garde, mathematics-infused theater reached a popular apex in Tom Stoppard's 1993 play *Arcadia*. In *The Proof Stage*, mathematician Stephen Abbott explores this unlikely collaboration of theater and mathematics. He probes the impact of mathematics on such influential writers as Alfred Jarry, Samuel Beckett, Bertolt Brecht, and Stoppard, and delves into the life and mathematics of Alan Turing as they are rendered onstage. The result is an unexpected story about the mutually illuminating relationship between proofs and plays—from Euclid and Euripides to Gödel and Godot. Theater is uniquely poised to discover the soulful, human truths embedded in the austere theorems of mathematics, but this is a difficult feat. It took Stoppard twenty-five years of experimenting with the creative possibilities of mathematics before he succeeded in making fractal geometry and chaos theory integral to *Arcadia*'s emotional arc. In addition to charting Stoppard's journey, Abbott examines the post-*Arcadia* wave of ambitious works by Michael Frayn, David Auburn, Simon McBurney, Snoo Wilson, John Mighton, and others. Collectively, these gifted playwrights transform the great philosophical upheavals of mathematics into profound and sometimes poignant revelations about the human journey.

Publikace představuje specifický typ dramatické postavy, pojmenovaný „nový posel“, kterého lze

chápat jako následovníka konvenčního typu postavy známé z tradičních dramát nejčastěji jako „posel“. Přítomnost posla v tradičním dramatu má určité funkce, které plní i nový posel. Toho však odlišuje fakt, že se nejedná o samostatnou postavu, ale jeho roli v současném anglicky psaném mainstreamovém dramatu přejímá některá z hlavních postav. Mezi takové postavy patří především rozliční novináři či reportéři, politici či jejich asistenti, vědci či učitelé, detektivové či policisté, historické postavy, filozofové a literární vědci atd. Publikace v konkrétních případech analyzuje dramata dvou britských dramatiků, Michaela Frayna a Toma Stopparda, a afroamerického dramatika Augusta Wilsona.

Equivocation in the Theatre of the Absurd Continuum

Having surveyed post-war British drama in *State of the Nation*, Michael Billington now looks at the global picture. In this provocative and challenging new book, he offers his highly personal selection of the 100 greatest plays ranging from the Greeks to the present-day. But his book is no mere list. Billington justifies his choices in extended essays- and even occasional dialogues- that put the plays in context, explain their significance and trace their performance history. In the end, it's a book that poses an infinite number of questions. What makes a great play? Does the definition change with time and circumstance? Or are certain common factors visible down the ages? It's safe to say that it's a book that, in revising the accepted canon, is bound to stimulate passionate argument and debate. Everyone will have strong views on Billington's chosen hundred and will be inspired to make their own selections. But, coming from Britain's longest-serving theatre critic, these essays are the product of a lifetime spent watching and reading plays and record the adventures of a soul amongst masterpieces.

Every four or five years Britain's most prominent dramatist pulls out all the stops and writes a major stage play of his own. Between plays, Stoppard the craftsman does translations, screenplays, light entertainments, and work for hire. Delaney's book is the first to focus on the major plays. Spanning Stoppard's career from *Rosencrantz and Guildenstern are Dead* (1967) to *Hapgood* (1988), this study shows the figure which Stoppard from the first has been weaving in his theatrical tapestry. That there is development in Stoppard is clear but - as Delaney demonstrates - the development is from moral affirmation to moral application, from the assertion of moral principles to the enactment of moral practice. Such development from precept to praxis demonstrates organic growth rather than radical metamorphosis. Using Stoppard's words in a number of little-known interviews as a starting-point, Delaney shows how the major plays bear out Stoppard's contention that he 'tries to be consistent about morality'. The volume contains the most extensive bibliography and discography of Stoppard interviews (over 200 including print and broadcast sources) ever compiled.

Tom Stoppard: Faber Critical Guide

"Travesties" was born out of Stoppard's noting that in 1917 three of the twentieth century's most

crucial revolutionaries -- James Joyce, the Dadaist founder Tristan Tzara, and Lenin - were all living in Zurich. Also living in Zurich at this time was a British consular official called Henry Carr, a man acquainted with Joyce through the theater and later through a lawsuit concerning a pair of trousers. Taking Carr as his core, Stoppard spins this historical coincidence into a masterful and riotously funny play, a speculative portrait of what could have been the meeting of these profoundly influential men in a germinal Europe as seen through the lucid, lurid, faulty, and wholly riveting memory of an aging Henry Carr.
