### CASSIDY CARLSON

**Spot-the-Differences Around the World** Elsevier Health Sciences

My book is fiction cartoon stories placed on reality day to day life of two young lads with learning difficulties and their three carers from our Calendar-Diary. All together we are Perfect Difference 5. In the book you can laugh and forget real life and travel into a planet called Planet Parklands. Captain, Wheeler, Play Dough, Big Ben and Officer Andy are five different people that live on Planet Parklands. We will be very happy to see you visiting us on Planet Parklands. Talented Mark makes brilliant illustration with his sketches for the cartoons in my book "Adventures of Perfect Difference 5" and Xenia Brettell's book "Life on Planet Parklands". I write a short comedy stories about situations which are connected with our Perfect Difference 5, which would attract adult humour and I wanted people to burst out with laughter. Laughter is a great aspect of life and that's what I want people to enjoy. It does not matter if you have disabilities or problems in life everyone deserves to enjoy life and I hope my book can bring them some joy. I always wanted to make a difference in people's lives, to make our world a better happier place to live. The idea of this book is to make people happy, to smile, to laugh and accept each other as we are, with all our differences and imperfections. In 2013 I met Galina Hartshorn, who had just come back from Canada. While there she learnt about human potential and personal growth from Bob Proctor. Since then I have attended her seminars which have changed my life. I have received so much inspiration and support from Galina. She believed in me more than I believed in myself. She gave me a lot of Confidence and encouragement to start writing. She helped me to understand one thing, as Zig Zigler said: "You don't have to be great to start but you have to start to be great". We are all in our own Perfect Difference, live on the same Planet and deserve to be treated equally.

In the entire book, Master Minds: Creativity in Picasso's & Husain's Paintings, light has been thrown on Picasso's and Husain's life and paintings. There is an analytical study of their works of art. The significant aspects dealt with in their paintings are creativity viewed through linear quality, forms, colors, pictorial composition, subject matter, styles, mediums, techniques, similarities and differences in their works of art. I consider myself to be fortunate to avail the opportunity to journey through a significant part of the life and works of these two great artists. There are total 226 illustrations in Part 1 to Part 5 of the books that include a unique analytical study of the paintings and the sketches of the artists. Part 5, deals with the comparison of the works of art.

### Spontaneous Hypertension, Its Pathogenesis and Complications

Routledge  
Discussions about fundamental historical events of the past century have invaded the public domain; Public opinion and policy-makers ask framers of the public image of the past to provide guidance, reassurance, and legitimisation. Increasing social heterogeneity and cultural difference force us to revise our traditional concepts of culture and examine the public, social and pedagogical implications of multiculturalism in an explicitly comparative perspective. This book explores how history has been used to support or oppose the political orders of our century as well as its great themes, and how historians have dealt with issues of scholarly objectivity, personal beliefs, and public commitment.

Courier Dover Publications

This issue of Clinics in Perinatology will carry the reader through the perinatal period and examine pain management throughout that continuum. Beginning with the genetics of obstetrical pain and opioid use in pregnancy, the discussion moves to the provision of anesthesia to the mother and fetus during fetal surgery - an area of intense concern and interest in many centers. There is an extensive discussion of both pharmacologic and non-pharmacologic management of pain during delivery. A discussion of regional anesthetic techniques is increasingly relevant in light of increasing evidence of adverse neurodevelopmental consequences of fetal exposure to general anesthetics and sedatives. Pain, its implications and management, are extensively covered including discussions of how to assess neonatal pain and how best to provide sedation and non-pharmacologic pain management, systemic pharmacologic, or regional techniques. Of particular interest are the reviews of the potential neurodevelopmental impact of both the treatment and the failure to adequately treat pain in the newborn. This topic is receiving an enormous amount of attention from all those who care for children as well as government and the media.
