This book focuses on the accounting change processes that drive integrated reporting in the public sector. The Integrated Report is a tool that allows public sector entities to quantify and convey those aspects of their organization, strategy, governance and performance that lead to the creation of public value over time. To be successfully introduced, integrated reporting must follow a specific path of accounting change. The context in which public sector entities operate, and the unique relationship between the public sector and the environment, redefine the accounting process of change to deliver an integrated report. The authors provide a fresh look at integrated reporting on the basis of the accounting change processes that drive it, helping academics and practitioners to gain a deeper understanding of the challenges and benefits in terms of public value creation.

Every company has a personality. Does yours help or hinder your results? Does it make you fit for growth? Find out by taking the quiz that's helped 50,000 people better understand their organizations at OrgDNA.com and to learn more about Organizational DNA. Just as you can understand an individual's personality, so too can you understand a company's type—what makes it tick, what's good and bad about it. Results explains why some organizations bob and weave and roll with the punches to consistently deliver on commitments and produce great results,

while others can't leave their corner of the ring without tripping on their own shoelaces. Gary Neilson and Bruce Pasternack help you identify which of the seven company types you work for—and how to keep what's good and fix what's wrong. You'll feel the shock of recognition ("That's me, that's my company") as you find out whether your organization is:

- **Passive-Aggressive** ("everyone agrees, smiles, and nods, but nothing changes"): entrenched underground resistance makes getting anything done like trying to nail Jell-O to the wall
- **Fits-and-Starts** ("let 1,000 flowers bloom"): filled with smart people pulling in different directions
- **Outgrown** ("the good old days meet a brave new world"): reacts slowly to market developments, since it's too hard to run new ideas up the flagpole
- **Overmanaged** ("we're from corporate and we're here to help"): more reporting than working, as managers check on their subordinates' work so they can in turn report to their bosses
- **Just-in-Time** ("succeeding, but by the skin of our teeth"): can turn on a dime and create real breakthroughs but also tends to burn out its best and brightest
- **Military Precision** ("flying in formation"): executes brilliant strategies but usually does not deal well with events not in the playbook
- **Resilient** ("as good as it gets"): flexible, forward-looking, and fun; bounces back when it hits a bump in the road and never, ever rests on its laurels

For anyone who's ever said, "Wow, that's a great idea, but it'll never happen here" or "Whew, we pulled it off again, but I'm tired of all this sprinting," Results provides robust, practical ideas for becoming and remaining a resilient business. Also available as an eBook From the Hardcover edition.

Two world-renowned strategists detail the seven leadership imperatives for transforming companies for success in the digital era. Yes, the world is chaotic, and no one knows the details of where we're headed. But leaders must not let themselves be held hostage by fear. More than ever, you need to take charge and write your vision for your company's future. This book is your guide. For companies to succeed in the digital age, executives must reimagine their businesses before they reimagine being digital. They must courageously shed the past to rethink their place in the world and how they compete and collaborate with others to create value. Companies need to undergo a fundamental transformation, building a new type of competitive advantage—one that is fueled by scale in their differentiating capabilities. They must focus on the few capabilities that power their value proposition. And they must be measurably better than their competitors. In their new book, Paul Leinwand and Mahadeva Matt Mani, both members of the PwC US partnership and its Strategy& global team, help leaders navigate these profound and historic shifts and provide a road map for reshaping their companies. Building on a major new body of research, along with case studies of companies on the vanguard of this major shift, the authors identify the seven imperatives that leaders must follow as the digital age continues to evolve: Reimagine your company's place in the world Build privileged insights into your customers Create value through ecosystems Break up the traditional organization Reposition your leadership team Reinvent the social contract with your people Disrupt your own leadership approach Together, these seven imperatives comprise a playbook for designing and executing the transformations that are required for companies to succeed in the digital age.

In the United Kingdom, adjudication is available as a right for parties to a construction contract, following the enactment of the Housing Grants Construction and Regeneration Act 1996. In general, within a comparatively short period of time, parties in dispute will have a decision from an adjudicator, which, except in limited circumstances, the courts will enforce. Adjudication has become the number one method of dispute resolution in the construction industry. The short timescale means that a party needs to know what to do, when to do it and be able to check that the other party and the adjudicator are following the right steps. A Practical Guide to Construction Adjudication gives parties the necessary information to achieve this. It provides a straightforward overview of the process and procedure of adjudication by reference to legislation and case law, augmented with practical guidance including suggestions on what to do or not to do, drafting tips and checklists. Separate chapters for Scotland and Northern Ireland identify and explain the differences in procedure and judicial interpretation between those jurisdictions and England and Wales, and further detailed explanations of the adjudication regimes in Australia, Ireland, Malaysia, New Zealand and Singapore are included. Each of the chapters on jurisdictions outside England and Wales has been

written by senior experts in those jurisdictions to ensure the content is accurate and insightful. There are a range of helpful appendices including a bank of model form adjudication documents and tabulated detailed comparisons of the Scheme for Construction Contracts, the other major adjudication rules, the major adjudicator nominating bodies and the UK and international regimes. Readers will particularly appreciate the most comprehensive index of adjudication cases available, sorted into 260 subject headings providing immediate access to all the reported cases on any adjudication topic.

UK companies are governed by legal and other regulatory requirements impacting elements of financial statements that are common to users of both International Financial Reporting Standards (IFRS) and UK GAAP. These are often referred to as the 'front half' of the financial statements. This publication contains the guidance applicable to all UK companies regardless of the GAAP under which their financial statements are prepared. Key updates from the previous edition (Manual of Accounting: Management Reports and Governance 2011) include updated chapters on business review and corporate governance, with many more illustrations and examples. Written by PwC's UK Assurance Risk and Quality team, the manual includes practical advice based on PwC's work advising clients, partners, and staff. The book will be of particular interest to finance directors, accountants, legal practitioners, company administrators, financial advisors, and auditors.

“When it comes to growing revenues, not all dollars are equal.” In company after company that Sanjay Khosla and Mohanbir Sawhney worked for or researched, they saw businesses taking on more products, more markets, more people, more acquisitions—adding more of everything except what really mattered: sustainable and profitable growth. And in many of these companies — large or small, from America to Europe to Asia — every quarter became a mad dash to find yet another short-term revenue boost. There had to be a better way — an alternative to the scramble for mindless expansion. The answer lies in *Fewer, Bigger, Bolder*, a market-proven, step-by-step program to achieve sustained growth with rising profits and lower costs. The authors prove that given the right incentives, managers using this program can produce astonishing results in amazingly short time frames. That’s exactly what Khosla accomplished as President of Kraft’s developing markets, which enjoyed eye-popping revenue growth from \$5 billion to \$16 billion in just six years, while profitability increased 50%. Sawhney, a professor at Northwestern’s Kellogg School of Management, discovered a similar formula for stellar results when advising a portfolio of businesses, from Fortune 500 giants to technology start-ups. No matter how big the company or how difficult the economic environment, managers who use this seven-step program (“Focus7”) will learn how to make fewer but bigger bets and to create a virtuous cycle of growth. *Fewer, Bigger, Bolder* crosses the usual boundaries of strategy, execution, people and organization. Its framework shows how you can drive growth by targeting resources against priorities, simplifying your operations, and unleashing the potential of your people. By challenging the conventional wisdom about growth, *Fewer, Bigger, Bolder* is likely to ignite a vigorous debate throughout the business community. It’s a game-changing book that couldn’t be more timely. Or more needed.

How to close the gap between strategy and execution Two-thirds of executives say their organizations don’t have the capabilities to support their strategy. In *Strategy That Works*, Paul Leinwand and Cesare Mainardi explain why. They identify conventional business practices that unintentionally create a gap between strategy and execution. And they show how some of the best companies in the world consistently leap ahead of their competitors. Based on new research, the authors reveal five practices for connecting strategy and execution used by highly successful enterprises such as IKEA, Natura, Danaher, Haier, and Lego. These companies:

- Commit to what they do best instead of chasing multiple opportunities
- Build their own unique winning capabilities instead of copying others
- Put their culture to work instead of struggling to change it
- Invest where it matters instead of going lean across the board
- Shape the future instead of reacting to it

Packed with tools you can use for building these five practices into your organization and supported by in-depth profiles of companies that are known for making their strategy work, this is your guide for reconnecting strategy to execution.

Since Benjamin Graham fathered value investing in the 1930s, the method of analysis has spawned a large number of highly

successful investors, such as Graham's own former student and employee, Warren Buffett, who is regarded as one of the most successful investors of modern times. Over the years, numerous books have been published on Benjamin Graham's approach. Most of these books present different interpretations of value investing and are generally introductory based. Until now, there has not been an advanced hands-on guide for investors and executives who may want to apply the powerful value investing discipline outside of stocks and bonds. Applied Value Investing takes the same time-proven approach Graham introduced with David Dodd in their 1934 masterpiece, *Security Analysis*, and extends it in a variety of unique and practical ways—including mergers and acquisitions, alternative investments, and financial strategy. This in-depth guide shows financially sophisticated readers how to use value investing in a macroinvesting framework and how to apply it to the emerging area of super catastrophe valuation. It illustrates how to put value investing to use with case studies on: Eddie Lampert's acquisition of Sears Warren Buffett's acquisitions of GEICO and General Reinsurance Corporation The recent "new economy" boom and bust, and its aftermath The underwriting of the Pepsi Play for a Billion sweepstakes Applied Value Investing also demonstrates how to incorporate the cornerstones of valuation into an integrated business framework that can be used to assess and manage a franchise (or a firm operating with a sustainable competitive advantage). In addition to its cutting-edge applications of value investing principles, Applied Value Investing sets itself apart by drawing on material published in leading academic journals to form the foundation of its presentation. However, value investing is inherently practical, and this comprehensive resource provides helpful guidance for successfully implementing value investing strategies in the real world. To profit like the masters you have to think like them. Applied Value Investing can open new doors to value creating opportunities.

How smart companies are opening up strategic initiatives to involve front-line employees, experts, suppliers, customers, entrepreneurs, and even competitors. Why are some of the world's most successful companies able to stay ahead of disruption, adopting and implementing innovative strategies, while others struggle? It's not because they hire a new CEO or expensive consultants but rather because these pioneering companies have adopted a new way of strategizing. Instead of keeping strategic deliberations within the C-Suite, they open up strategic initiatives to a diverse group of stakeholders—front-line employees, experts, suppliers, customers, entrepreneurs, and even competitors. Open Strategy presents a new philosophy, key tools, step-by-step advice, and fascinating case studies—from companies that range from Barclays to Adidas—to guide business leaders in this groundbreaking approach to strategy. The authors—business-strategy experts from both academia and management consulting—introduce tools for each of the three stages of strategy-making: idea generation, plan formulation, and implementation. These are digital tools (including strategy contests), which allow the widest participation; hybrid digital/in-person tools (including a "nightmare competitor challenge"); a workshop tool that gamifies the business model development process; and tools that help companies implement and sustain open strategy efforts. Open strategy has an astonishing track record: a survey of 200 business leaders shows that although open-strategy techniques were deployed for only 30 percent of their initiatives, those same initiatives generated 50 percent of their revenues and profits. This book offers a roadmap for this kind of success.
