Bruce Barker, one of the country's leading authorities on building codes, has turned his eye toward one of his favorite subjects: building decks.

Although it's one of the most popular DIY building projects, just about every deck built in the past decade (by pros as well as homeowners) falls short of current codes. In **BLACK+DECKER Deck Codes &**

Standards Barker zeroes in on the main areas of concern and shows accurately and precisely how to design and build it right. Given that every year in the U.S. more than 120,000 people are injured by deck collapses, and more than 50 die, following Barker's careful and detailed advice is the surest way for a homeowner to protect against disaster.
