NEW REVELATIONS OF THE AMERICAS BEFORE COLUMBUS

Simon and Schuster
The Flowers of Evil (1857) is a collection of poems by Charles Baudelaire. Translated into English by Cyril Scott in 1909, Baudelaire's poems remain lively and idiosyncratic nearly two centuries after they came into existence. Comprised mostly of sonnets and short lyrics, The Flowers of Evil captures Baudelaire's sense

of the changing role of the poet in modern life. Rather than focus on beauty and other ideals, Baudelaire explores the totality of human experience—the good, bad, and ugly of life on earth. “When by the changeless Power of a Supreme Decree / The poet issues forth upon this sorry sphere, / His mother, horrified, and full of blasphemy, / Uplifts her voice to God, who takes compassion on her.” In his opening benediction, Baudelaire reverses the typical trope of invoking the muses or celebrating poetry as a divine gift. Instead, he depicts the poet as a being cursed, a “hideous Child of Doom.” Childhood for Baudelaire is a subject of particular interest, a time described, in his poem

“The Enemy,” as “a ravaging storm, / Enlivened at times by a brilliant sun...” The youthful experience of melancholy clearly informs the poet's outlook as an adult: “Time devours our lives, / And the enemy black, which consumeth our hearts / On the blood of our bodies, increases and thrives!” While much of Baudelaire's work deals with darkness and despair, his poems can rise to the heights of celebration and ecstasy, his voice soft and sweet as he invites his sister on a journey to an imagined land of “order and loveliness, / Luxury, calm and voluptuousness.” Ultimately, Baudelaire's vision—however irreverent—is guided by truth and morality, which drive him on a

torturous path from good to evil, beauty to death, and back. With a beautifully designed cover and professionally typeset manuscript, this edition of *The Flowers of Evil* is a classic of French literature reimagined for modern readers.

The Greedy Panda Cookbook Modern Library

A literary sensation and runaway bestseller, this brilliant debut novel tells with seamless authenticity and exquisite lyricism the true confessions of one of Japan's most celebrated geisha. Nominated as one of America's best-loved novels by PBS's The Great American Read Speaking to us with the wisdom of age and in a voice at once haunting and startlingly immediate, Nitta Sayuri tells the story of her life as a geisha. It begins in a poor fishing village in 1929, when, as a nine-year-old girl with unusual blue-gray eyes, she is taken from her home and sold into slavery to a renowned geisha house. We witness her transformation as she learns the rigorous arts of the geisha: dance and music; wearing kimono, elaborate makeup, and hair; pouring sake to reveal just a touch of inner wrist; competing with a jealous rival for men's solicitude and the money that goes with it. In *Memoirs of a Geisha*, we enter a world where appearances are paramount; where a girl's

virginity is auctioned to the highest bidder; where women are trained to beguile the most powerful men; and where love is scorned as illusion. It is a unique and triumphant work of fiction—at once romantic, erotic, suspenseful—and completely unforgettable.

Now a global bestseller, the remarkable life of Rigoberta Menchú, a Guatemalan peasant woman, reflects on the experiences common to many Indian communities in Latin America. Menchú suffered gross injustice and hardship in her early life: her brother, father and mother were murdered by the Guatemalan military. She learned Spanish and turned to catechistic work as an expression of political revolt as well as religious commitment. Menchú vividly conveys the traditional beliefs of her community and her personal response to feminist and socialist ideas. Above all, these pages are illuminated by the enduring courage and passionate sense of justice of an extraordinary woman.

Digestive Intelligence tells the fascinating story of how our digestive systems are the centre of our bodies' second brain and how we think and live our emotions via our stomachs. Not surprising when you consider there is something equivalent to the size of a village football pitch hiding inside our bellies--that's the incredible magnitude of our digestive systems. Dr

Matveikova answers the obvious questions: "How?" and "Why can this be so?" by explaining, in straight forward layman's language, that the digestive system contains more than one million neurones, identical to those in the brain and is responsible for producing 90% of the body's hormone, serotonin, the all-important hormone which makes us feel happy and full of wellbeing. It follows that, if our stomach is "out of sorts" we feel irritable and lacking in energy; and those feelings block our intellectual productivity, disorientate us and completely change our thought patterns and physical processes.
