Im Rahmen der Arbeit wird eine Methode zur Klassifizierung von Unfallszenarien entwickelt, wobei es sich bei den Unfällen um Pfahlkollisionen handelt. Die Klassifizierung eines Unfallszenarios erfolgt durch die Abschätzung der bevorstehenden Fahrzeuggeschwindigkeitsänderungen in Fahrzeugl

ngs- und Fahrzeugquerrichtung sowie der Positionsabschätzung des Pfahls. Zudem ist eine genaue Abschätzung der genannten Unfallparameter bereits 10 ms nach dem Pfahlaufprall möglich. Für eine genaue Abschätzung der Unfallparameter werden Beschleunigungs- und Gierratensignale des Fahrzeugs benützt, die mithilfe von FE-Gesamtfahrzeugsimulationen gewonnen werden. Sowohl die Beschleunigungs- als auch die Gierratensignale erfahren im Anschluss eine Wavelettransformation. Zudem wird der Betrag der Wavelettransformierten im Zeit- und im Frequenzbereich diskretisiert. Dies ist notwendig, um wesentliche Informationen in einer geeigneten Form aus den Signalen ziehen zu können, damit diese als Eingangsparameter für künstliche neuronale Netze nutzbar sind. Mithilfe der künstlichen neuronalen Netze erfolgt die Abschätzung der wesentlichen bereits oben genannten Unfallparameter. Zudem können diese Unfallparameter nach einem erfolgreichen Training eines künstlichen

neuronalen Netzes auch für unbekannte Unfallszenarien bestimmt werden, wobei die oberen Grenzen der Trainingsmenge einzuhalten sind. Aufgrund der frühzeitigen Unfallparameterabschätzungen ist eine Anpassung der Auslösalgorithmen der Rückhaltesysteme möglich. Der bedarfsgerechte Einsatz von Rückhaltesystemen in einem Unfallszenario könnte dadurch zu einer erheblichen Verringerung der Verletzungsschwere führen. Die Untersuchungen in dieser Arbeit beziehen sich ausschließlich auf Kollisionen mit einem Pfahlhindernis, welches sich frontal vor dem Fahrzeug befindet. Die erzielten Ergebnisse sind insbesondere bei der Abschätzung der Aufprallgeschwindigkeit in Fahrzeugschichtungsrichtung und der Pfahlpositionen sehr genau. Zudem besitzt die Methode *Auto e fisco*. Con CD-ROM Emereo Publishing Today, some suppliers have grown increasingly powerful and in certain cases, earn revenues that rival or even exceed that of their automaker clients. In the pre-globalisation period, automakers wielded absolute power

over their significantly smaller suppliers. This book reveals the upending of this relationship, with the gradual shift in the balance of power from automakers to their suppliers in this era of globalisation. The book examines how suppliers in the global tyres, seats, constant velocity joints (hereafter 'CVJs'), braking systems and automotive semiconductor industries have evolved into powerful oligopolies through a mix of acquisition and organic growth strategies. It also highlights how joint ventures could be strategically deployed as springboards to acquisition, as they enable firms to familiarise themselves with their partners' markets and operations. Moreover, the book analyses the disruption stirred by the entry of well-resourced technology titans into this industry and their inevitable clash with the traditional incumbents. This book is an invaluable reference for anyone interested in learning more about the automakers' and now their suppliers' relentless quest to create market-dominating intelligent driving systems.

 Statistics Through Applications (STA) is the only text written specifically for high school statistics course. Designed to be read, the book takes a data analysis approach that emphasizes conceptual understanding over computation, while recognizing that some computation is necessary. The focus is on the statistical thinking behind data gathering and interpretation. The high school statistics course is often the first applied math course students take. STA engages students in learning how statisticians contribute to our understanding of the world and helps students to become more discerning consumers of the statistics they encounter in ads, economic reports, political campaigns, and elsewhere. New and improved! STA 2e features expanded coverage of probability, a reorganized presentation of data analysis, a new

color design and much more. Please see the posted sample chapter or request a copy today to see for yourself.
