## **REGINA OSBORNE**

---

*Elements of Causal Inference* Schott & Company Limited

Written during the second half of the 12th century, the *Historia Norwegie* presents a lively and Christianised account of Norwegian history, particularly of the 10th century.

## **REVUE DES ÉTUDES ANCIENNES**

Ecrits sur le jazz

" Il était amoureux du jazz, ne vivait que pour le jazz, n'entendait, ne s'exprimait qu'en jazz... " Ainsi Henri Salvador évoque-t-il son ami Boris Vian. Dans ce recueil de plus de trois cents chroniques, parues

dans *Jazz Hot*, *Combat*, *Art*, *Jazz News*, l'auteur de *L'Écume des jours* témoigne de cette passion née dès l'adolescence, alors qu'il allait applaudir Benny Carter ou Duke Ellington, et qui le conduisit à devenir lui-même trompettiste dans l'orchestre de Claude Abadie, puis au " *Tabou* ". Il explore au fil de ces écrits tous les univers du jazz, inconditionnel des grands classiques en même temps qu'attentif à l'innovation, pourfendant plagiaires ou suiveurs avec une verve inégalable. Aucune dimension ne lui est étrangère : technique musicale, coulisses du spectacle et de la production, signification d'une musique qui, après avoir été l'expression majeure des Noirs américains, porte les aspirations et la révolte de la jeunesse française. En même temps qu'une clef essentielle de sa personnalité et de son

oeuvre, ce livre demeure une somme irremplaçable pour tous les amateurs de jazz.

## **SAXOPHONE SOLOISTS AND THEIR MUSIC, 1844-1985**

MIT Press

A concise and self-contained introduction to causal inference, increasingly important in data science and machine learning. The mathematization of causality is a relatively recent development, and has become increasingly important in data science and machine learning. This book offers a self-contained and concise introduction to causal models and how to learn them from data. After explaining the need for causal models and discussing some of the principles underlying causal inference, the book teaches readers how to use causal

models: how to compute intervention distributions, how to infer causal models from observational and interventional data, and how causal ideas could be exploited for classical machine learning problems. All of these topics are discussed first in terms of two variables and then in the more general multivariate case. The bivariate case turns out to be a particularly hard problem for causal learning because there are no conditional independences as used by classical methods for solving multivariate cases. The authors consider analyzing statistical asymmetries between cause and effect to be highly instructive, and they report on their decade of intensive research into this problem. The book is accessible to readers with a background in machine learning or statistics, and can be used in graduate courses or as a reference for researchers. The text includes code snippets that can be copied and pasted, exercises, and an appendix with a summary of the most important technical concepts.

*Revue internationale de criminologie et de police technique* Le Livre de Poche

A collection of essays originally printed as introductions to the orchestral scores

published by Ernst Eulenburg Ltd., London.

**Le Figaro Magazine** Leuven University Press

Gilt decorated blue cloth. Fine. A superb copy of an exhaustive reference to the world of saxophone performance. Includes biographies, bibliographies, discographies, etc. An excellent and essential saxophone reference. The only book of it's kind among the few published titles dealing with the saxophone.

### REVUE GÉNÉRALE DES SCIENCES PURES ET APPLIQUÉES

Rubbettino Editore

Aristotle's zoological writings with their wealth of detailed investigations on diverse species of animals have fascinated medieval and Renaissance culture. This volume explores how these texts have been read in various traditions (Arabic, Hebrew, Latin), and how they have been incorporated in different genres (in philosophical and scientific treatises, in florilegia and encyclopedias, in theological symbolism, in moral allegories, and in manuscript illustrations). This multidisciplinary and multilinguistic approach highlights substantial aspects of

Aristotle's animals.

Magic is something unauthorised, an alternative perhaps, even a deliberate cultivation of dark, evil powers. But for the Anglo-Saxon age, the neat division between mainstream and occult, rational and superstitious, Christian and pagan is not always easy to discern. To maintain its authority, the church drew a formal line and outlawed a number of dubious practices, such as divination, spells, and folk healing while at the same time conducting very similar rituals itself. It would seem that there was a convergence of the two cultures, native and Christian and this may effect the tendency to view pagan gods as near omnipotent beings. *Action auto moto* Lincoln : University of Nebraska Press
