ARCHAEOLOGICAL THEORY AN INTRODUCTION 2ND

Archaeological Theory An Introduction 2nd Archaeology or archeology is the study of human activity through the recovery and analysis of material culture. Archaeology is often considered a branch of socio-cultural anthropology, but archaeologists also draw from biological, geological, and environmental systems through their study of the past. Archaeology - Wikipedia An artifact, or artefact (see American and British English spelling differences), is a general term for an item made or given shape by humans, such as a tool or a work of art, especially an object of archaeological interest. In archaeology, the word has become a term of particular nuance and is defined as an object recovered by archaeological endeavor, which may be a cultural artifact having ...Artifact (archaeology) - Wikipedia The scientific method is an empirical method of acquiring knowledge that

has characterized the development of science since at least the 17th century. It involves careful observation, applying rigorous skepticism about what is observed, given that cognitive assumptions can distort how one interprets the observation. It involves formulating hypotheses, via induction, based on such observations ... Scientific method - Wikipedia Furthermore, the introduction of European literary styles to Japan sparked a boom in new works of prose fiction. Characteristic authors of the period included Futabatei Shimei and Mori Ōgai , [179] although the most famous of the Meiji era writers was Natsume Sōseki , [180] who wrote satirical, autobiographical, and psychological novels [181 ... History of Japan - Wikipedia Ecological anthropology focuses upon the complex relations between people and their environment. Human populations have ongoing contact with and impact upon the land, climate, plant, and animal species in their vicinities, and these elements of their environment have reciprocal impacts on humans (Salzman and Attwood 1996:169). Ecological anthropology investigates the ways that a population ... Ecological Anthropology - Anthropology Evolutionary Psychology. In its broad sense, the term "evolutionary psychology" stands for any attempt to adopt an evolutionary perspective on human behavior by supplementing psychology with the central tenets of evolutionary biology.
