The field of Second Language Teacher Education (SLTE) is mainly concerned with the professional preparation of L2 teachers. In order to improve teaching in the multilingual and multicultural classroom of the 21st century, both pre- and in-service L2 teachers as well as L2 teacher educators must be prepared to meet the new challenges of education under the current circumstances, expanding their roles and responsibilities so as to face the new complex realities of

language instruction. This volume explores a number of key dimensions of EFL teacher education. The sixteen chapters discuss a wide variety of issues related to second language pedagogy and SLTE. Topics discussed include the importance of SLA research; competency-based teacher education approach; classroom-based action research; SLTE models; the value and role of practicum experience abroad; the models of pronunciation teaching; multicultural awareness and competence; the influence of teachers' cognitions, emotions and attitudes on their emerging and changing professional identities; the potential of classroom materials and technology; and CLIL and ESP teacher education. English as a foreign language teacher education: Current perspectives and challenges will be of interest to teachers-in-training, teachers, teacher educators and to those educational researchers interested in how L2 teaching is actually learned in professional preparation programmes. Juan de Dios Martínez Agudo is Associate Professor of EFL Teacher Education at the University of Extremadura, Spain. His current research interests include Second Language

Acquisition and English Teaching Methodology. His most recent books are Oral Communication in the EFL Classroom (2008), Errors in the Second Language Classroom: Corrective Feedback (2010) and Teaching and Learning English through Bilingual Education (2012).

ENGLISH AS A FOREIGN LANGUAGE TEACHER EDUCATION

John Wiley & Sons

Providing a series of chapters, written by teacher educators in three continents, this edited volume explores the concepts, challenges, possibilities, and implementations of competency-based instruction for developing English competencies in English as a foreign language (EFL) contexts. Recent trends in education have emphasized the need to develop competencies that connect learning with real-life performances. This need has brought about a massive increase in the number of studies and scholarly works devoted to research into competency-based education. However, for teachers and learners of EFL, it is challenging to develop competencies for using a language that does not seem to connect with their real-life scenarios. The chapters apply the concept of competency-based instruction in different EFL contexts and are structured around three themes: Theory: current thoughts on theories of competency-based education Research: empirical research on

competency-based teacher education Practice: integrating competency-based instruction into teacher education This book offers examples of competency-based EFL teacher education through both research and practical applications. In addition to the innovation in competency approaches, the inclusion of language learning in virtual environments offers a valuable resource for scholars, educators, researchers, and all those concerned with current and future education.
