The Art of Being Human

Simon and Schuster
 A Story of Big Tech Censorship and Bias and the Fight to Save Our Country The madness of Google's attempt to mold our reality into a version dictated by their corporate values has never been portrayed better than in this chilling account by Google whistleblower, Zach Vorhies. As a senior engineer at Google, Zach watched in horror from the inside as the 2016 election of Donald Trump drove Google into a frenzy of censorship and political manipulation. The American ideal of an honest, hard-fought battle of ideas—when

the contest is over, shaking hands and working together to solve problems—was replaced by a different, darker ethic alien to this country's history as wave after wave of censorship destroyed free speech and entire market sectors. Working with New York Times bestselling author Kent Heckenlively (*Plague of Corruption*), Zach and Heckenlively weave a tale of a tech industry once beloved by its central figure for its innovation and original thinking, turned into a terrifying “woke-church” of censorship and political intolerance. For Zach, an intuitive counter-thinker, brought up on the dystopian futures of George Orwell, Aldous Huxley, and Ray Bradbury, it was clear

that Google was attempting nothing less than a seamless rewriting of the operating code of reality in which many would not be allowed to participate. Using Google's own internal search engine, Zach discovered their real "AI-Censorship" system called "Machine Learning Fairness," which he claims is a merging of critical race theory and AI that was secretly released on their users of search, news and YouTube. He collected and released 950 pages of these documents to the Department of Justice and to the public in the summer of 2019 through Project Veritas with James O'Keefe, which quickly became their most popular whistleblower story, which started a trend

of big whistleblowing. From Google re-writing their news algorithms to target Trump to using human tragedy emergencies to inject permanent blacklists, Zach and Kent provide a "you are there" perspective on how Google turned to the dark side to seize power. They finish by laying out a solution to fight censorship. Read this book if you care to know how Google tries to manipulate, censor, and downrank the voice of its users.

SHADOWS HAVE OFFENDED

Simon and Schuster
In bleak midwinter, the people of Shipcott are shocked by the murder of an elderly woman in her bed. As snow cuts off the village, local policeman Jonas Holly is torn between

catching a brutal killer and protecting his vulnerable wife, Lucy. When the inquiry is commandeered by an abrasive senior detective, Jonas finds himself derided by his colleagues and ashamed to admit to Lucy that he's been sidelined. It seems his first murder investigation may be over before it's begun. But when he receives a series of increasingly sinister anonymous notes, Jonas is thrust back into the center of the case. Someone in the village is taunting him, blaming him for the tragedy. Someone thinks he's not doing his job; someone seems to know every move he makes. And soon Jonas has to ask: Who's hunting who?

 Anthropology is the study of all humans in all times in all places. But it is so much more than that.
 "Anthropology requires strength, valor, and courage," Nancy Scheper-Hughes noted.
 "Pierre Bourdieu called anthropology a combat

sport, an extreme sport as well as a tough and rigorous discipline. ... It teaches students not to be afraid of getting one's hands dirty, to get down in the dirt, and to commit yourself, body and mind. Susan Sontag called anthropology a "heroic" profession." What is the payoff for this heroic journey? You will find ideas that can carry you across rivers of doubt and over mountains of fear to find the the light and life of places forgotten. Real anthropology cannot be contained in a book. You have to go out and feel the world's jagged edges, wipe its dust from your brow, and at times, leave your blood in its soil. In this unique book, Dr. Michael Wesch shares many of his own adventures of being an

anthropologist and what the science of human beings can tell us about the art of being human. This special first draft edition is a loose framework for more and more complete future chapters and writings. It serves as a companion to anth101.com, a free and open resource for instructors of cultural anthropology. This 2018 text is a revision of the "first draft edition" from 2017 and includes 7 new chapters.
