### **INTERMEDIATE ACCOUNTING**

Financial Times/Prentice Hall  
This textbook, originally by D. Annand and H. Dauderis, was intended for a first course in introductory financial accounting. It focuses on core introductory financial accounting topics that match pre-requisite requirements for students advancing to Intermediate

Financial Accounting. A corporate approach is utilized versus beginning with a sole proprietorship emphasis and then converting to a corporate approach; this consistency throughout the book reduces confusion for the introductory student. This most recent revision by D. Marchand converted the text from IFRS to reflect the Generally Accepted Accounting Principles of the United States (U.S. GAAP).

Principles of Management John Wiley & Sons

The recent relaunch of the European Commission's Common Consolidated Corporate Tax Base (CCCTB) project promises a sorely needed leap forward in the harmonization of the rules by which companies calculate their taxable profits. In particular, the initiative hopes to remedy the severe barrier to cross-border business caused by the 'the accounting Tower of Babel' by which companies' tax bases are determined under national law. This thorough analysis and commentary covers the influence of accounting rules on tax,

considering both generally accepted standards – international accounting standards (IAS) and international financial reporting standards (IFRS) – and EU Directive 2013/34. Three introductory chapters usher in detailed comparative overviews of the effect of these rules on taxation in nine EU Member States as well as in two other major EU trading partners, the United States and Brazil. Fully explaining the remarkable recent improvement in the comparability of accounts that represent favourable preconditions for creating a single market for financial services within the EU, this book covers every relevant detail, including the following and much more: – criterion of evaluation of alternative fixed assets based on revaluated amounts; – criterion based on

fair value; – provisions applicable to income statements, notes, reports, and financial statements; – rules applicable to the publication of documents; – transparency in payments to governments; – dispositions on exemptions; – hierarchy of general provisions and principles; – balance sheet and profit and loss account; – simplifications for small and medium-sized enterprises (SMEs); – system of creditors' protection; and – protection of investors' interests. This book is a peerless explication of the taxation choices granted to Member States under IAS/IFRS and EU Directive 2013/34 and how they will be affected by ongoing Commission initiatives. Because relevant, timely, reliable, and comparable information assumes a

leading role in protecting the interests of investors, creditors, and other stakeholders, as well as in ensuring that all operators act on a level playing field under equal conditions, the analysis presented here is of immeasurable value to lawyers, business persons, and officials concerned with taxation, not only in Europe but anywhere within the reach of international trade.

Principles of Management is designed to

meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well as behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters.
