Delhi Press Magazines NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. "A brilliant and thoroughly modern guide to learning new languages."—Gary Marcus, cognitive psychologist and author of the New York Times bestseller Guitar Zero At thirty

years old, Gabriel Wyner speaks six languages fluently. He didn't learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he's discovered. Starting with pronunciation, you'll learn how to rewire your ears and turn foreign sounds into familiar sounds. You'll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the

spare minutes of your day.

**The New Physics** Causey Enterprises, LLC

A volume of selected original papers on the synthesis of the two fundamental forces of nature. It is intended to provide graduate students and physicists in the field with an easy access to the original literature.

**Data Driven** Motorbooks International "Marketing to Moviegoers" is the essential guide to film marketing. Although there are many resources available about how to make a film, there are few about how to get your film seen once it's made and none that reveal the closely-guarded marketing secrets of the major motion picture studios. The author goes right to the source and provides data, quotes, and insights from high profile industry professionals and information on market research that the major studios don't want the moviegoing public to know. This book will be indispensable for film marketing executives, consumer product marketers, students, and people new to the filmmaking field. It provides practical data, such as templates for advertising campaigns of different sizes, solutions, and an insight into the complicated movie marketing process. Armed with the strategies that Hollywood professionals would prefer not to share, film professionals and marketing professionals alike will have a leg up in this complicated business.

**(9th Edition)** Springer

This book is a "scientific" introduction to management consulting that covers elementary and more advanced concepts, such as strategy and client-relationship. It discusses the emerging role of information technologies in consulting activities and introduces the essential tools in data science, assuming no technical background. Drawing on extensive literature reviews with more than 200 peer reviewed articles, reports, books and surveys referenced, this book has at least four objectives: to be scientific, modern, complete and concise. An interactive version of some sections (industry snapshots, method toolbox) is freely accessible at [econsultingdata.com](http://econsultingdata.com).

**An Introduction to Management Consulting in the 21st Century**

Cambridge University Press

This proceedings volume gathers outstanding papers submitted to the 2016 SAE-China Congress, the majority of which are from China, the biggest car maker as well as most dynamic car market in the world. The book includes insights into the current challenges that the whole industry is currently facing, and it offers possible

solutions to problems such as emission controls, environmental pollution, the energy shortage, traffic congestion and sustainable development. It also presents the latest technical achievements in the automotive industry. Many of the approaches it presents can help technicians to solve the practical problems that most affect their daily work.

**LEMON-AID NEW AND USED CARS AND TRUCKS 2007-2018**

SAGE Publications

Manufacturing a product is not difficult, the difficulty consists in manufacturing a product of high quality, at a low cost and rapidly. Drastic technological advances are changing global markets very rapidly. In such conditions the ability to compete successfully must be based on innovative ideas and new products which has to be of high quality yet low in price. One way to achieve these objectives would be through massive investments in research of computer based technology and by applying the approaches presented in this book. The First International Conference on Advanced Manufacturing Systems and Technology AMST87 was held in Opatija (Croatia) in October 1987. The Second International Conference on Advanced Manufacturing Systems and Technology AMSV90 was held in Trento (Italy) in June 1990. The Third, Fourth, Fifth and Sixth Conferences on Advanced Manufacturing Systems and Technology were all held in Udine (Italy) as follows: AMST93 in April 1993, AMST96 in September 1996, AMST99 in June 1999 and AMST02 in June 2002.

**WALNECK'S CLASSIC CYCLE TRADER, APRIL 2007**

Dundurn

The car - once everybody's dream and a key status symbol in most countries and cultures - has been extensively questioned in the last decades and in the last few years particularly. Urbanisation, traffic congestion, pollution problems, heavy reliance on scarce oil supplies, safety issues and ever-growing competition, have all provided significant business challenges for the automotive industry. Many car manufacturers have had to fundamentally rethink their design, brand and marketing strategies to thrive in a savvy, consumer-led culture, and markets that are becoming increasingly restrictive in size and opportunity. Auto Brand provides a roadmap to branding and marketing success in the automotive industry from a leading industry expert and features:

- Case studies on major car brands personally conducted by the author including: Audi, BMW, Holden, Mercedes-Benz, Opel, Porsche, Saab, Seat, Skoda, Vauxhall, Volkswagen, and Volvo
- The findings from 100 interviews conducted with CEOs, marketing managers, sales managers, sales people, after sales managers at all levels from the manufacturer level to small rural dealers, as well as industry experts, policy makers, free-stranding repair shops and professional organizations
- The results of a new international study on car buyer behaviour based on 4,700 survey answers

Auto Brand is essential reading for marketing managers, sales managers, CEOs, development managers and dealers in all types of companies in the car industry including: manufacturers, national sales companies/importers, dealers, finance companies, insurance companies, free-standing repair shop channels and more. The first book to specifically address how to deal with the challenges facing the automotive industry it illustrates how companies can take advantage of new technologies, adapt to emerging trends in consumer behaviour, improve profitability and build even more successful brands in the future.

**A 21st Century Toolkit** Causey Enterprises, LLC

This book takes a look at fully automated, autonomous vehicles and discusses many open questions: How can autonomous vehicles be integrated into the current transportation system with diverse users and human drivers? Where do automated vehicles fall under current legal frameworks? What risks are associated with automation and how will society respond to these risks? How will the marketplace react to automated vehicles and what changes may be necessary for companies? Experts from Germany and

the United States define key societal, engineering, and mobility issues related to the automation of vehicles. They discuss the decisions programmers of automated vehicles must make to enable vehicles to perceive their environment, interact with other road users, and choose actions that may have ethical consequences. The authors further identify expectations and concerns that will form the basis for individual and societal acceptance of autonomous driving. While the safety benefits of such vehicles are tremendous, the authors demonstrate that these benefits will only be achieved if vehicles have an appropriate safety concept at the heart of their design. Realizing the potential of automated vehicles to reorganize traffic and transform mobility of people and goods requires similar care in the design of vehicles and networks. By covering all of these topics, the book aims to provide a current, comprehensive, and scientifically sound treatment of the emerging field of "autonomous driving".

In *Disco Demolition*, Dave Hoekstra sets the record straight about the night that epitomized the rock and disco culture clash.

#### **PROCEEDINGS OF THE SEVENTH INTERNATIONAL CONFERENCE**

Springer Nature

*Advertising Creative, Fifth Edition* continues to weave discussions about digital messaging through every chapter. Yet, the underlying theme is still about one thing that never changes—the need for fresh concepts and big ideas in pursuit of the One Thing. This edition introduces a new co-author, Marcel Jennings, who brings a fresh perspective from his background as a copywriter and creative director, as well as teaching at Virginia Commonwealth University. As always, the authors draw upon their experiences as working advertising professionals and teachers to get right to the point, stressing key principles and practical information that students and working professionals can use to communicate more effectively to build memorable brands. They also address some of the key issues impacting our industry today, such as gender equality, diversity in the workplace, and business ethics.

today!

#### **World Tennis Adventure Tourism and Outdoor Activities Management** A 21st Century Toolkit

According to IPCC reports, one of the greatest threats to the Earth ecosystems is climate change caused by the anthropogenic emissions of greenhouse gases, mostly carbon dioxide, mainly from the combustion of fossil fuels, cement production and land-use change which leads to an excessive temperature rise. Agriculture and forestry are responsible for quiet big emissions of greenhouse gases: CO<sub>2</sub>, CH<sub>4</sub> and N<sub>2</sub>O, and have significant potential to reduce these emissions mainly through enhancement of CO<sub>2</sub> absorption by terrestrial ecosystems. To evaluate the impact of agriculture on climate change, ruminant farming should be also taken into account. These animals emit considerable amounts of methane which has strong greenhouse effects. Methane emissions may be reduced by using appropriate feed for ruminants. Decreasing the meat consumption of these animals can also make an important contribution to reducing methane emissions. The methods for reducing greenhouse gas emissions through appropriate management of terrestrial ecosystems and animal husbandry are widely discussed in *The Role of Agriculture in Climate Change Mitigation*. The book will be of interest to academics, professionals and policy makers in environmental sciences.

Elsevier

An resource for those wishing to understand the driving factors behind the operation of an adventure tourism company, this textbook offers guidance on how to deliver a profitable and sustainable product. The importance of changing markets, technology and corporate social responsibility, including environmental impacts and climate change, are discussed in the context of managing an adventure tourism firm. To remain profitable, companies must address these issues along with the important aspects of risk and safety. Key features include: - Case studies from successful professionals in the industry. - Consideration of the development of sustainable adventure tourism. - Guidance on managing products and customers."

*Autocar & Motor* Springer Science & Business Media

"If BMW cars are the "ultimate driving machines," then BMW's M cars (and motorcycles) are the legendary

manufacturer's ne plus ultra offerings. BMW M celebrates the 50th anniversary of this prestigious German enthusiast brand"-

#### **Manners for Today** Springer

The Emily Post Institute, the most trusted brand in etiquette, tackles the latest issues regarding how we interact along with classic etiquette and manners advice in this updated and gorgeously packaged edition. Today's world is in a state of constant change. But one thing remains year after year: the necessity for good etiquette. This 19th edition of Emily Post's *Etiquette* offers insight and wisdom on a variety of new topics and fresh advice on classic conundrums, including: Social media Living with neighbors Networking and job seeking Office issues Sports and recreation Entertaining at home and celebrations Weddings Invitations Loss, grieving, and condolences Table manners While they offer useful information on the practical—from table settings and introductions to thank-you notes and condolences—the Posts make it clear why good etiquette matters. Etiquette is a sensitive awareness of the feelings of others, they remind us. Ultimately, being considerate, respectful, and honest is what's really important in building positive relationships. "Please" and "thank you" do go a long way, and whether it's a handshake, a hug, or a friend request, it's the underlying sincerity and good intentions behind any action that matter most.

#### **WALNECK'S CLASSIC CYCLE TRADER, DECEMBER 2007** Prentice Hall

*New Syllabus Additional Mathematics (NSAM)* is an MOE-approved textbook specially designed to provide valuable learning experiences to engage the hearts and minds of students sitting for the GCE O-level examination in *Additional Mathematics*. Included in the textbook are Investigation, Class Discussion, Thinking Time and Alternative Assessment such as Journal Writing to support the teaching and learning of *Mathematics*. Every chapter begins with a chapter opener which motivates students in learning the topic. Interesting stories about mathematicians, real-life examples and applications are used to arouse students' interest and curiosity so that they can appreciate the beauty of *Mathematics* in their surroundings and in the sciences. The use of ICT helps students to visualise and manipulate mathematical objects more easily, thus making the learning of *Mathematics* more interactive. Ready-to-use interactive ICT templates are available at <http://www.shinglee.com.sg/StudentResou>

resources/ The chapters in the textbook have been organised into three strands —

Algebra, Geometry and Trigonometry and Calculus. The colours purple, green and

red at the bottom of each page indicate these.
