NEW YORK TIMES BESTSELLER • “A fascinating look at how consumers perceive logos, ads, commercials, brands, and products.”—Time How much do we know about why we buy? What truly influences our decisions in today’s message-cluttered world? In *Buyology*, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can “cool” brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? *Buyology* is a fascinating and shocking journey into the mind of today's consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.

2010 Éditions LaPresse

This book presents an in-depth understanding of the transformation of modern economy in the twenty-first century by examining the interface and interplay of three key forces of contemporary global economy—Foreign Direct Investment (FDI), Multinational Enterprises (MNEs), and Global Value Chains (GVCs)—and how the emerging nexus of these forces has already ushered in revolutionary transformation in global production, investment, trade, and employment in recent

decades. A distinctive feature of the book is that it situates the contemporary GVC revolution—that envisages fragmentation and dispersion of production processes across the world based on competitive costs and quality—as a natural progression of the traditional FDIs-MNEs nexus, which emphasized internationalization of production and trade in search of profits, resources, markets, or cheap labour. Moreover, the book provides a comprehensive analysis, from historical, theoretical and empirical perspectives, of both traditional FDIs-MNEs Nexus that dominated the world economy until the end of the twentieth century, and of the New Nexus of FDIs-MNEs-GVCs, that has opened grand opportunities for global prosperity by providing short-cut paths to industrialization and economic growth for less developed countries. As an exemplar, the book examines GVCs in automobiles—a medium-tech manufacturing activity with numerous backward and forward linkages—to demonstrate how the FDI-MNE-GVC interface in this sector has wedged industrialization, employment, and trade in six emerging countries/regions—Brazil, Central and Eastern Europe, China, India, Mexico and Thailand.

This full-color art book delves deep into the lore of the tremendously popular competitive first-person shooter Apex Legends. Explore the world of the hit game through the eyes of the lovable robot, Pathfinder, as he chronicles his journey throughout the various environs of the Outlands to interview his fellow Legends—all in the hope of finally locating his mysterious creator. The rich history of Apex Legends is explained by the characters that helped to shape it, as are their unique bonds of competition and camaraderie. This volume chronicles the world of Respawn Entertainment's stunning free-to-play game that has captivated the online gaming scene, attracting over seventy million players and counting. Don't miss your opportunity to own a piece of Apex Legends history!
