The weld type symbol is typically placed above or below the center of the reference line, depending on which side of the joint it's on. The symbol is interpreted as a simplified cross-section of the weld. "Fillet welding

refers to the process of joining two pieces of metal together whether they be perpendicular or at an angle. Welding symbols | Butt weld geometry | Mechanical Drawing ... Geometric Dimensioning and Tolerancing is a system for defining and communicating engineering tolerances. It uses a symbolic language on engineering drawings and computer-generated

three-dimensional solid models that explicitly describe nominal geometry and its allowable variation. It tells the manufacturing staff and machines what degree of accuracy and precision is needed on each controlled feature of the part. GD&T is used to define the nominal geometry of parts and assemblies, to define the Geometric dimensioning and tolerancing - Wikipedia Dow
