Stock Market Chart Technical Analysis. Based on the past Chart statistics, forecast of future price movements can be easily done. This kind of study is known as technical analysis. As per the general assumption, price patterns repeat like the repeating history and the results of the study can be shown in the form of charts for easy understanding.

Stock Market Chart Technical Analysis - Chart Detail ...

Bullish Bar Chart: In a bullish bar, the closing price of a stock is always higher than the opening price of the stock. We can see that the bar chart Tuesday is a bullish bar because the closing price of the stock (Rs.52.50) is greater the opening price of the stock (Rs.51.50). But a bar chart also has its disadvantage.

Technical Analysis: Types of Technical Chart Patterns

Conclusion - Using Stock Chart Analysis. Stock chart analysis is not infallible, not even in the hands of the most expert technical analyst. If it were, every stock investor

would be a multi-millionaire. However, learning to read a stock chart will definitely help turn the odds of being a successful stock market investor in your favor.

How to Read Stock Charts - A Comprehensive Guide

Since you can have different charts (i.e. 5 tick, 13 minute, or 5 day), each bar on the chart represents different amount of data. You can playback the market "as is", which means one update equals one bar on your chart. You can also choose "Tick by Tick", "Minute by Minute" or "Day by Day" as alternative playback options.
