From the PREFACE THE art of speaking and understanding, reading and writing a foreign language is a subject which, commends itself to most young people.

Perhaps I am not wrong in estimating that there is scarcely a man engaged in commerce who has not at one time or another most earnestly coveted the ability to speak with foreigners in their own language. Apart altogether from the

commercial value of such a power, for a power it certainly is, there is a strong fascination about the subject, and it is a fascination which never vanishes; there is a sense of novelty in giving expression to our own familiar thoughts in words and phrases that are foreign and new to us; and to the young especially there is a charm in the distinction of being able to express himself in a foreign tongue, he feels head and shoulders above his fellows and proud of his knowledge. In ordinary studies a scholar who gains a certificate may be more clever than his fellow students who do not gain a certificate, or it may be that he is only more lucky, and in any case the difference in the amount of knowledge possessed by a scholar who gains a prize and by one who does not, may not be very great. But in the case of one who has mastered a foreign

tongue, as soon as he opens his mouth the superiority of his attainments is proclaimed, and those who have not the like knowledge feel very small before him. Honour and distinction are more cheaply bought or attained to by a knowledge of foreign languages than by any other way. Another charm in the use of a foreign language is that it enables us to express our thoughts and emotions in words, which express more fully than our own a different sense or depth of meaning. For example, the French language has a word "aimer" (to like or to love). Now an Englishman sees a lot of difference between liking an object and loving, and so does a Frenchman, but he has to be content to let the ordinary word "aimer" suffice to express his meaning, unless, indeed, he chooses to add adjectives, or rush off into poetical language to

express his love, as a Frenchman is very likely to do. But when a Frenchman, learns English what a glow of satisfaction he must feel when he finds in English two words in exchange for his one word "aimer," so that he may say I like my coffee and I love my home. These examples could be multiplied in comparing any language with another. The soul of man is, as it were, pent up within him by the language which he speaks; give him the power to use another language and it is like giving him fresh outlets for the expression of his soul. His soul becomes bigger and bigger with every language acquired, and is not this adding charm upon charm to one's existence? This sense of soul growth, and the belief that the soul never dies, but goes on growing and growing into all eternity, is the chief charm and support of existence. Therefore, in setting before the reader the various systems in vogue for teaching and learning foreign languages, and pointing out the best, I am guiding him into a subject which should enrich and ennoble his life. May it be so is the desire of the author.

READING IN A SECOND LANGUAGE

IGI Global
The Way of The Linguist,
A language learning

odyssey. It is now a cliché that the world is a smaller place. We think nothing of jumping on a plane to travel to another country or continent. The most exotic locations are now destinations for mass tourism. Small business people are dealing across frontiers and language barriers like never before. The Internet brings different languages and cultures to our finger-tips. English, the hybrid language of an island at the western extremity of Europe seems to have an unrivalled position as an international medium of communication. But historically periods of cultural and economic domination have never lasted forever. Do we not lose something by relying on the wide spread use of English rather than discovering other languages and cultures? As citizens of this shrunken world, would we not be better off if we were able to speak a few languages other than our own? The answer is obviously yes. Certainly Steve Kaufmann thinks so, and in his busy life as a diplomat and businessman he managed to learn to speak nine languages fluently and observe first hand some of the dominant cultures

of Europe and Asia. Why do not more people do the same? In his book *The Way of The Linguist*, A language learning odyssey, Steve offers some answers. Steve feels anyone can learn a language if they want to. He points out some of the obstacles that hold people back. Drawing on his adventures in Europe and Asia, as a student and businessman, he describes the rewards that come from knowing languages. He relates his evolution as a language learner, abroad and back in his native Canada and explains the kind of attitude that will enable others to achieve second language fluency. Many people have taken on the challenge of language learning but have been frustrated by their lack of success. This book offers detailed advice on the kind of study practices that will achieve language breakthroughs. Steve has developed a language learning system available online at: www.thelinguist.com.

While educators and educational psychologists debate the influence of media on learning, there can be little doubt that media is now an integral constituent of any educational context. In particular, computer and internet media, with their immense processing power and multimedia capabilities, can have significant bearing on learning processes and outcomes in today's learning environment. Such media, which are increasingly designed to be highly interactive and adaptable, can enable reflective, productive and communicative activities and have much potential for foreign language learning. The book contains 16 papers which

look at different forms of media and explore how these affect or can be used effectively in foreign language education. The first of three parts focuses on important theoretical and pedagogical issues in selecting and using media. In the second part, insightful empirical research findings are presented on the contributions of different forms of media in language teaching and learning, including their effect on learners' learning motivation. The third and concluding part of the book provides in-depth accounts of how media can be harnessed to drive innovative curricular practice as well as students' evaluations of these curricular projects.

THE VALUE OF FOREIGN LANGUAGE LEARNING

Harmony
NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. “A brilliant and thoroughly modern guide to learning new languages.”—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Grammar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn’t learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he’s discovered. Starting with pronunciation, you’ll learn how to rewire your ears and turn foreign sounds into familiar sounds. You’ll retrain your tongue to produce those sounds

accurately, using tricks from opera singers and actors. Next, you’ll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you’ll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.

The Loom of Language Springer

Forget everything you’ve heard about adult language learning: evidence from cognitive science and psychology prove we can learn foreign languages just as easily as children. An eye-opening study on how adult learners can draw upon skills and knowledge honed over a lifetime to master a foreign language. Adults who want to learn a foreign language are often discouraged because they believe they cannot acquire a language as

easily as children. Once they begin to learn a language, adults may be further discouraged when they find the methods used to teach children don't seem to work for them. What is an adult language learner to do? In this book, Richard Roberts and Roger Kreuz draw on insights from psychology and cognitive science to show that adults can master a foreign language if they bring to bear the skills and knowledge they have honed over a lifetime. Adults shouldn't try to learn as children do; they should learn like adults. Roberts and Kreuz report evidence that adults can learn new languages even more easily than children. Children appear to have only two advantages over adults in learning a language: they acquire a native accent more easily, and they do not suffer from self-defeating anxiety about learning a language. Adults, on the other hand, have the greater advantages—gained from experience—of an understanding of their own mental processes and knowing how to use language to do things. Adults have an especially advantageous grasp of pragmatics, the social use

of language, and Roberts and Kreuz show how to leverage this metalinguistic ability in learning a new language. Learning a language takes effort. But if adult learners apply the tools acquired over a lifetime, it can be enjoyable and rewarding.

This book describes a theory-guided approach to Foreign Language (FL) course development, implementation, instruction and assessment. It documents the development and implementation of a theory-guided approach designed to exploit cross-linguistically sharable competencies as resources for promoting FL learning. The volume delineates the processes of (a) identifying cross-linguistically sharable competencies, (b) exploring ways of exploiting sharable competencies as resources in promoting language skills through their purposeful use for content learning, (c) implementing the instructional approach in multiple EFL classrooms, and (d) evaluating the approach by comparing learning outcomes across

classrooms. It presents a solid conceptual framework that integrates theories in multiple research domains, including second language acquisition, knowledge acquisition, and language assessment. It also provides detailed descriptions of framework construction and classroom implementation – the two processes that are integral to course design and development. *How to Learn a Foreign Language: A Practical Guide with Tips and Resources For Dummies* Language is Music focuses on making learning foreign languages fun, easy and affordable for anyone with a desire to communicate effectively with people around the world. "Learning foreign languages is like learning to sing a song or play music," says self-made linguist Susanna Zaraysky and author of *Language is Music*. Zaraysky has what you might call "an ear" for languages, having used music to successfully learn English, Russian, French, Spanish, Italian, Portuguese, and Serbo-Croatian—all with excellent accents. Advance Praise for *Language is Music* "I love it! I think it will help people who want to learn, and those who are curious about additional language learning. Many people want to learn a language but are frightened, or disappointed by the courses they have taken. Reading *Language is Music* will encourage them to try again, on their own and with friendly supporters." -Dr. Elba Maldonado-Colon, Professor Department of Elementary Education Bilingual Program, San Jose State University LET IT JUST ROLL OFF YOUR TONGUE. With lyrical

insight and solid experience, Susanna Zaraysky, author of *Language is Music*, provides easy steps for learning a language. Gone are the boring, disconnected strategies that most of us remember from school. You've never learned a language this quickly and easily. Zaraysky's methods embody fun, connection, rhythm, and above all...music. -Suzanne Lettrick, M.Ed Educator and Founder of The Global Education and Action Network "Forget dictionaries and phrase books . . . Susanna Zaraysky's easy-to-use guide to language learning is indispensable for any serious language learner wanting to become fluent--not just conversationally proficient--in another language. *Language is Music* will teach you how to make language acquisition a part of your daily life, and to recreate the kind of total-immersion environment necessary for fluency. Highly recommended reading for aspiring polyglots. Pick up this book and you too will be all ears!" -Justin Liang, Japanese, Mandarin, Cantonese, Marshallese, intermediate Spanish

Back in France, I spent many years learning "academic" English in school. But I progressed much faster when I forced myself to listen to the BBC or not look at the subtitles when watching an American movie. I wish I had Susanna's book with me then. It's full of creative ideas and practical tips that are indispensable complements to the traditional methods of learning foreign languages -- and it's coming from someone you can trust, she speaks so many of them! - Philippe Levy, French native speaker This book is great. It showed me another aspect and a new approach of learning a language. I will put the book to good use. As a foreign English speaker, I spent many years at school learning English and did not make much progress. A lot of the tips that I read in this book, I learned them with time. However if I had read this book earlier, it would have made my life much easier and I would have saved so much time. I am going to apply the tips in *Language is Music* into learning a third language: Spanish. This time, I am sure I will make huge progress much faster. Not only is

Language is Music useful in acquiring a foreign language, but the resources and websites in the book are valuable for someone who wants to travel abroad. -Fabien Hsu, French native speaker

This book examines the processes involved in acquiring language skills, both mental and social, and the notion of what makes a skilled language learner. At the same time the author discusses what is known about teaching procedures and how they are used by the learner; how tasks are set up, how tasks determine the student's approach, how teachers' feedback is formulated and how students use the feedback and incorporate it in the development of their skills in the language.

Throughout the discussion the author presents the growing body of knowledge from qualitative and descriptive research on second language development and draws implications for the development of teaching and learning strategies.

There are many reasons why you might need to learn a foreign language quickly—perhaps an unexpected business trip or a sudden travel opportunity. A. G. Hawke, a U.S. Army Green Beret, often travels to foreign countries on short notice and has been able to work intimately with officials who do not speak English. Frequently, he needs to be able to communicate in a foreign language in a matter of days or weeks. He tried all types of schools, classes, books, and tapes, but none delivered what he needed when he needed it. Subsequently, he developed his own method for learning languages. It proved so effective for him (he is certified by the military in seven languages) and his fellow Green Berets that he decided to share it

with others who are struggling to learn a foreign language on the quick. The Quick and Dirty Guide to Learning Languages Fast is designed for people who have no time t for learning complicated rules of grammar. Hawke promises that his method will help anyone become functional in any language in as little as seven days and proficient in thirty days. How? Because he has trimmed that fat for you, freeing your time for what's truly useful. Hawke provides a detailed day-by-day schedule, a hands-on workbook format, and secret tips to help you master the key elements of any new language. In true Special Forces style, this quick-and-dirty method contains no fluff; it's all action so you can quickly get into the action yourself. If your mission is to learn a foreign language, why not learn how from the very best?

The goal of foreign language teaching is expanding from communicative competence towards an intercultural action competence. Essential in

the new orientation is the shift towards a more balanced emphasis between the external factors in the learning environment and the personal capacity, conceptions, beliefs and assumptions inside the learner's mind. As part of

the changes, assessment is seen as an important means of enhancing the elearning processes, emphasising the role of reflective self-assessment. The text explores and integrates the necessary knowledge base and practices in foreign language

education in terms of the basic concepts of experiential learning, intercultural learning, autobiographical knowledge and teacher development, together with the philosophical underpinnings of foreign language education.
