 Textbook: Introduction to Microelectronic Fabrication, 2nd edition  
 (Jaeger) About the lecture: In the SP lectures, graduate /  
 undergraduate students will learn a deeper knowledge about  
 semiconductor process technologies, such as lithography,  
 diffusion, implantation, deposition, oxidation, metalization,  
 etching, etc. Besides, the connection between the process and  
 layout would be covered regarding the design of devices and  
 circuits, and scaling-down for Moore's law.Semiconductor Process
