PUBLISHER 2013:  
COMPLETE**

World Scientific  
In the modern media  
industry digital content  
production is cheaper,  
more democratic, and  
accessible, and it's  
becoming easier to do  
things your own way.  
So what if you want to

set up on your own?  
This book will guide  
you through the joys  
and pitfalls of running  
your own creative  
company in today's  
diverse media climate.  
This is a nuts and bolts  
guide to company set  
up, structure,  
management and  
content production for  
digital platforms, TV,  
festivals, charities,  
education, brands and  
businesses. Full of tips  
for creating innovative  
business models and  
platforms, handling

tricky people and situations, funding and networking, these pages are your touchstone for making that bold first move into founder/managing director status. Featuring interviews with industry experts including digital agency and production company CEOs, creative entrepreneurs, crowd funding platforms, investors, film makers, media lawyers and accountants.

This book is the proceedings of the International School of Subnuclear Physics, ISSP 2012, 50th Course — ERICE, 23 June 2013 - 2 July 2012. This course was devoted to the celebrations of the 50th Anniversary of the

Subnuclear Physics School which was started in 1961 by Antonino Zichichi with John Bell at CERN and formally established in 1962 by Bell, Blackett, Weisskopf, Rabi and Zichichi in Geneva (CERN). The lectures covered the latest and most significant achievements in theoretical and in experimental subnuclear physics.  
Contents:QCD Celebrations and Gold-Medal to Murray Gell-Mann:Opening Remarks (A Zichichi)Some Reminiscences of Research Leading to QCD and Beyond (M Gell-Mann)The Erice Centre, Gell-Mann, QCD, the Effective Energy and Complexity (A Zichichi)History of QCD (H Fritzsche)On the History of the Strong

Interaction (H Leutwyler)Colour Transparency and Saturation in QCD (D Schildknecht)Glue-mesons: Their Conception Needs All of QCD in the Infrared (P Minkowski)Quark Masses in QCD (C A Dominguez)The Quark Model and QCD (F Close)Key Steps Toward the Creation of QCD — Notes on the Logic and History of the Genesis of QCD (T Y Cao)Hot Theoretical Topics: Perturbative Gravity from Gauge Theory (Z Bern)Black Holes and Supersymmetry (L Andrianopoli, R D'Auria and S Ferrara)Composite Weak Bosons at the LHC (H Fritzsche)High Energy Scattering in QCD and in Quantum Gravity (L N Lipatov)One-Parameter Model for the Superworld (D V Nanopoulos et al.)Beyond Relativistic Quantum String Theory (G 't Hooft)Hot Experimental Topics: Borexino Latest Results (G Bellini)Highlights from LHC (P Bloch)Highlights from ATLAS (P Jenni)Origin and Status of Luna at Gran Sasso (C Brogгинi)Highlights from ALICE (P Giubellino)Highlights from BNL-RHIC (M J Tannenbaum)Origin and Status of the Gran Sasso INFN Laboratory (L Votano)Seminars on Specialized Topics: Status of Opera (D Autiero)The Origin and Status of the Third Neutrino (A Bettini)High Energy Physics and Gravitational Waves (E Coccia)Four Decades of Computing in

 Springer Publishing  
 Company  
 This volume brings  
 together revised  
 versions of a selection  
 of papers presented at  
 the 2003 International  
 Conference on “Recent  
 Advances in Natural  
 Language Processing”.  
 A wide range of topics  
 is covered in the  
 volume: semantics,  
 dialogue,  
 summarization,  
 anaphora resolution,

shallow parsing, morphology, part-of-speech tagging, named entity, question answering, word sense disambiguation, information extraction. Various 'state-of-the-art' techniques are explored: finite state processing, machine learning (support vector machines, maximum entropy, decision trees, memory-based learning, inductive logic programming, transformation-based learning, perceptions), latent semantic analysis, constraint programming. The papers address different languages (Arabic, English, German, Slavic languages) and use different linguistic frameworks (HPSG, LFG, constraint-based DCG). This book will be

of interest to those who work in computational linguistics, corpus linguistics, human language technology, translation studies, cognitive science, psycholinguistics, artificial intelligence, and informatics.

Introduce your students to the latest that Microsoft Office has to offer with the new generation of Shelly Cashman Series books! For the past three decades, the Shelly Cashman Series has effectively introduced computer skills to millions of students. With  
MICROSOFT PUBLISHER

2013, we're continuing our history of innovation by enhancing our proven pedagogy to reflect the learning styles of today's students. In this text you'll find features that are specifically designed to engage students, improve retention, and prepare them for future success. Our trademark step-by-step, screen-by-screen approach now encourages students to expand their understanding of MICROSOFT PUBLISHER 2013 through experimentation, critical thought, and personalization. With these enhancements and more, the Shelly Cashman Series continues to deliver the most effective educational materials for you and your

students. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

PMBOK® Guide is the  
go-to resource for  
project management  
practitioners. The  
project management  
profession has  
significantly evolved  
due to emerging  
technology, new  
approaches and rapid  
market changes.  
Reflecting this  
evolution, The  
Standard for Project  
Management  
enumerates 12  
principles of project  
management and the  
PMBOK® Guide &-  
Seventh Edition is  
structured around  
eight project  
performance  
domains.This edition is  
designed to address  
practitioners' current

and future needs and to help them be more proactive, innovative and nimble in enabling desired project outcomes. This edition of the PMBOK® Guide:

- Reflects the full range of development approaches (predictive, adaptive, hybrid, etc.);
- Provides an entire section devoted to tailoring the development approach and processes;
- Includes an expanded list of models, methods, and artifacts;
- Focuses on not just delivering project outputs but also enabling outcomes; and
- Integrates with PMI standards+™ for information and standards application content based on project type, development approach, and industry

sector.

## **INTELLIGENT AUTONOMOUS SYSTEMS**

World Scientific Knowledge-Based Information Retrieval and Filtering from the Web contains fifteen chapters, contributed by leading international researchers, addressing the matter of information retrieval, filtering and management of the information on the Internet. The research presented deals with the need to find proper solutions for the description of the information found on the Internet, the description of the information consumers need, the algorithms for retrieving documents (and indirectly, the

information embedded in them), and the presentation of the information found. The chapters include: - Ontological representation of knowledge on the WWW; -Information extraction; - Information retrieval and administration of distributed documents; -Hard and soft modeling based knowledge capture; - Summarization of texts found on the WWW; - User profiles and personalization for web-based information retrieval system; - Information retrieval under constricted bandwidth; - Multilingual WWW; - Generic hierarchical classification using the single-link clustering; - Clustering of documents on the basis of text fuzzy

similarity; -Intelligent agents for document categorization and adaptive filtering; - Multimedia retrieval and data mining for E-commerce and E-business; -A Web-based approach to competitive intelligence; -Learning ontologies for domain-specific information retrieval; -An open, decentralized architecture for searching for, and publishing information in distributed systems.

A Corporate  
Professional is required to equip himself with regard to corporate compliances on day-to-day basis. There are number of compliances which are required to

be complied with depending on the event , whether it is incorporation / conversion / change , etc., not only from Company Law point of view but also from SEBI Regulations point of view (in case of a listed company). To assist the professional in this endeavour, this book is yet another attempt to provide all related procedures at one place along with the resolutions to make it handy and easy to use. The Book has been divided into two parts. Division-I contains Company Law Procedures of more than 115 events. Each procedure has been divided into following heads: - Applicable Section of the Companies Act, 2013 - Applicable Company Rule - Applicable

Regulation in case of listed company - SEBI (Listing Obligations and Disclosure Requirements ) Regulations, 2015 - Synopsis (giving background of the section of the Companies Act, 2013) - Procedure (step by step, including various Government approvals and filing of Forms, etc.) - Compliance by a listed company in accordance with SEBI (LODR ) Regulations, 2015 - Draft Board resolutions - Draft General Meeting resolutions (Special/Ordinary resolution) Division-II contains updated Company Rules as issued by the Ministry of Corporate Affairs from time to time and which are referred under various procedures of the

Book.  
**Shape, Structure And Pattern Recognition** BoD – Books on Demand  
This book contains scientific and engineering activities of the fifth international conference of Intelligent Autonomous Systems (IAS-5). The exploration for automatic systems has much attention over the centuries and created attractive research activities. The Intelligent and Autonomous systems are the current trend toward fully automatic systems that can adapt to changes in their environment. The purpose of the fifth IAS conference is to provide an opportunity for the international community of researchers in the field

of autonomous systems as well as architectures, tools, components, techniques, and new IAS design methodologies. The emphasis will be on science and technology for autonomous systems working in a complex environment.

Nonprofit leadership is messy Nonprofits leaders are optimistic by nature. They believe with time, energy, smarts, strategy and sheer will, they can change the world. But as staff or board leader, you know nonprofits present unique challenges. Too many cooks, not enough money, an

abundance of passion. It's enough to make you feel overwhelmed and alone. The people you help need you to be successful. But there are so many obstacles: a micromanaging board that doesn't understand its true role; insufficient fundraising and donors who make unreasonable demands; unclear and inconsistent messaging and marketing; a leader who's a star in her sector but a difficult boss... And yet, many nonprofits do thrive. Joan Garry's *Guide to Nonprofit Leadership* will show you how to do just that. Funny, honest, intensely actionable, and based on her decades of experience, this is the book Joan Garry wishes she had

when she led GLAAD out of a financial crisis in 1997. Joan will teach you how to: Build a powerhouse board  
Create an impressive and sustainable fundraising program  
Become seen as a 'workplace of choice'  
Be a compelling public face of your nonprofit  
This book will renew your passion for your mission and organization, and help you make a bigger difference in the world.

Heinemann  
This volume of original papers has been assembled to honor the achievements of Professor Thomas S Huang in the area of image processing and image analysis.

Professor Huang's life of inquiry has spanned a number of decades as his work on imaging problems began in 1960's. Over these 40 years, he has made many fundamental and pioneering contributions to nearly every area of this field. Professor Huang has received numerous Awards, including the prestigious Jack Kilby Signal Processing Medal from IEEE. He has been elected to the National Academy of Engineering, and named Fellow of IEEE, Fellow of OSA, Fellow of IAPR, and Fellow of SPIE. Professor Huang has made fundamental contributions to image processing, pattern recognition, and computer vision: including design and stability test of multidimensional

digital filters, digital holography; compression techniques for documents and images; 3D motion and modeling, analysis and visualization of the human face, hand and body, multi-modal human-computer interfaces; and multimedia databases. Many of his research ideas have been seminal, opening up new areas of research. Professor Huang is continuing his contribution to the field in the new millennium! This book is intended to highlight his contributions by showing the breadth of areas in which his students are working. As such, contributed chapters were written by some of his many former graduate students (some with

Professor Huang as a coauthor) and illustrate not only his contributions to imaging science but also his commitment to educational endeavor. The breadth of contributions is an indication of influence of Professor Huang to the field of signal processing, image processing, computer vision and applications; the book includes chapters on learning in image retrieval, facial motion analysis, cloud motion tracking, wavelet coding, robust video transmission, and many other topics. The Appendix contains several reprints of Professor Huang's most influential papers from 1970's to 1990's. This book is directed towards image processing researchers, including

academic faculty, graduate students and industry researchers, as well as toward professionals working in application areas. Periodica Polytechnica Drafting of Contracts – Templates with Drafting Notes Written by a physicist with over 15 years of experience as a quant on Wall Street, this book treats a wide variety of topics. Presenting the theory and practice of quantitative finance and risk, it delves into the “how to” and “what it's like” aspects not covered in textbooks or research papers. Both standard and new results are presented. A “Technical Index” indicates the mathematical level — from zero to PhD — for each chapter. The finance in each chapter

is self-contained. Real-life comments on “life as a quant” are included. An errata and Additions (3rd Reprint, 2008) to the book is available.

*Cellular Neural Networks and Their Applications* IOS Press

Featuring what you need for the AS Level GCE Single Award in Applied ICT for Edexcel, this student book matches the specification and provides information needed for the single award.

Bloomsbury Publishing  
Coming to grips with C++11 and C++14 is more than a matter of familiarizing yourself with the features they introduce (e.g., auto type declarations, move semantics, lambda expressions,

and concurrency support). The challenge is learning to use those features effectively—so that your software is correct, efficient, maintainable, and portable. That’s where this practical book comes in. It describes how to write truly great software using C++11 and C++14—i.e. using modern C++. Topics include: The pros and cons of braced initialization, noexcept specifications, perfect forwarding, and smart pointer make functions. The relationships among `std::move`, `std::forward`, rvalue references, and universal references. Techniques for writing clear, correct, effective lambda expressions. How `std::atomic` differs from `volatile`, how each should be used, and

how they relate to C++'s concurrency API How best practices in "old" C++ programming (i.e., C++98) require revision for software development in modern C++ Effective Modern C++ follows the proven guideline-based, example-driven format of Scott Meyers' earlier books, but covers entirely new material. "After I learned the C++ basics, I then learned how to use C++ in production code from Meyer's series of Effective C++ books. Effective Modern C++ is the most important how-to book for advice on key guidelines, styles, and idioms to use modern C++ effectively and well. Don't own it yet? Buy this one. Now". -- Herb Sutter, Chair of ISO

C++ Standards Committee and C++ Software Architect at Microsoft  
Edexcel AS GCE Applied ICT Single Award Springer Science & Business Media  
This volume covers the fundamental theory of Cellular Neural Networks as well as their applications in various fields such as science and technology. It contains all 83 papers of the 7th International Workshop on Cellular Neural Networks and their Applications. The workshop follows a biennial series of six workshops consecutively hosted in Budapest (1990), Munich, Rome, Seville, London and Catania (2000).

 Make workplace  
 conflict resolution a  
 game that EVERYBODY  
 wins! Recent studies  
 show that typical  
 managers devote more  
 than a quarter of their  
 time to resolving  
 coworker disputes. The  
 Big Book of Conflict-  
 Resolution Games  
 offers a wealth of  
 activities and exercises  
 for groups of any size  
 that let you manage  
 your business (instead  
 of managing  
 personalities). Part of  
 the acclaimed,  
 bestselling Big Books  
 series, this guide offers  
 step-by-step directions  
 and customizable tools  
 that empower you to  
 heal rifts arising from  
 ineffective  
 communication,  
 cultural/personality  
 clashes, and other  
 specific problem  
 areas—before they

affect your  
 organization's bottom  
 line. Let The Big Book  
 of Conflict-Resolution  
 Games help you to:  
 Build trust Foster  
 morale Improve  
 processes Overcome  
 diversity issues And  
 more Dozens of  
 physical and verbal  
 activities help create a  
 safe environment for  
 teams to explore  
 several common forms  
 of conflict—and their  
 resolution.  
 Inexpensive, easy-to-  
 implement, and proved  
 effective at Fortune  
 500 corporations and  
 mom-and-pop  
 businesses alike, the  
 exercises in The Big  
 Book of Conflict-  
 Resolution Games  
 delivers everything you  
 need to make your  
 workplace more  
 efficient, effective, and  
 engaged.
