They might request Primary Wording, or Non-Contributory Wording, or a Waiver of Subrogation, or a Hold Harmless Agreement. They might say that the

Kealy walks the reader through memorable answers to these kinds of questions that are faced everyday by insurance professionals, attorneys, risk managers, and any business that regularly deals with insurance requirements.

The Commercial General Liability (CGL) Insurance Policy is the standard business policy used to pay claims for bodily injury or property damage to others. The policy is divided into three coverage sections—each with its own exclusions—and a supplementary payments section. Do you ever hear—or worry—that an insurance company will not pay a claim because coverage is excluded? In order to know how claims are paid, you need to understand the policy's insuring

agreements and exclusions. In this book, attorney and insurance professional Dwight M. Kealy explains the insuring agreements in Coverage A, B, and C. He gives memorable examples of every standard exclusion—and some significant non-standard exclusions. He explains every supplementary payment, and he explains how policy limits impact how claims are paid.

Understanding the Commercial General Liability Policy Summit Business Media "Gitty Up" shouted the driver, as he encouraged the laboring horses to pull the laden "prairie schooner" faster westward across the prairie. In the "prairie schooners" the people were excited and anxious to reach the vast prairie of Nebraska. They wanted to rush to the land, select their free land, and build their homes. Among the settlers on the Nebraska plains were the Author's parents. In this book the reader has a glimpse of their simple home, the care of the livestock on the farm, the planting and harvesting of the crops, the brutal weather, and the challenges of isolation. Every family depended on their horses for survival. Man power combined with horse power with determination resulted in permanent settlements. When tractors began to emerge for farming, then horses retired from field work. Whoa!

The topics in the book are organized in the same manner as they would actually arise in a construction project. First, the book deals with pre-construction issues licensing, bidding, and the formation of the construction contract. It then discusses what happens when things go wrong with breach of contract by the owner and/or the contractor. An in-depth analysis is provided with regard to claims involving delay, disruption, and

acceleration. Several chapters are then devoted to statutory remedies—mechanics' liens, stop notices, and bonds both on public and private works. Finally, coverage is provided on other issues and subjects involving the construction industry, including expanding liability, home improvement contracts, bankruptcy, and alternative dispute resolution.

Chances are his insight will bring new perspectives to navigating the treacherous federal government waters. Space. The Final Construction Site. This supplement contains an interesting and unique chapter dealing with building the International Space Station. Not a typical construction site, but a crowded one with fourteen different nations participating in the build. Who will get to and build on the Moon and Mars first? How do you build in zero gravity? Arbitration is a viable and popular alternative to the court process. The more you know and the more you prepare in advance, the better the outcome. Not only is arbitration a preference domestically, but with our global economy, arbitration is also a popular international option. Labor and

employment should always be at the forefront of everyone's mind when putting together a team for a project, managing that team, or being part of the team. This chapter covers authorization to work, employment relationships, pay, ADA, sexual harassment and retaliation. These issues are not just for the owners and executives. We all have an obligation to the environment, and there are a myriad of environmental issues facing the construction industry today. Owners and contractors not only have to know how to build, but also have to know where to build and what impact that build will have on air and water pollution, stormwater, wastewater, noise, habitat loss, and much more. Why should an owner have a Suspension of Work clause in their contracts? This Update offers practical recommendations on what actions contractors should take to protect the recovery of damages and why these actions may help owners resolve claims in the field rather than the court. Twenty years ago, there were 2500 lawyers in China, basically no legal system, and law schools and law libraries had either been closed or destroyed. It was one of the poorest countries in the world with an adult literacy rate of one-third. Today, illiteracy has dropped to below 10 per cent, consumption has more than doubled, and China has exploded as a major economic force in the global community, with the USA alone investing billions of dollars, aside from pursuing an increasing number of untapped markets. Now with more than 100,000 lawyers and mandated Rule of Law, China has

enacted a multitude of new laws, regulations, and orders that must be understood if one wants to do any kind of foreign investment or trade in that country. This work is a guide to the complex laws of China. It opens with a survey of the historical development of China's contemporary legal system, and provides a summary of Chinese legislative and regulatory institutions and their functions. It also gives an overview of the judiciary and the many forces affecting China's evolving legal system.
