The Messerschmitt Bf 110 was undoubtedly one of the most significant aircraft of World War II. Despite suffering setbacks in the summer of 1940 at the hands of the RAF, it continued to be used effectively in other theatres and roles until the last days of the war, particularly as a night fighter against RAF Bomber Command's strategic bombing campaign over the Reich. This title shows you how to correct and convert basic 1/48-scale kits of the Bf 110 into many different variants, using a wide selection of aftermarket detail sets, conversions, accessories and decals for both day and night fighter schemes.

Weathering is not just about making something look dirty. Rather, it should be seen as an artistic endeavour, with the aim of making a model appear as lifelike as possible. It also helps to blend a range of separate structures into a

cohesive scene. Careful weathering brings out the best in even the most mundane model, drawing attention to moulded relief and enhancing surface textures. In this latest volume, expert modeller George Dent shares his theories and practices on the art of weathering buildings, motor vehicles, ships and all manner of scenic features. Topics include: A guide to paints, washes, dry powders and other weathering media. Simple techniques for maximizing realism on all types of buildings and structures. Effective methods for weathering road vehicles, machinery and ships: innovative techniques for reproducing peeling paint, corrosion and bare timber effects: using an airbrush effectively as part of the weathering process. Plus simple approaches to making authentic muddy tracks, road surfaces,

platforms, railway track and infrastructure. Suitable for railway modellers of all abilities, scales and eras. Superbly illustrated in step-by-step format with 438 colour photographs. George Dent is an expert railway modeller and is Deputy Editor at Model Rail magazine. A follow up to the highly successful Weathering for Railway Modellers Volume 1: Locomotives and Rolling Stock.
