## **ALEXZANDER SANAA**

### **E-Governance in India**

Simon and Schuster  
This book provides an integrated view of the Delhi Sultanate government from 1206 to 1526. It is divided into two parts. The first part deals with the political events and the dynastic history of the Sultans and the second part with the administration, different land issues, social life including two major religious movements and other cultural aspects including architecture and sculpture. The growth of the city of Delhi has been shown here perhaps for the first time. Most of the books on Delhi Sultanate mainly narrate the political events. Here other aspects have been included to show the real character of the Sultanate. It may be mentioned that the English officials from the

end of the eighteenth Century had termed the medieval period of India as a 'dark age' – a statement that has been accepted by several Indian writers. It is to negate this view that an integrated narrative has been provided here. Please note: Taylor & Francis does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka

WHEN THE PITCH GETS PERSONAL Atlanta  
Skyline's star Swedish wingback Oz Terim—or as the fans call him, the Wizard—has an airtight plan for his life, his career, even his meticulously renovated house, but he barely gives a thought to the Islamic faith he inherited from his Turkish parents. So no one's more surprised than he is when he's the victim of anti-Muslim hate crime. Refusing to take the threat seriously, he resists

the security detail Skyline insists on . . . until he meets Kate Mitchell. There's no room for her in his plan and she's the exact opposite of what he wants. Then why can't he keep his hands off her? After ten years in the military—and getting fired from her first post-Army job in Saudi Arabia—Kate Mitchell has slunk home to her Georgia roots. Private security isn't the career she dreamed of, nor is she thrilled to work with an uptight professional athlete who plays a sport she has no interest in. She never expected to be attracted to him—or for him to fall for her, too. As their opposite lives tangle up—and the threat against Oz grows more serious—Kate has to decide who she wants to be in life and in love. "Fans who enjoy reading books featuring multicultural couples won't want to pass this one up. A lot of fun and the romance is slow-

building and sweet.” —RT Book Reviews, 4 Stars “A well-crafted and very enjoyable sports romance that also delves into a timely subplot of the challenges faced by immigrants to America . . . Crossing Hearts delivers an exciting and passionate read.”

Ecologies of Urbanism in India Land Reforms in India Computerisation of Land Records

This book is an appraisal of the Computerization of Land Records scheme launched by the Centre in 1988-89 to create a comprehensive land management information system for India. It contains a discussion on Indian land management, arguing that a comprehensive ‘Land Information System’ based on digital data is a fairer and a far more efficient alternative to the existing cadastre-based system.

### **SAMPLING AND MONITORING**

Actar birkhauser  
People say buy land because they are not making it any more. Is this statement true or false? Does scarcity of rural land matter? This book addresses this issue. Does equity exist in rural

land? What is equity? How do people have find a good rural property to buy? Where should someone look to find rural property? What rationale is used to buy rural property? When somebody does find a good property, what is the next step? Using leverage is good, but how much and when? Investing in rural property is not as hard as you think.

Catalytic Air Pollution Control: Commercial Technology is the primary source for commercial catalytic air pollution control technology, offering engineers a comprehensive account of all modern catalytic technology. This Third Edition covers all the new advances in technology in automotive catalyst control technology, diesel engine catalyst control technology, small engine catalyst control technology, and alternate sustainable fuels for auto and diesel.

*Identifying and Monitoring Good Practice in the Land Sector* University of Pennsylvania Press  
The depletion of land resources is one of the greatest challenges for

mankind in this millennium. Shrinking land resources, weather aberrations, deterioration of land quality, and the globalization and liberalization of market economies have become intertwined to influence the sustainable management of land resources and land use plans. This important volume, Sustainable Management of Land Resources: An Indian Perspective, addresses these challenges. This comprehensive volume, covering important research, much of it gathered with the use of new technology, tools, and applications, is organized into four sections: (add bullets) land resource inventory and characterization geospatial technologies in land resource mapping and management soil nutrient status and management land use planning and livelihood security The volume looks at how scientists translate their knowledge and experience in sustainable land resources and management into implementable policy decisions, with a particular focus on India. Since India is an agrarian economy, the land resources assume a very

critical role affecting the livelihood of a vast majority of populace in the country. The information gathered—and the methods by which it is gathered—is applicable globally. This comprehensive publication will be highly useful for the researchers, academicians, extension workers, policymakers, planners, officials of land resources survey, planning and management institutions/agencies/departments, and others.

World Bank Publications  
This is a Reference Annual, a yearbook carrying all the information of central government schemes, programmes and policies. Information of States and UTs is also included in the Reference Book.

What does architecture related to the Nordic welfare states look like today? This book focuses on such recent public institutions as new school buildings, kindergartens, educational buildings, social housing and care facilities for the elderly or young people made by trendsetting Danish architectural firms.

**A Land Policy Study**  
SAGE Publishing India  
Increased global demand for land posits the need for well-designed country-level land policies to protect long-held rights, facilitate land access and address any constraints that land policy may pose for broader growth. While the implementation of land reforms can be a lengthy process, the need to swiftly identify key land policy challenges and devise responses that allow the monitoring of progress, in a way that minimizes conflicts and supports broader development goals, is clear. The Land Governance Assessment Framework (LGAF) makes a substantive contribution to the land sector by providing a quick and innovative tool to monitor land governance at the country level. The LGAF offers a comprehensive diagnostic tool that covers five main areas for policy intervention: Legal and institutional framework; Land use planning, management and taxation; Management of public land; Public provision of land information; and Dispute resolution and conflict management. The LGAF assesses these areas through a set of detailed

indicators that are rated on a scale of pre-coded statements (from lack of good governance to good practice). While land governance can be highly technical in nature and tends to be addressed in a partial and sporadic manner, the LGAF posits a tool for a comprehensive assessment, taking into account the broad range of issues that land governance encompasses, while enabling those unfamiliar with land to grasp its full complexity. The LGAF will make it possible for policymakers to make sense of the technical levels of the land sector, benchmark governance, identify areas that require further attention and monitor progress. It is intended to assist countries in prioritizing reforms in the land sector by providing a holistic diagnostic review that can inform policy dialogue in a clear and targeted manner. In addition to presenting the LGAF tool, this book includes detailed case studies on its implementation in five selected countries: Peru, the Kyrgyz Republic, Ethiopia, Indonesia and Tanzania.

Global Downtowns reconsiders one of the defining features of urban life—the energy and exuberance that characterize downtown areas—within a framework of contemporary globalization and change. It analyzes the iconic centers of global cities through individual case studies from Europe, Asia, Africa, Latin America, and the United States, considering issues of function, population, imagery, and growth. Contributors to the volume use ethnographic and cultural analysis to identify downtowns as products of the activities of planners, power elites, and consumers and as zones of conflict and competition. Whether claiming space on a world stage through architecture, media events, or historical tourism or facing the claims of different social groups for a place at the center, downtowns embody the heritage of the modern city and its future. Essays draw on extensive fieldwork and archival study in Beijing, Barcelona, New York, Los Angeles, Chicago, Dar es Salaam, Dubai, Nashville, Lima, Philadelphia, Mumbai, Havana, Beirut,

and Paris, among other cities. They examine the visions of planners and developers, cultural producers, governments, theoreticians, immigrants, and outcasts. Through these perspectives, the book explores questions of space and place, consumption, mediation, and images as well as the processes by which urban elites learn from each other as well as contest local hegemony. Global Downtowns raises important questions for those who work with issues of urban centrality in governance, planning, investment, preservation, and social reform. The volume insists that however important the narratives of individual spaces—theories of American downtowns, images of global souks, or diasporic formations of ethnic enclaves as interconnected nodes—they also must be situated within a larger, dynamic framework of downtowns as centers of modern urban imagination.

ANABIOTEC '92 focused on the further integration of biotechnology and analytical chemistry. The results of this symposium clearly demonstrated that a substantial progress could be reported in the application of both conventional and new analytical techniques, the latter essentially based on natural analytical tools such as biomolecules. The main themes covered during this meeting are fermentation monitoring, chromatography, instrumental analysis, biosensors and bioanalysis.

*Computerisation of Land Records* Hong Kong University Press

This is the tenth volume in a major series which studies the status of land reforms throughout the country. It examines the progress achieved and the difficulties encountered in the computerisation of land

records in various states. In 1988, the central government sponsored the Computerisation of Land Records (CoLR) scheme to tackle the recurring problems thrown up by inadequate land records system. Providing a critical appraisal of CoLR, the 20 articles in the volume are divided into three sections: Computerisation of Land Records; Digitisation of Cadastral Maps; and Land Information System. Based on empirical data and field studies, this volume is an important contribution towards understanding the socio-economic realities and social dynamics of contemporary India in the framework of land reforms.

Technological innovations across the globe are bringing profound change to our society.

Governments around the world are experiencing and embracing this technology-led shift. New platforms, emerging technologies, customizable products,

and changing citizen demand and outlook towards government services are reshaping the whole journey. When it comes to the application of Information and Communication Technologies (ICT) in any sector, the Government of India has emerged as an early adopter of these technologies and has also focused on last-mile delivery of citizen-centric services. Citizen Empowerment through Digital Transformation in Government takes us through the four-decade long transformational journey of various key sectors in India where ICT has played a major role in reimagining government services to citizens across the country. It touches upon the emergence of the National Informatics Centre as a premier technology institution of the Government of India and its collaborative efforts with the Central, State Governments, as well as the District level administration, to deliver best-in-class solutions. Inspiring and informative, the book is filled with real-life transformation stories that have helped to lead the people and the Government of India to realize their vision of a digitally empowered

nation.
