Advances in Data and Information Sciences Routledge

Vast amounts of digital data are now generated daily by people as they go about their lives, yet social researchers are struggling to exploit it. At the same time, the challenges faced by society in the 21st century are growing ever more complex, and demands research that is bigger in scale, more collaborative and multi-disciplinary than ever before. This cutting-edge volume provides an accessible introduction to innovative digital social research tools and methods that harness this 'data deluge' and successfully tackle key research challenges. Contributions from leading international researchers cover topics such as: Qualitative, quantitative and mixed methods research Data

management Social media and social network analysis Modeling and simulation Survey methods Visualizing social data Ethics and e-research The future of social research in the digital age This vibrant introduction to innovative digital research methods is essential reading for anyone conducting social research today. International Journal of Information Technology and Web Engineering (IJITWE). SAGE

In this brilliant debut novel, Alexis Wright evokes city and outback, deepening our understanding of human ambition and failure, and making the timeless heart and soul of this country pulsate on the page. Black and white cultures collide in a thousand ways as Aboriginal spirituality clashes with the complex brutality of colonisation at St Dominic's mission. With her political awareness raised by work with the city-based Aboriginal Coalition, Mary visits the old mission in the northern Gulf country, place of her mother's and grand-mother's suffering. Mary's return

re-ignites community anxieties, and the Council of Elders again turn to their spirit world.

Banerjee Fruits of Delight in the Fields of Despair in Manas Bakshi's Dance of Satan and Other Poems by T.V. Reddy IJML is a peer-reviewed research journal in English literature published from Thodupuzha, Kerala, India. The publisher and editor is Prof. Dr. K. V. Dominic, renowned English language poet, critic, short story writer and editor who has to his credit 27 books. He is also the secretary of Guild of Indian English Writers, Editors and Critics (GIEWEC). Since 2010, IJML is a biannual journal published in January and July. The articles are sent first to the referees by the editor and only if they accept, the papers will be published. Although based in India, each issue includes worldwide contributors. Although IJML concentrates on multiculturalism, it also encompasses other literature. Each issue also includes poems, short stories, review articles, book reviews, interviews, general essays etc. under separate sections. IJML is available in paperback, Kindle, ePub, and PDF editions. There are varieties of books in the market, easily available for the researchers in Ayurveda but no book is still designed having a stepwise approach for writing a research paper in Ayurveda. Furthermore, every beginner should be acquainted with the different components of a research paper like introduction, abstract, conclusion etc. The skill of writing a research paper is

not acquired just by reading books or by mere learning in classrooms. The book serves the purpose of giving a conceptual idea of writing a research paper in Ayurveda. The stepwise aspect makes the learners easy to understand the components of a research paper. The book has been added a number of examples to make it clear 'what is right' and 'what is wrong'.

INTERNATIONAL JOURNAL ON MULTICULTURAL LITERATURE (IJML) VOL. 7, No. 2

Modern History Press

Revised from the 1982 edition. The 1988 market for adhesives and sealants was estimated at \$5.1 billion, with projections for 1995 at \$12 billion. This handbook contains descriptions of some 2200 materials which are currently available to the industry. Arrangement is by category and then by company, the products being listed under the company name and described in the manufacturer's words. Annotation copyrighted by Book News, Inc., Portland, OR

Re-Visiting Literature IGI Global

Social media applications have emerged in the last 20 years to meet the different needs of individuals, and private sector and public organizations have not been indifferent to these technologies. Social media tools help public institutions and organizations communicate directly with citizens as well as enable two-way communication and enable citizens to participate in all stages from agenda setting to evaluation of policy processes. Central and local governments, which use innovative methods to involve citizens in this process, attach significance to the development of e-participation tools. Ensuring the

participation of citizens in policy processes not only determines the wishes and priorities of citizens but also uses scarce resources effectively and efficiently. *Global Perspectives on Social Media Usage Within Governments* reveals the best practices of various countries regarding the use of social media by central and local governments according to public administration models. The book presents various case studies on the impact of public administration models on social media use in order to contribute to public administration and social media use. Covering topics such as climate action, knowledge behaviors, and citizen participation, this premier reference source is an essential resource for government officials, public administrators, public policy scholars, social media experts, public affairs scholars, students and educators of higher education, librarians, researchers, and academicians.

A Stepwise Approach on Writing a Research Paper in Ayurveda
Penguin Books India

The prominent idea of sustainable development has influenced almost all disciplines, changing our understanding and behavior toward sustainability. In this respect, marketing has also been transforming from the sustainability point of view as emerging social and ecological problems caused by the exponential growth require sustainable solutions and joint efforts. Sustainable marketing intends to integrate ecological, social, and ethical concerns while creating value. Consumers, along with other stakeholders, expect that brands will contribute to work toward the sustainable development goals; therefore, companies need to redesign their marketing initiatives to create, promote, and deliver values that are in line with sustainability. The Handbook

of Research on Achieving Sustainable Development Goals With Sustainable Marketing illuminates current developments in sustainable marketing and the new trends and tendencies concerning the concept in theory and practice. The book also explores the concept of sustainable marketing in today's context of the digital age, explains its boundaries and benefits, and describes the challenges and opportunities as well as the advantages and potential disadvantages of sustainable marketing and branding efforts. Covering key topics such as branding, marketing ethics, and corporate social responsibility, this premier reference source is ideal for marketers, business owners, managers, industry professionals, researchers, academicians, scholars, practitioners, instructors, and students.

HANDBOOK OF RESEARCH ON ACHIEVING SUSTAINABLE DEVELOPMENT GOALS WITH SUSTAINABLE MARKETING

William Andrew

These proceedings gather cutting-edge papers exploring the principles, techniques, and applications of Microservices in Big Data Analytics. The ICETCE-2019 is the latest installment in a successful series of annual conferences that began in 2011. Every year since, it has significantly contributed to the research community in the form of numerous high-quality research papers. This year, the conference's focus was on the highly relevant area of Microservices in Big Data Analytics.

Microbiology Asian Development Bank

A vast majority of the world's population lacks access to essential medicines and the provision of safe healthcare services. Medicinal plants and herbal medicines can be applied for

pharmacognosy, or the discovery of new drugs, or as an aid for plant physiology studies. In recent years, there has been increased interest in the search for new chemical entities and the expression of resistance of many drugs available in the market has led to a shift in paradigm towards medicinal research. Herbal treatments, the most popular form of folk medicine, may become an important way of increasing access to healthcare services. Advanced Pharmacological Uses of Medicinal Plants and Natural Products provides emerging research exploring the theoretical and practical aspects of drug discovery from natural sources that allow for the effective treatment of human health problems without any side effects, toxicity, or drug resistance. Featuring coverage on a broad range of topics such as ethnobotany, therapeutic applications, and bioactive compounds, this book is ideally designed for pharmacologists, scientists, ethnobotanists, botanists, health researchers, professors, industry professionals, and health students in fields that include pharmaceutical drug development and discovery.

EXTENDED TRANSPORTATION PROBLEM John Wiley & Sons Inclusive growth needs to be achieved to reduce poverty and other disparities and raise economic growth. This book develops a poverty profile for India in view of the ongoing national and global efforts toward ensuring inclusive growth and bringing poverty levels down. This poverty profile will enable academics and policy makers to reassess and improve on the existing methodologies in estimating poverty rates, evaluate the effectiveness of existing poverty programs, and suggest alternative and complementary options for strategic intervention based on the lessons drawn from program implementation both

at the state and national levels.

COMPUTATIONAL INTELLIGENCE and HEALTHCARE INFORMATICS

The book provides the state-of-the-art innovation, research, design, and implements methodological and algorithmic solutions to data processing problems, designing and analysing evolving trends in health informatics, intelligent disease prediction, and computer-aided diagnosis. Computational intelligence (CI) refers to the ability of computers to accomplish tasks that are normally completed by intelligent beings such as humans and animals. With the rapid advance of technology, artificial intelligence (AI) techniques are being effectively used in the fields of health to improve the efficiency of treatments, avoid the risk of false diagnoses, make therapeutic decisions, and predict the outcome in many clinical scenarios. Modern health treatments are faced with the challenge of acquiring, analyzing and applying the large amount of knowledge necessary to solve complex problems. Computational intelligence in healthcare mainly uses computer techniques to perform clinical diagnoses and suggest treatments. In the present scenario of computing, CI tools present adaptive mechanisms that permit the understanding of data in difficult and changing environments. The desired results of CI technologies profit medical fields by assembling patients with the same types of diseases or fitness problems so that healthcare facilities can provide effectual treatments. This book starts with the fundamentals of computer intelligence and the techniques and procedures associated with it. Contained in this book are state-of-the-art methods of computational intelligence and other allied techniques used in the healthcare system, as well as advances in

different CI methods that will confront the problem of effective data analysis and storage faced by healthcare institutions. The objective of this book is to provide researchers with a platform encompassing state-of-the-art innovations; research and design; implementation of methodological and algorithmic solutions to data processing problems; and the design and analysis of evolving trends in health informatics, intelligent disease prediction and computer-aided diagnosis. Audience The book is of interest to artificial intelligence and biomedical scientists, researchers, engineers and students in various settings such as pharmaceutical & biotechnology companies, virtual assistants developing companies, medical imaging & diagnostics centers, wearable device designers, healthcare assistance robot manufacturers, precision medicine testers, hospital management, and researchers working in healthcare system.

MIDNIGHT'S FURIES

John Wiley & Sons

PREFACE The world is now ready to enter a second wave of Coronavirus and several lockdowns. What a year ago seemed too far and like a fairytale, is now a reality and a nightmare all over the world. On March 11, 2020 the World Health Organization (WHO) declared the Coronavirus disease (a.k.a Covid- 19) a pandemic as it spread in a short time all over the world. The Coronavirus disease has already affected life in many countries. In the long term, it is predicted that it will bring about changes that are quite likely to be permanent. Along with the measures taken on prevention and control of the spread of the outbreak; international supply chains, supply- demand balance, consumer

and producer behavior, business methods, working models, education methods and daily life are changing. The concern for all countries needs to be researched in different aspects. The Covid- 19 crisis has caused considerable damage in every aspect of life. We believe that different socio- economic aspects need to be discussed by scholars involved in academia and people who are interested in contributing to this new topic the world is facing. This book comprises nine chapters including topics related to several impacts and challenges that Covid- 19 brought about on economy, education, social life, trade, geopolitical relations, and what is more important on our health care systems. We realize that this editorial book will lead a way to policy makers, implementers, researchers, students and those who are interested in learning more about Covid- 19 impacts all over the world. We hope and believe that it will be widely read As Socrates said: "The secret of change is to focus all of your energy, not on fighting the old, but on building the new". Now, it's our turn to focus on our new normal, new reality and we are all in this together

Ignited Minds Univ. of Queensland Press

My modest efforts of working on some literary topics and writers have finally come to you in the form of this book in your hands. There is no doubt that this book contains miscellaneous topics from some popular genres like poetry and novel writing. The book attempts to offer a critical and evaluative material on the poetic achievements of some national and foreign poets. It provides a comparative analysis of some famous poets.

URBAN POETICS AND POLITICS IN CONTEMPORARY SOUTH ASIA AND THE MIDDLE EAST

Springer Nature

This volume presents some of the latest research and applications in using natural substances and processes for pharmaceutical products. It presents an in-depth examination of the chemical and biological properties of selected natural products that are either currently used or have the potential for useful applications in the chemical and pharmaceutical industries. It covers emerging technologies and case studies and is a source of up-to-date information on the topical subject of natural products and microbial technology. It provides an applied overview of the field, from traditional medicinal targets to cutting-edge molecular techniques. Natural products have always been of key importance to drug discovery, but as modern techniques and technologies have allowed researchers to identify, isolate, extract, and synthesize their active compounds in new ways, they are once again coming to the forefront of drug discovery.

MACHINE INTELLIGENCE AND SMART SYSTEMS

American Academic Press

In today's world, it is crucial to understand how cities and urban spaces operate in order for them to continue to develop and improve. To ensure cities thrive, further study on past and

current policies and practices is required to provide a thorough understanding. *Urban Poetics and Politics in Contemporary South Asia and the Middle East* examines the poetics and politics of city and urban spaces in contemporary South Asia and the Middle East and seeks to shed light on how individuals constitute, experience, and navigate urban spaces in everyday life. This book aims to initiate a multidisciplinary approach to the study of city life by engaging disciplines such as urban geography, gender studies, feminism, literary criticism, and human geography. Covering key topics such as racism, urban spaces, social inequality, and gender roles, this reference work is ideal for government officials, policymakers, researchers, scholars, practitioners, academicians, instructors, and students.

The Shape Of The Beast Is Our World Laid Bare, With Great Courage, Passion And Eloquence, By A Mind That Has Engaged Unhesitatingly With Its Changing Realities, Often Anticipating The Way Things Have Moved In The Last Decade. In The Fourteen Interviews Collected Here, Conducted Between January 2001 And March 2008, Arundhati Roy Examines The Nature Of State And Corporate Power As It Has Emerged During This Period, And The Shape That Resistance Movements Are Taking. As She Speaks, Among Other Things, About People Displaced By Dams And Industry, The Genocide In Gujarat, Maoist Rebels, The War In Kashmir And The Global War On Terror, She Raises Fundamental Questions About Democracy, Justice And Non-Violent Protest. Unabashedly Political, This Is Also A Deeply Personal Collection. Through The Conversations, Arundhati Talks About The Necessity Of Taking A Stand, As Also The Dilemma Of Guarding The Private

Space Necessary For Writing In A World That Demands Urgent, Unequivocal Intervention. And In The Final Interview, She Discusses With Uncommon Candour Her Ambiguous Feelings About Success And Both The Pressures And The Freedom That Come With It.

The Shape of the Beast Springer Nature

This is an open access book. The book provides an overview of the state of research in developing countries – Africa, Latin America, and Asia (especially India) and why research and publications are important in these regions. It addresses budding but struggling academics in low and middle-income countries. It is written mainly by senior colleagues who have experienced and recognized the challenges with design, documentation, and publication of health research in the developing world. The book includes short chapters providing insight into planning research at the undergraduate or postgraduate level, issues related to research ethics, and conduct of clinical trials. It also serves as a guide towards establishing a research question and research methodology. It covers important concepts such as writing a paper, the submission process, dealing with rejection and revisions, and covers additional topics such as planning lectures and presentations. The book will be useful for graduates, postgraduates, teachers as well as physicians and practitioners all over the developing world who are interested in academic medicine and wish to do medical research.

WEB-BASED LEARNING AND TEACHING TECHNOLOGIES: OPPORTUNITIES AND CHALLENGES

International Journal of Information Technology and Web

Engineering (IJITWE). Understanding Poverty in India
Excessive pollution has provoked the nature, and the nature starts behaving in unnatural ways (in form of global warming versus global cooling, heavy rains versus draught, and other natural calamities like frequent earthquakes and tsunami, cyclones, epidemics, and so forth). Economic growth via production and consumption threatens peaceful life of human beings on the earth. Environment-friendly eco-green marketing is an attempt to protect consumer welfare and environment (the nature) through production, consumption, and disposal of eco-friendly products. Basically, green marketing is concerned with three aspects: 1. promotion of production and consummation of pure/quality products, 2. fair and just dealing with customers and society, and 3. protection of ecological environment. Thus, green marketing is a marketing philosophy that promotes production and selling of pure (eco-friendly) products with protection of ecological balance. Green marketing involves multiple activities. Green marketing encourages production of pure products by pure

technology, conservation of energy, preservation of environment, minimum use of natural resources, and more use of natural foods instead of processed foods. Efforts of people, social organizations, firms, and governments in this regard can be said as green marketing efforts. Green marketing raises the voice against production, consumption, and/or disposal of such products that harm consumers, the society, and the environment anyway. It is necessary that businessmen and users should refrain from harmful products.

Microservices in Big Data Analytics IGI Global

What is it that we as a nation are missing? Why, given all our skills, resources and talents, do we settle so often for the ordinary instead of striving to be the best? At the heart of Ignited Minds is an irresistible premise: that people do have the power, through hard work, to realize their dream of a truly good life. Kalam's vision document of aspiration and hope motivates us to unleash the dormant energy within India and guide the country to greatness.
