Freedom in the World, the Freedom House flagship survey whose*

findings have been published annually since 1972, is the standard-setting comparative assessment of global political rights and civil liberties. The survey ratings and narrative reports on 193 countries and a group of select territories are used by policy makers, the media, international corporations, and civic activists and human rights defenders to monitor trends in democracy and track improvements and setbacks in freedom worldwide. Press

accounts of the survey findings appear in hundreds of influential newspapers in the United States and abroad and form the basis of numerous radio and television reports. The Freedom in the World political rights and civil liberties ratings are determined through a multi-layered process of research and evaluation by a team of regional analysts and eminent scholars. The analysts used a broad range of sources of information, including foreign and

domestic news reports, academic studies, nongovernmental organizations, think tanks, individual professional contacts, and visits to the region, in conducting their research. The methodology of the survey is derived in large measure from the Universal Declaration of Human Rights, and these standards are applied to all countries and territories, irrespective of geographical location, ethnic or religious composition, or level of economic development.

RECORDS OF THE COLONY OF NEW PLYMOUTH, IN NEW ENGLAND: LAWS, 1623-1682

CRC Press

The Consumer Price Index Manual: Concepts and Methods contains comprehensive information and explanations on compiling a consumer price index (CPI). The Manual provides an overview of the methods and practices national statistical offices (NSOs) should consider when making decisions on how to deal with the various problems in the compilation of a CPI. The chapters cover many topics. They elaborate on the different practices currently in use, propose alternatives whenever possible, and discuss the advantages and disadvantages of each alternative. The primary purpose of the Manual is to assist countries in producing CPIs that reflect internationally recommended methods and practices.

Being a Complete and Systematic Statement of the Whole Body of the Law as Embodied in and Developed by All Reported Decisions

This valuable book provides a concise, yet thorough analysis of a confusing statute and morass of case law. Extremely well organized and indexed, the guide allows you to locate promptly and easily issues pertinent to your case.

FLAGGING HANDBOOK

Addison-Wesley Professional

Katharine Cleland's *Irregular Unions* provides the first sustained literary history of clandestine marriage in early modern England

and reveals its controversial nature in the wake of the Elizabethan Religious Settlement, which standardized the marriage ritual for the first time. Cleland examines many examples of clandestine marriage across genres. Discussing such classic works as *The Faerie Queene*, *Othello*, and *The Merchant of Venice*, she argues that early modern authors used clandestine marriage to explore the intersection between the self and the marriage ritual in post-Reformation England. The ways in which authors grappled with the political and social complexities of clandestine marriage, Cleland finds, suggest that these narratives were far more than interesting plot devices or scandalous stories ripped from the headlines. Instead, after the Reformation, fictions of clandestine marriage allowed early modern authors to explore topics of identity formation in new and different ways. Thanks to generous funding from Virginia Tech and its participation in TOME (Toward an Open Monograph Ecosystem), the ebook editions of this book are available as Open Access volumes from Cornell Open (cornellopen.org) and other repositories.

Cleburne County and Its People is a historical account of Cleburne County and the men and women who made it what it is today. These men and women were as diverse as the Ozark Mountain's rock-laden landscapes. The pioneers who settled Cleburne County were as strong as the land, of hardy pioneer stock, and bold in thought and action. They were shrewd, strong-willed individuals who brought staunch beliefs and strong disciplines with them and settled in an untamed wilderness which became Cleburne County. *Cleburne County and Its People* has drawn from the past and the present—chronicling the lives of settlers facing hardships and tragedies, discovering profound beauty, mastering vast natural resources, and formulating democratic ideals. The stories in this book are honest interpretations of the human experience intertwined with the old and the new and adding exciting dimensions to the county and Cleburne and the state of Arkansas. The objective of Carl J. Barger, the compiler of *Cleburne County and Its People*, is to preserve a history of the county of his birth for students, historians, and all of the citizens of Cleburne County. Carl J. Barger is the author of *Swords and Plowshares*, a Civil War love story, and *Mamie*, an Ozark Mountain Girl of Courage, a story of the Ozark Mountain People, set in Cleburne and Van Buren Counties.

THE PHILOSOPHY AND PRACTICES THAT ARE REVOLUTIONIZING EDUCATION AND SCIENCE

Rowman & Littlefield

This report provides information for use in both short- and long term land-planning decisions, particularly at the county level, and an indication of the present and future economic impact of mineral and energy development. The report discusses eight major commodity groups: (1) oil and gas, (2) coal and coal resin, (3) coal-bed methane, (4) other energy resources (oil-impregnated rock, oil shale, geothermal), (5) uranium and vanadium, (6) metallic minerals, (7) industrial rocks and minerals, and (8) ground-water resources. In general, for each group or commodity within a group the following aspects are discussed: (1) known occurrences and characteristics, (2) past production and trends, (3) current production and exploration activity, and (4) geologic potential. Plates accompany each of the major commodity groups and show the locations of known resources and areas of geologic potential. In addition to the commodity discussions, the report contains a brief summary of land ownership status and concludes with a summary of commodities having the best potential for discovery and development. 161 pages + 14 plates

Affordable education. Transparent science. Accessible scholarship. These ideals are slowly becoming a reality thanks to the open education, open science, and open access movements. Running separate—if parallel—courses, they all share a philosophy of equity, progress, and justice. This book shares the stories, motives, insights, and practical tips from global leaders in the open movement.

Irregular Unions Ubiquity Press

Beni-Amer cattle owners in the western part of the Horn of Africa are not only masters in cattle breeding, they are also knowledge

sovereign, in terms of owning productive genes of cattle and the cognitive knowledge base crucial to sustainable development. The strong bonds between the Beni-Amer, their animals, and their environment constitute the basis of their ways of knowing, and much of their knowledge system is built on experience and embedded in their cultural practices. In this book, the first to study Beni-Amer practices, Zeremariam Fre argues for the importance of their knowledge, challenging the preconceptions that regard it as untrustworthy when compared to scientific knowledge from more developed regions. Empirical evidence suggests that there is much one could learn from the other, since elements of pastoralist technology, such as those related to animal production and husbandry, make a direct contribution to our knowledge of livestock production. It is this potential for hybridisation, as well as the resilience of the herders, at the core of the indigenous knowledge system. Fre also argues that indigenous knowledge can be viewed as a stand-alone science, and that a community's rights over ownership should be defended by government officials, development planners and policy makers, making the case for a celebration of the knowledge sovereignty of pastoralist communities. Praise for Knowledge Sovereignty Among African Cattle Herders 'This book greatly contributes to the limited literature on theoretical discourses and practices on indigenous knowledge of livestock herding communities in the Horn of Africa. It discusses knowledge heritage and sovereignty through the presentation of valid empirical evidence, and its subsequent relevance in nurturing sustainability of knowledge systems to enhance lives of pastoralists in Africa and beyond.' Samuel Tefera PhD, Assistant Professor and Asian Desk Coordinator at the Centre for African and Oriental Studies, Associate Dean for Research and Technology Transfer, College of Social Sciences, Addis Ababa University 'The author has worked with our Beni-Amer pastoral communities in Eastern Sudan and Western Eritrea for over 30 years and this book is the first of its kind in documenting our practices, knowledge systems, heritage and way of life.' Mustafa Faid and Mohamed Ali, Leaders of the of the Pastoral and Environmental Association Kassala State (PEAKS) 'A riveting and rare book! Zeremariam Fre guides you along the sandy [dusty] tracks and grassy pastures that the Beni-Amer and their herds have been softly tracing over time all through the Horn of Africa.

One of the virtues of the book is that it illustrates vividly and in clear language how their continuous self-built endogenous knowledge on agro-pastoral life is not only at the core of their survival and the survival of their herds, but more importantly a powerful weapon in facing and resisting multiple aggressions . . . Ground-breaking and a huge achievement.' Yves Cabannes, Emeritus Professor of Development Planning,, The Bartlett Development Planning Unit, UCL 'The book underlines the importance of enriching and utilizing the unrecognized, yet valuable scientific knowledge and practices that are deeply rooted in pastoral traditional expertise about their own environment and breeding practices. It is an important publication that reflects Dr Fre's expertise and long term research in the region and thus, it is a significant addition to the African library.' Hala Alkarib, Director of the Strategic Initiative for Women in the Horn of Africa (SIHA) 'This fascinating book not only gives a unique insight into the knowledge and practice of pastoralists in the Horn of Africa from the author's first-hand experience, it also provides an incisive critique of the multiple dimensions of knowledge, paying tribute to the sovereignty of indigenous knowledge. It has a timely relevance for global sustainability that will appeal to a wider readership.' Nicole Kenton, International Development Consultant, former long serving senior staff member of the International Institute for Environment and Development (IIED) 'The book covers several intertwined issues relevant to contemporary development policy and practice. It goes beyond the rural-urban and peasant-nomadic livelihoods dichotomy by shedding more light on the inter-linkages within the multiple livelihood systems within the Horn of Africa and globally. A rich evidence-based resource for academics, development partners and social movements for promoting and designing state policies that embrace pastoralist aspirations.' Bereket Tsegay MA, PhD candidate, Pastoral and Environmental Network in the Horn of Africa (PENHA) 'Dr Zeremariam Fre has done a wonderful job of placing at the centre of this book the Beni-Amer pastoralists, the world they inhabit and the knowledge they use to navigate and thrive in it. The lessons contained in this book go beyond pastoralism; it is a must read for anyone serious about understanding the importance of located knowledge in the innovation and development process.' Yusuf Dirie, PENHA Research Fellow and PhD researcher at the University of Sussex

Normal Human Aging INTERNATIONAL MONETARY FUND

This book focuses on the fundamental concepts and physical and chemical aspects of pulsed laser ablation of solid targets in liquid environments and its applications in the preparation of nanomaterials and fabrication of nanostructures. The areas of focus include basic thermodynamic and kinetic processes of laser ablation in liquids, and its applications in metal and metal oxides nanocrystals synthesis and semiconductor nanostructures fabrication. The book comprises theoretical and experimental analysis of laser ablation in liquids, research methods, and preparation techniques.

Big U Rowman & Littlefield

This bulletin serves not only to introduce the non-geologist to the rich geology of Millard County, but also to provide professional geologists with technical information on the stratigraphy, paleontology, and structural geology of the county. Millard County is unique among Utah's counties in that it contains an exceptionally complete billion-year geologic record. This happened because until about 200 million years ago the area of present-day Millard County lay near sea level and was awash in shallow marine waters on a continental shelf upon which a stack of fossil-bearing strata more than 6 miles (10 km) thick slowly accumulated. This bulletin summarizes what is known about these strata, as well as younger rocks and surficial deposits in the county, and provides references to scientific papers that describe them in greater detail. Mountains North 30 x 60 (1:100,000-scale) quadrangles. These companion maps and this bulletin portray the geology of Millard County more completely and accurately than any previously published work.

In the World Water Development Report (WWDR) series, the
WWDR4 represents a milestone. While providing a comprehensive
assessment of the world's water resources it also introduces a
strong thematic element. Building on the WWDR3 in the
recognition of the externalities, the WWDR4 elaborates on the

interactions between water and the drivers of change. The
WWDR4 describes the major changes, uncertainties, and risks
taking place in the world and their links to water resources. It
gives account of the status and the trends related to water
supplies, uses, management, institutions and financing; highlights
regional hotspots, and addresses issues such as gender equality,
water-related disasters, health and the role of ecosystems.

Cleburne County and Its People IBM Redbooks

Across numerous vertical industries, enterprises are challenged to
improve processing efficiency as transactions flow from their
business communities to their internal systems and vice versa,
simplify management and expansion of the external communities,
accommodate customer and supplier preferences, govern the
flow of information, enforce policy and standards, and protect
sensitive information. Throughout this process, external partners
must be on-boarded and off-boarded, information must flow
across multiple communications infrastructures, and data must be
mapped and transformed for consumption across multiple

applications. Some transactions require synchronous or real-time
processing while others are of a more periodic nature. For some
classes of customer or supplier, the enterprise might prefer a
locally-managed, on-premise solution. For some types of
communities (often small businesses), an as-a-Service solution
might be the best option. Many large enterprises combine the on-
premise and as-a-Service approach to serve different categories
of business partners (customers or suppliers). This IBM®
Redbooks® publication focuses on solutions for end-to-end
integration in complex value chains and presents several end-to-
end common integration scenarios with IBM Sterling and IBM
WebSphere® portfolios. We believe that this publication will be a
reference for IT Specialists and IT Architects implementing an
integration solution architecture involving IBM Sterling and IBM
WebSphere portfolios.
