The SDGs, developed by the UN in 2012, focuses on 17 goals for the betterment of humanity and humanitarian causes. Among the core objectives of Shari'ah in Islamic finance is to offer a helping hand, emphasizing the efforts and scope of the SDGs. This book explores how Islamic ethical wealth is structured to contribute to the SDGs and an overall socio-economic impact within the principles of Maqasid al-Shari'ah. Focusing areas such as Islamic micro-finance, wealth inclusion, corporate and agro-Zakat, Awqaf, SRI Sukuk, and green Sukuk, this book will feature contributions from the leading researchers in sustainability and Islamic finance and will be of interest to scholars, researchers, industrialists, NGOs, UNDP and students studying both areas.

DILIP KUMAR

Academic Press

It is almost unprecedented for a head of state to publish a memoir while still in office. But Pervez Musharraf is no ordinary head of state. As President of Pakistan since 1999, his is one of the most dangerous jobs in the world, and

he continues to play a crucial role in the global war on terror. A one-time supporter of the Taliban, a general who fought in several wars, President Musharraf took a decisive turn against militant Islam in 2001. Since then he has survived two assassination attempts; rooted out militants in his own government; helped direct countless raids against al-Qaeda both in his cities and in the mountains; and tracked Osama bin Laden with technical and human intelligence. *IN THE LINE OF FIRE* is astonishingly revealing and honest about dozens of topics of intense interest to the world. Among its many revelations: exactly how Pakistani authorities tracked down and smashed three major al-Qaeda control centres in the mountains; how al-Qaeda's many-layered structure was revealed after the assassination attempts; Bin Laden's current position within the al-Qaeda hierarchy; what it has been like to deal with Bush and Blair; how Pakistan and India have avoided nuclear confrontation; and much more. The terrible earthquake of 2005, killing nearly 40,000 Pakistanis, is just one chapter in a life and career that has been filled with danger and drama. The worldwide launch of President Musharraf's memoir promises to be a sensation.

A Life in Words Penguin UK

The Handbook for Good Clinical

Laboratory Practices in Pakistan, created by the Pakistan Academy of Sciences (PAS) in collaboration with the U.S. National Academies of Sciences, Engineering, and Medicine (NASEM), is intended to serve as an informational guide for clinical laboratories in order to improve the health and wellbeing of people and animals in Pakistan.

National Assembly Elections in Pakistan, 1970-2008 Edward Elgar Publishing 'Pakistan' tells the fascinating history of the country as seen through the eyes of one of its most famous sons, Imran Khan.

Nuclear Oncology Springer Nature

This up-to-date encyclopedia examines the conflict between India and Pakistan from Independence to the present day, with an authoritative treatment that presents the issues evenhandedly and from both countries' perspectives.

Tensions between India and Pakistan are deeply rooted. Many go back to 1947 or earlier, when, with the partitioning of the provinces of Punjab and Bengal, British India was succeeded by two independent countries: a primarily Hindu India and a Muslim Pakistan. Subsequently, the two countries have fought three wars and come close to open war several other times, especially over Kashmir. Conflict Between India and Pakistan begins with a discussion of the partition of India and those who figured prominently in it, notably: Mohammed Ali Jinnah, Clem Attlee, the last viceroy, Admiral Louis Mountbatten, and Jawaharlal Nehru. Then, in a series of evenhanded, carefully crafted portraits, it describes the people, political parties, foreign and domestic policies, and economic, religious, and cultural pressures that have played a role in the conflicts between these nations from 1947 to the present.

MDPI

Reham Khan's eventful life took her from Gaddafi's Libya to Zia's Pakistan and thence to England as a teenage bride, before she returned to Pakistan in her forties. Her life has been one of extraordinary contrasts: she has been through a violent marriage and domestic abuse, and has had to negotiate the murky world of Pakistan politics; but her story also includes the rebuilding of her life after she chose to end her first marriage, raising three children single-handedly and at the same time, building herself a successful career both in the UK and in Pakistan. Reham Khan's story is ultimately one of resilience, strength, courage and conviction. It is the story of a woman who believed in herself and stood up to the world despite the fact that the odds were stacked against her - and ultimately emerged victorious. In clear, crisp prose, Reham Khan tells her story with wit, intelligence and candour. This is a memoir that will engage and surprise readers of all ages and of both genders; to many it will be an inspirational tale from a woman who fought for respect and for her identity on her own terms, a woman who is a survivor, and a winner.

CANCER CONTROL

Random House

An authentic, heartfelt and compelling narrative - straight from the horse's mouth - that reveals for the first time numerous unknown aspects of the life and times of one of the greatest legends of all time who stands out as a symbol of secular India. Dilip Kumar (born as Yousuf Khan), who began as a diffident novice in Hindi cinema in the early 1940s, went on to attain the pinnacle of stardom within a short time. He came up with spellbinding performances in one

hit film after another – in his almost six-decade-long career – on the basis of his innovative capability, determination, hard work and never-say-die attitude. In this unique volume, Dilip Kumar traces his journey right from his birth to the present. In the process, he candidly recounts his interactions and relationships with a wide variety of people not only from his family and the film fraternity but also from other walks of life, including politicians. While seeking to set the record straight, as he feels that a lot of what has been written about him so far is ‘full of distortions and misinformation’, he narrates, in graphic detail, how he got married to Saira Banu, which reads like a fairy tale! Dilip Kumar relates, matter-of-factly, the event that changed his life: his meeting with Devika Rani, the boss of Bombay Talkies, when she offered him an acting job. His first film was *Jwar Bhata* (1944). He details how he had to learn everything from scratch and how he had to develop his own distinct histrionics and style, which would set him apart from his contemporaries. After that, he soon soared to great heights with movies such as *Jugnu*, *Shaheed*, *Mela*, *Andaz*, *Deedar*, *Daag* and *Devdas*. In these movies he played the tragedian with such intensity that his psyche was adversely affected. He consulted a British psychiatrist, who advised him to switch over to comedy. The result was spectacular performances in laugh riots such as *Azaad* and *Kohinoor*, apart from a scintillating portrayal as a gritty tonga driver in *Naya Daur*. After a five-year break he started his ‘second innings’ with *Kranti* (1981), after which he appeared in a series of hits such as *Vidhaata*, *Shakti*, *Mashaal*, *Karma*, *Saudagar* and *Qila*.

Social Justice for Children and Young People John Wiley & Sons

Drug Safety in Developing Countries: Achievements and Challenges provides comprehensive information on drug safety issues in developing countries. Drug safety practice in developing countries varies substantially from country to country. This can lead to a rise in adverse reactions and a lack of reporting can exasperate the situation and lead to negative medical outcomes. This book documents the history and development of drug safety systems, pharmacovigilance centers and activities in developing countries, describing their current situation and achievements of drug safety practice. Further, using extensive case studies, the book addresses the challenges of drug safety in developing countries. Provides a single resource for educators, professionals, researchers, policymakers, organizations and other readers with comprehensive information and a guide on drug safety related issues. Describes current achievements of drug safety practice in developing countries. Addresses the challenges of drug safety in developing countries. Provides recommendations, including practical ways to implement strategies and overcome challenges surrounding drug safety.

A Practical Guide to Mechanical Ventilation Oxford University Press

The only monograph on cytogenetics for the pathologist, this up-to-the-minute reference/text contains the most up-to-date research findings on many important topics in medical genetics – notably FISH (fluorescent in situ hybridization)-based molecular cytogenetic technologies and spectral karyotyping. An excellent resource for cytogeneticists prepar

Research Handbook of Responsible Management Oxford University Press,

Germ cell tumors are relatively rare compared with other malignancies, and compilations of knowledge that encompass the entire spectrum of the disease are lacking. This textbook, written by the foremost authorities in the field, rectifies the situation by discussing in depth a broad range of topics, including biology, epidemiology, pathology, treatment, and late effects. Bearing in mind that germ cell tumors are most prevalent in the adolescent and young adult age group, causes of disease and treatment approaches in pediatric and adult patients are compared and contrasted. By spanning the entire life course, from prenatal origins of disease through to treatment in adults and late effects of treatment, the editors have produced a book that will be of interest to both pediatric and adult oncologists.

Reham Khan Simon and Schuster
This book provides a comprehensive analysis of Waqf management and its impact on socio-economic development, specifically financial inclusion and sustainable development as well as of the legal issues in Waqf management in ISDB member countries and jurisdictions. It explores various aspects of Waqf management in ISDB member countries/jurisdictions as well as in non-Muslim majority countries such as Waqf regulation, its modernization, and relationship to Maqasid Al-Shari'ah; performance of Waqf activities; time and activity-wise distribution of Waqf resource management; the antecedents and consequences of Waqf assets (both physical and cash); the strategies and models to promote Waqf related activities for greater socio-economic development; good governance practices through the formulation of

informed policies for Waqf projects, among others. Comprising different issues and perspectives adopted by various researchers, the work is specifically designed to meet the needs of academics and industry practitioners in the field of Islamic finance.

Pakistan Springer

Cancer control is the term applied to the development of integrated population-based approaches to reduce the incidence and mortality from cancer and to minimize its impact on affected individuals and on the community. The integrated nature of cancer control is reflected in this multi-disciplinary text, the first in this rapidly developing field. *From MTV to Mecca* Thieme Medical Publishers

In the recent past, threats from climate change and unforeseeable environmental extremes to plant growth and productivity have consistently increased. The climate change-driven effects, especially from unpredictable environmental fluctuations, can result in an increased prevalence of abiotic and biotic stresses in plants. These stresses have slowed down the global yields of crop plants. On the other hand, food security for the rapidly growing human population in a sustainable ecosystem is a major concern of the present-day world. Thus, understanding the core developmental, physiological and molecular aspects that regulate plant growth and productivity in a challenging environment is a pivotal issue to be tackled by the scientific community dealing with sustainable agricultural and horticultural practices. Plants are influenced by the adverse environmental conditions at various levels, their different and diverse responses play a significant role in determining their growth, production and the overall

geographical distribution. The chapters in this book focus on the biological mechanisms and fundamental principles that determine how different plant species grow, perform and interact with a challenging environment. This book covers a broad range of topics in plant science, including gene function, molecules, physiology, cell biology and plant ecology, to understand the functioning of plants under harsh environmental conditions. The book elucidates the physiological and molecular mechanisms in different plant species, ecophysiological interactions of plants, interplay between plant roots, arbuscular mycorrhizal fungi and plant growth-promoting rhizobacteria, biosensors for monitoring stress, production of secondary metabolites, stress alleviation processes, and more.

Harsh Environment and Plant Resilience HarperCollins

The recent revolution in molecular biology offers exciting new opportunities for targeted radionuclide therapy. This up-to-date, comprehensive book, written by world-renowned experts, discusses the basic principles of radionuclide therapy, explores in detail the available treatments, explains the regulatory requirements, and examines likely future developments. The full range of clinical applications is considered, including thyroid cancer, hematological malignancies, brain tumors, liver cancer, bone and joint disease, and neuroendocrine tumors. The combination of theoretical background and practical information will provide the reader with all the knowledge required to administer radionuclide therapy safely and effectively in the individual patient. Careful attention is also paid to the role of the therapeutic nuclear physician in coordinating a diverse multidisciplinary

team, which is central to the safe provision of treatment.

THORACIC MALIGNANCIES

Springer Science & Business Media Applied Positive School Psychology is an essential guide to help teachers regain their own and assist the school community in rebuilding their health post-pandemic. While research in positive psychology is thriving, teachers and educational practitioners find it challenging to apply it in their daily practice. This practical book fills the gap between theory and practice and provides practitioners with an evidence-based toolkit on using the positive psychology in their school communities. With contributions from experts in their field, this important resource explores student wellbeing, teacher wellbeing, inclusion, developing positive relationships, creativity, and therapeutic art. Written with the practitioner in mind, Applied Positive School Psychology is a must read for the teaching community and those interested in positive education. It will also be of interest to academics specialising in wellbeing or education, educational psychologists, and education policy makers.

Drug Safety in Developing Countries University Press of Colorado

According to the Convention on the Rights of the Child, the goal of a social justice approach for children is to ensure that children “are better served and protected by justice systems, including the security and social welfare sectors.” Despite this worthy goal, the UN documents how children are rarely viewed as stakeholders in justice rules of law; child justice issues are often dealt with separate from larger justice and security issues; and when justice issues for children are addressed, it is often

through a siloed, rather than a comprehensive approach. This volume actively challenges the current youth social justice paradigm through terminology and new approaches that place children and young people front and center in the social justice conversation. Through international consideration, children and young people worldwide are incorporated into the social justice conversation.

Therapeutic Nuclear Medicine CRC Press

This book explores the relationships between financial inclusion, poverty and inclusive development from Islamic perspectives. Financial inclusion has become an important global agenda and priority for policymakers and regulators in many Muslim countries for sustainable long-term economic growth. It has also become an integral part of many development institutions and multilateral development banks in efforts to promote inclusive growth. Many studies in economic development and poverty reduction suggest that financial inclusion matters. Financial inclusion, within the broader context of inclusive development, is viewed as an important means to tackle poverty and inequality and to address the sustainable development goals (SDGs). This book contributes to the literature on these topics and will be of interest to researchers and academics interested in Islamic finance and financial inclusion.

Advances in Computer Vision and Computational Biology Springer Science & Business Media

Translated from the Urdu by Khushwant Singh. Umrao Jan Ada is perhaps one of the most enigmatic and forgotten female figures in South Asian Literature. The question of her existence, her beauty, her scholarly abilities and her poetic gift

remain a mystery. The book is an account of Umrao's life as a Lucknawi courtesan, a nautch girl, delivered in first person by Umrao herself, and documented by a close friend. Written more than a hundred years ago, the novel recreates the gracious ambience of old Lucknow and takes the reader on a fascinating journey through the palaces of wealthy nawabs, the hideouts of the colorful vagabonds and the luxurious abodes of the city's courtesans.

Islamic Wealth and the SDGs Bloomsbury Publishing USA

With an evolutionary advancement of Machine Learning (ML) algorithms, a rapid increase of data volumes and a significant improvement of computation powers, machine learning becomes hot in different applications. However, because of the nature of "black-box" in ML methods, ML still needs to be interpreted to link human and machine learning for transparency and user acceptance of delivered solutions. This edited book addresses such links from the perspectives of visualisation, explanation, trustworthiness and transparency. The book establishes the link between human and machine learning by exploring transparency in machine learning, visual explanation of ML processes, algorithmic explanation of ML models, human cognitive responses in ML-based decision making, human evaluation of machine learning and domain knowledge in transparent ML applications. This is the first book of its kind to systematically understand the current active research activities and outcomes related to human and machine learning. The book will not only inspire researchers to passionately develop new algorithms incorporating human for human-centred ML algorithms, resulting

in the overall advancement of ML, but also help ML practitioners proactively use ML outputs for informative and trustworthy decision making. This book is intended for researchers and practitioners involved with machine learning and its applications. The book

will especially benefit researchers in areas like artificial intelligence, decision support systems and human-computer interaction.
