As digital transformation has accelerated, the e-commerce landscape has become increasingly dynamic. New players have emerged at the same time that established actors have taken on new roles; some barriers to e-commerce at the firm, individual and country levels have been overcome, while other barriers have emerged. Innovative business models have transformed buyer-seller relationships and pushed out the frontier of what is possible to buy and sell online. *Developing the Digital Economy in ASEAN* OECD Publishing
This textbook offers a comprehensive picture of the world economy, the global business environment, and international business. The book is divided into three parts, the first of which introduces readers to the essentials of the

world economy, including its typology, key concepts and theories, the dynamics of the world economy, and key actors and institutions. It also addresses macroeconomic and financial indicators for economic growth and forecasting and discusses major modern trends and problems, such as the Fourth Industrial Revolution, patterns of globalization, shifts in global economic power, and developmental, social and environmental challenges. In turn, the second part focuses on the global business environments, presenting country and regional studies. The third part addresses macro and micro aspects of international business, featuring contributions on topics such as global economic governance, global capital flows, multinational corporations, global value chains, international trade and its regulation and practice, international knowledge transfer, international labor migration as well as foreign aid, external debt,

and business culture in international business.

The Role of Digital Platforms in the Collection of VAT/GST on Online Sales Springer
Nature
The digital transformation is in full swing and fundamentally changes how we live, work, and communicate with each other. From retail to finance, many industries see an inflow of new technologies, disruption through innovative platform business models, and employees struggling to cope with the significant shifts occurring. This Fourth Industrial Revolution is predicted to also transform Logistics and Supply Chain Management, with delivery systems becoming automated, smart networks created

everywhere, and data being collected and analyzed universally. The Digital Transformation of Logistics: Demystifying Impacts of the Fourth Industrial Revolution provides a holistic overview of this vital subject clouded by buzz, hype, and misinformation. The book is divided into three themed-sections: Technologies such as self-driving cars or virtual reality are not only electrifying science fiction lovers anymore, but are also increasingly presented as cure-all remedies to supply chain challenges. In The Digital Transformation of Logistics: Demystifying Impacts of the Fourth Industrial Revolution, the authors peel back the layers of excitement that have grown around new technologies such as the Internet of Things (IoT), 3D printing, Robotic Process Automation (RPA), Blockchain or Cloud computing, and show use cases that give a glimpse about the fascinating future we can expect. Platforms that allow businesses to centrally acquire and manage their logistics services disrupt an industry that has been relationship-based for centuries. The authors discuss smart contracts,

which are one of the most exciting applications of Blockchain, Software as a Service (SaaS) offerings for freight procurement, where numerous data sources can be integrated and decision-making processes automated, and marine terminal operating systems as an integral node for shipments. In The Digital Transformation of Logistics: Demystifying Impacts of the Fourth Industrial Revolution, insights are shared into the cold chain industry where companies respond to increasing quality demands, and how European governments are innovatively responding to challenges of cross-border eCommerce. People are a vital element of the digital transformation and must be on board to drive change. The Digital Transformation of Logistics: Demystifying Impacts of the Fourth Industrial Revolution explains how executives can create sustainable impact and how competencies can be managed in the digital age - especially for sales executives who require urgent upskilling to remain relevant. Best practices are shared for organizational culture

change, drawing on studies among senior leaders from the US, Singapore, Thailand, and Australia, and for managing strategic alliances with logistics service providers to offset risks and create cross-functional, cross-company transparency. The Digital Transformation of Logistics: Demystifying Impacts of the Fourth Industrial Revolution provides realistic insights, a ready-to-use knowledge base, and a working vocabulary about current activities and emerging trends of the Logistics industry. Intended readers are supply chain professionals working for manufacturing, trading, and freight forwarding companies as well as students and all interested parties. *World Economy and International Business* Springer
This book carries out comprehensive research on the underlying problems regarding the globalization of Chinese enterprises. It also proposes practical solutions for dealing with difficulties in the legal sphere, legislation, international talent development, and financing solutions for Chinese firms going

global. In light of the great opportunities and space for outbound investment, this book also provides insights on how to push forward the Belt and Road Initiative. The insights herein help readers understand the basic state of Chinese enterprises in overseas development and has important reference value for enterprises looking to gain a better understanding of foreign investment strategies, make the most of opportunities and challenges and promote their development at a higher level.

Advanced Topics in Intelligent Information and Database Systems OECD Publishing

The research study "Pathway of Digital Transformation in Logistics" deals with today's logistics challenges, which are increasing speed and the integration of real-time information for data-driven services, implementing new organizational and leadership structures as well as the need for finding approaches for cooperation with new actors such as start-ups or tech companies. Therefore, the study examines four thematic

building blocks central to current developments in logistics: technologies, including platforms, and data-driven services as tools and leadership and organization, as well as open innovation as enablers. The research approach is twofold. First, we investigate the four topics by means of an online questionnaire answered by 120 international participants. Second, a Delphi workshop with 32 logistics experts from industry and LSP reveals further evaluations of success factors and barriers for future developments in logistics. The study describes findings how companies move forward on the path of digital transformation towards smart logistics by presenting and discussing best practice concepts and future developments in logistics. Die Forschungsstudie "Pathway of Digital Transformation in Logistics" beschäftigt sich mit aktuellen Herausforderungen in der Logistik: zunehmende Geschwindigkeit und die Integration von Echtzeitdaten für datengetriebene Services, Implementierung neuer Organisations- und Führungsstrukturen sowie

die Notwendigkeit, Ansätze für die Zusammenarbeit mit neuen Akteuren wie Start-ups oder Technologieunternehmen zu finden. Daher untersucht die Studie vier thematische Bausteine, die für aktuelle Entwicklungen in der Logistik zentral sind: Technologien, einschließlich Plattformen, und datengesteuerte Services als Werkzeuge und Führung und Organisation sowie Open Innovation als Enabler. Der Forschungsansatz ist zweigeteilt. Zunächst untersuchen wir die vier Themen anhand eines Online-Fragebogens, der von 120 internationalen Teilnehmenden beantwortet wurde. Zweitens ergibt ein Delphi-Workshop mit 32 Logistikexpert/innen aus Industrie und Logistikdienstleistung weitere Erkenntnisse über Barrieren und Erfolgsfaktoren für zukünftige Entwicklungen in der Logistik. Die Studie präsentiert Ergebnisse, wie Unternehmen auf dem Weg der digitalen Transformation zur intelligenten Logistik voranschreiten, indem sie Best-Practice-Konzepte und zukünftige Entwicklungen in der

Logistik vorstellt und diskutiert.

Embracing the E-commerce Revolution in Asia and the Pacific

Bentham Science Publishers

Since the end of the Cold War, globalisation has been the dominant political and economic trend. But what is China's role in globalisation? What is China's vision of the world? This title offers a fresh and stimulating account of how China's involvement in globalisation has changed over time, and how its role in leading the "re-globalisation" process is profoundly reshaping the world. Introducing an innovative theoretical framework in the shape of "re-globalisation", this book discusses China's strategies and challenges while interacting with the international community. The book provides several illuminating case studies, such as the Belt and Road Initiative (BRI), the Asian Infrastructure Investment Bank (AIIB), and the strategies of the Chinese technology firm Alibaba. Rich in data and bold in argument, the book provides an extraordinarily dynamic depiction of how China's encounter with the outside world has not only

transformed itself, but also reshaped the global order. As the first systemic and book-length study of "re-globalisation", this volume will appeal to researchers and students of politics and Chinese studies, and contemporary Chinese politics in particular.

Handbook of Research on Supply Chain Resiliency, Efficiency, and Visibility in the Post-Pandemic Era

Asian Development Bank
This book brings together leading international scholars and leading scholars from China's highly prestigious Development Research Centre of the State Council of the People's Republic of China, who all put forward their insights into the current challenges for the Chinese and the world economy. The book focuses on six topics: economic growth, trade, industry and services, innovation, finance, and environment and ecology, all of which are central to the sustainable economic growth of China and the world. Overall, the book provides balanced perspectives as well as rich empirical evidence from China and other parts of the world on the

development and regulation of the Chinese and the world economy. *Developing E-commerce logistics in cross-border relation* ISEAS-Yusof Ishak Institute

Electronic commerce (e-commerce) is rapidly transforming the way in which enterprises are interacting among each other as well as with consumers and governments. Despite important potential benefits, businesses and consumers in developing countries were for a long time slow to exploit e-commerce. As a result of changes in the evolving landscape for information and communications technologies (ICTs), this pattern is now changing, and e-commerce is growing rapidly in emerging markets and developing economies. Against this background, this publication revisits the potential opportunities and risks of e-commerce and examines how countries can benefit the most from the phenomenon in today's Information Society. Using official statistics and private sector data, it provides an up-to-date review of global and regional trends related to e-commerce in view of changes in the ICT

landscape, focusing on developing countries while drawing lessons from developed countries.

Electronic Commerce 2018 Springer Nature

This book contains the results of the latest research on energy-related topics in transportation, economics, and management. The book is composed of select research proceedings of the EMMFT 2019 conference, and covers such issues as energy efficiency in the transport sector, infrastructure, mobile equipment, rail transportation safety and reliability assessment methods, communication and signal, traction power supply, operation organization, and modeling unique transport scenarios. This book also gathers cutting-edge studies on the relationship between energy innovations and economic growth, the impacts of globalization and energy policies of countries on economics and environmental quality, and design and analysis of energy management systems. This book is of considerable interest to engineers, scientists, graduate students, and researchers in the field of transportation

engineering, as well as to professionals working in the energy industries. It is also of use to employees and investors concerned with energy management, including utilities and industry professionals, and regulators.

Cross-Border E-Commerce Marketing and Management John Wiley & Sons

This edition focuses on trade connectivity, which is critical for inclusiveness and sustainable development. Physical connectivity enables the movement of goods and services to local, regional and global markets.

STRATEGIES FOR CHINESE ENTERPRISES GOING GLOBAL

Asian Development Bank
This book advances the international debate on the development of e-commerce with focus on emerging ASEAN economies. It provides readers insights on Asia's needs and efforts to improve the regional legal and economic conditions to support e-commerce. This book looks at the rules and regulations on e-commerce, and e-commerce for inclusiveness growth. It provides insights from several ASEAN member

states and discovers the requirements for Asian countries to better grasp the new juncture of growth associated with economic digitalization, which also have deep implications on continuous regional integration and community-building.

E-COMMERCE, COMPETITION & ASEAN ECONOMIC INTEGRATION

World Bank Publications
The COVID-19 pandemic has adversely affected the supply chains of all sectors of business worldwide. The pandemic has made it evident that by managing supply chains in a traditional manner organizations will no longer be able to achieve profits and improve customer satisfaction. This calls for immediate structural changes in organizations, flexible organizational culture, and a sense of urgency to redefine strategies related to supply chains. The Handbook of Research on Supply Chain Resiliency, Efficiency, and Visibility in the Post-Pandemic Era explores diverse strategies for achieving capabilities related to supply chain resilience

and seeks to expand the existing body of knowledge in this area. It develops models, frameworks, and theoretical concepts related to supply chain resilience to enhance efficiency and improve visibility of supply chains. Covering topics such as change management, production relocation, and supply chain risk, this book is an essential reference for business leaders, corporate executives, industry practitioners, researchers, academicians, educators, and students.

Aid for Trade in Asia and the Pacific European Alliance for Innovation

There are no official statistics on international online trade in goods so far. This paper uses a consumer survey to construct a unique matrix of online B2C domestic and cross-border trade in goods between the 27 EU Member States. We compare online and offline trade patterns for similar goods. We find that the standard gravity model performs well in explaining online cross-border trade flows. The model confirms the strong reduction in geographical distance-related trade costs, compared to offline trade. However, the trade

costs associated with crossing language barriers increase when moving from offline to online trade. Institutional variables such as the quality of legal institutions, online payments facilities and cost efficiency of parcel delivery systems might play a role in cross-border trade but they remain statistically insignificant in this dataset. In a linguistically segmented market like the EU, online home market bias remains high compared to bias in offline cross-border trade. We conclude that it is hard to predict at this stage whether regulators could boost online cross-border trade through improvements in legal and financial systems, and parcel delivery infrastructure.

Information Economy Report 2015 OECD Publishing

This report is part of a broader work program on shaping a more positive narrative on regional integration in South Asia. It is a follow-up to a recent flagship report published by the South Asia Region of the World Bank, *A Glass Half Full: The Promise of Regional Trade in South Asia*. E-commerce is dramatically changing the way goods

and services are transacted nationally, regionally, and globally. It facilitates international trade by reducing the cost of distance and remoteness and can be more inclusive of underrepresented groups such as women, small businesses, and rural entrepreneurs.

Intraregional trade in South Asia is still below its potential, and the region lags behind other parts of the world in activating the potential benefits from e-commerce. Adopting a novel yet practical approach, this report explores how e-commerce can be boosted to deepen intraregional trade in South Asia. It examines the main transacting models in the digital space and the channels through which e-commerce helps reduce transactions costs for firms and consumers. It considers the regulations, as well as the regulatory gaps, affecting private sector participation in e-commerce, focusing on data privacy, consumer protection, delivery, cybersecurity, market-access regulations, and digital payments. Finally, the report presents recommendations for regulatory reforms that could enhance e-trade,

especially in a regional context and as a possible platform for greater global engagement by South Asian firms. The scale of these recommendations ranges from the modest, such as allowing cross-border payments and streamlining the customs regime, to the more ambitious, such as allowing the operation of regional e-commerce platforms and liberalizing related cross-border logistics services.

International Entrepreneurship Springer Nature

This book identifies institutional mechanisms that can be used to promote consumer confidence in direct online sales with businesses (B2C e-commerce). It argues that enhancing the access to justice in a multidimensional sense can potentially offer an effective means of boosting consumer confidence. It introduces a conceptual framework for a multidimensional approach to access to justice in the context of consumer protection, describing the various reasonable criteria needed to satisfy consumer demands in B2C e-commerce. The framework, which reflects all essential aspects of

consumers' expectations when they engage in online transactions, provides a benchmark for the evaluation of various consumer protection mechanisms. Based on an analysis of different mechanisms and using the framework's criteria, the practice of private ordering, which does not rely on the creation of rules of law but rather on the use of technology as a solution, appears to offer a meaningful way to enhance access to justice in B2C e-commerce. However, though private ordering holds considerable potential, certain weaknesses still need to be eliminated. This book demonstrates how private ordering can be successfully implemented with the help of an intermediary, a neutral third party that plays an integral part in the collaborative task of facilitating various aspects of private ordering, thus helping to limit the risks of failure and ensuring a fairer market setting. In order to move forward, it argues that the state, with its wealth of material resources and incentive options, is the institution best suited to acting as an intermediary in facilitating private ordering. This

promising proposal can improve consumer protection, which will in turn boost consumer confidence.

Access to Justice in Transnational B2C E-Commerce United Nations

This publication explores how international trade is promoting economic empowerment through the increased participation of women and micro, small, and medium-sized enterprises. It highlights the roles of services and digital connectivity in facilitating diversification and inclusive economic transformation. The report examines recent trends in aid for trade in Asia and the Pacific and how it can do more to boost inclusive growth.

Unleashing E-Commerce for South Asian

Integration Analysis of Supply Chain Management Factors Influencing Cross-border B2C E-commerce Business in China Information Economy Report 2015
The coronavirus disease (COVID-19) pandemic disrupted both supply and demand sides of an interconnected world economy in 2020. Asia and the Pacific was not immune as lockdowns and travel and trade restrictions affected

nearly all aspects of cross-border economic activity. This publication examines the initial impact on trade, investment, finance, and people's mobility across the region as the pandemic struck. It looks at how regional economies individually or collectively respond to the crisis by, for example, leveraging rapid technological progress and digitalization as well as increasing services trade to reconnect and recover. The theme chapter focuses on digital platforms and how they can accelerate digital transformation across the region.

Re-globalisation IGI Global Through a structured literature review and an exploratory factor analysis, this thesis presents a conceptual framework with 6 key factors composed of 19 indicators, including government, consumer, company, product, operation and partnership, which affecting the development of e-logistics in cross-border relation. Then, a comprehensive competitive strategy is generated based on the framework, including government policy, logistics strategy

selection, differentiated product, dual-channel inventory and transport. Finally, Walmart and JD.com in China market are chosen as case study, the development of their cross-border e-logistics strategy verify the rationality and applicability of the framework found in this thesis. Durch eine strukturierte Literaturrecherche und eine explorative Faktorenanalyse, stellt diese Arbeit einen konzeptionellen Framework mit 6 Schlüsselfaktoren auf, die sich 19 Indikatoren zusammensetzen, die sich auf die Entwicklung der E-Logistik in Cross-Border-Beziehungen auswirken, darunter Regierung, Verbraucher, Unternehmen, Produkt, Betrieb und Partnerschaft. Anschließend wird eine umfassende Wettbewerbsstrategie auf der Grundlage des Frameworks erstellt, einschließlich der Regierungspolitik, der Auswahl der Logistikstrategie, des differenzierten Produkts, des Dual-Channel-Bestands und des Transports. Schließlich werden Walmart und JD.com im chinesischen Markt als Fallstudie

ausgewählt, die Entwicklung ihrer Cross-Border-E-Logistik-Strategie aufgezeigt und Anwendbarkeit des Frameworks demonstriert. *International Scientific Conference Energy Management of Municipal Facilities and Sustainable Energy Technologies EMMFT 2019* Universitätsverlag der TU Berlin

This book is an important outcome of the Fifth World Internet Conference. It provides a comprehensive account of the new trends and highlights of global Internet development over the past year, covering network infrastructure, information technology, digital economy, world internet media, cyber security, and international cyberspace governance. This year, the book improves the Global Internet Development Index System and adds more countries into the assessed list, in order to reflect more comprehensively, objectively and accurately the general situation of the world Internet development and thus to provide reference for all countries in promoting Internet development and governance.
