Mitchell is an alpha among alphas in the brutal Mountain Ridge Pack. He rules with equal parts fear and respect, but his pack is growing restless after decades without an heir to his proverbial throne. Only an alpha and an omega pair can sire another alpha to lead the pack, but Mitchell's not-so-secret shame is the fact that he hasn't been able to impregnate any of his female omegas. Unlike the other weaker packs, the Mountain Ridge wolves have always kept their omegas in line and at a safe distance through the infamous yet efficient Breeding Program. On the recommendation of an old rival turned tentative friend, Mitchell decides to try his hand--among other things--in a last-ditch effort at siring an heir with a rare male omega. When a transfer request for one of the only male omegas in the pack uncovers unspeakable abuse and corruption within the Breeding Program, the very future of the pack is thrown into question. - Angel's heart has turned to stone after a lifetime of abuse at the hands of the alpha shifters who oversee the Breeding Program in his pack unit. The only love he has left belongs to the three other

omegas he shares his little corner of hell with. Angel will do whatever it takes to protect them, even if it means becoming the mate of the top alpha himself. Angel knows better than to believe the gruff Mitchell when he claims that he's not like the others. Despite his best attempts to steel himself against the strange bond that forms between them, Angel discovers that Mitchell is the most dangerous alpha of all because he wants the one thing Angel has sworn never to give--his heart. With war looming on the horizon, a pack in chaos and two hardened hearts melted by an unlikely spark of love, only one outcome is certain. The Mountain Ridge Pack will never be the same. Disclaimer: See inside cover for content warnings. This is the second book in The Mountain Shifters series. Reading His Unclaimed Omega may provide context, but this book can be read as a standalone.

This book examines the lyrical voice of Sophocles' heroes and argues that their identities are grounded in poetic identity and power. It begins by looking at how voice can be distinguished in

Greek tragedy and by exploring ways that the language of tragedy was influenced by other kinds of poetry in late fifth-century Athens. In subsequent chapters, Professor Nooter undertakes close readings of Sophocles' plays to show how the voice of each hero is inflected by song and other markers of lyric poetry. She then argues that the heroes' lyrical voices set them apart from their communities and lend them the authority and abilities of poets. Close analysis of the Greek texts is supplemented by translations and discussions of poetic features more generally, such as apostrophe and address. This study offers new insight into the ways that Sophoclean tragedy inherits and refracts the traditions of other poetic genres.

Presented here is the basic knowledge students need to learn to design analog communications systems and linear control systems operating in an aleatory environment. It enables students to understand standard digital signal processing techniques, and is intended to prepare students for the increasingly high level of mathematical sophistication they will need to comprehend research papers in the IEEE Transcriptions and many other journals, and familiarize them with the development of microprocessing. In addition there are discussions which include Hilbert space, the Karhunen-Loeve expansion, the Gaussian distribution in one and two dimensions and finite length random sequences (accompanied by a computer program that generates them). The book is written in an informal writing style that will hold students' attention while giving maximum flexibility to instructors.

mercilessly, looking down her nose at everyone she deemed unworthy. The most unworthy of them all? The "freak," Manson Reed: her favorite victim. He never should have been able to humiliate her in front of everyone. Losing the game means taking the dare: a dare to serve Manson for the entire night as his slave. It's a dare that Jessica's pride - and curiosity - won't allow her to refuse. What ensues is a dark game of pleasure and pain, fear and desire. God created a game - it's called The Game of Life. Planet Earth is the playing field, the 10 love commandments are the rules, and we humans are the players who can win or lose. The game is played by two teams, like the game of football. One team's head coach is Jesus and the other team's head coach is Satan. All of us on earth are playing for one of these two teams! Gabriel Ansley Erb wrote the book "2028 END" in order to fully elucidate God's game clock scenario for The Game of Life as contained in the game's handbook, the Holy Bible. The handbook says, "God declared the end from the beginning" (Isaiah 46:10) by using 7 days in the creation event. Each 24 hour creation day foretold of a future 1,000 year period for a total 7,000 year plan God had for The Game of Life to be played on planet earth. And amazingly, to confirm this is all true, God hid a secret prophesy in each creation day foretelling the greatest event He had planned to occur in that day's future millennium!Consequently, Creation day 1 foretold Adam & Eve's fall, which was fulfilled during earth's 1st millennium. Creation day 2 foretold Noah's global flood, which was fulfilled during earth's 2nd millennium. Creation day 3 foretold Moses' Red Sea parting, which was fulfilled during earth's 3rd millennium. Creation day 4 foretold of John the Baptist & Jesus Christ, and so they lived and died during earth's 4th millennium. And the prophecies continue with each Creation day!Gabriel proves all of the above, carefully revealing the prophetic Scriptures as well as the fulfillment Scriptures. Then he reveals a dozen Scriptures proving Christ died earth's 4,000 year and will return earth's 6,000 year. Finally, he proves Christ died Feast of Passover AD 28 and will return Feast of Trumpets 2028. For those who read this book, it is an open and shut case: The Game of Life will end 2,000 years from the year of Christ's death on the cross - AD 2028.

WHEN HEROES SING

Pen & Sword Military

Intelligence about the enemy is a fundamental part of any war or battle, knowledge of the enemy's strength, dispositions, and intentions are essential for success. This book reveals that for 250 years the British Army resolutely failed to prepare for war by refusing to establish a nucleus of soldiers in peace, trained to obtain intelligence in war. Although there were Scoutmasters and secret spy organizations such as Walsinghams in the 15th Century, in no major conflict from the Civil War of 1642, including the Peninsula, the Crimea, Burma, Egypt, and South Africa and in

the multitude of small wars that gained Britain an empire, was there any staff branch or unit specifically pre-established to gain intelligence or frustrate the enemy from obtaining intelligence. Yet the story of British military endeavor over 250 years is a remarkable story of individual bravery, achievement, and success. We read of the Scoutmaster whose role was to gather intelligence on the King's enemies and of Walsingham's secret organization at the time of Elizabeth I. During the long years of war against France culminating in the Napoleonic Wars, spymasters developed on an ad hoc basis. In the nineteenth century, despite the power and reach of Empire, no central intelligence organization existed. Enterprising young officers worked wonders but failures such as those in the Boer War cost the Nation dearly. It took the reverses in the Great War to create an Intelligence Corps, but even that was disbanded post-war.
