A Reference Grammar of Modern Standard Arabic is a comprehensive handbook on the structure of Arabic. Keeping technical terminology to a minimum, it provides a detailed yet accessible overview of Modern Standard Arabic in which the essential

aspects of its phonology, morphology and syntax can be readily looked up and understood. Accompanied by extensive carefully-chosen examples, it will prove invaluable as a practical guide for supporting students' textbooks, classroom work or self-study, and will also be a useful resource for scholars and professionals wishing to develop an

understanding of the key features of the language. Grammar notes are numbered for ease of reference, and a section is included on how to use an Arabic dictionary, as well as helpful glossaries of Arabic and English linguistic terms and a useful bibliography. Clearly structured and systematically organised, this book is set to become the standard

guide to the grammar of contemporary Arabic.

style and use are presented in a simple, informative, and non-dogmatic manner, with examples from the language as it is actually spoken. In addition to the usual staple of verbs, nouns, and adjectives, the book covers "little items" such as pronouns, prepositions, prefixes, and discourse ties and "big ones" such as clauses, and sentences. It also touches upon a variety of "how to" questions of

Students and readers more conversant with Hebrew will find interspersed in the text, in clearly demarcated sections, more complex structures and structural explanations, more nuanced discussions of linguistic issues, instructive historical notes and sample texts of diverse genres. REFERENCE GRAMMAR OF AMHARIC

The goal of
the volume is
to shed fresh
light on
Modern

Hebrew from perspectives aimed at readers interested in the domains of general linguistics, typology, and Semitic studies. Starting with chapters that provide background information on the evolution and sociolinguistic setting of the language, the bulk of the book is devoted to usage-based studies of the morphology, lexicon, and syntax of current Hebrew. Based

primarily on original analyses of authentic spoken and online materials, these studies reflect varied theoretical frames-of-reference that are largely model-neutral in approach. To this end, the book presents a functionally motivated, dynamic approach to actual usage, rather than providing strictly structuralist or formal characterizations of particular linguistic

systems. Such a perspective is particularly important in the case of a language undergoing accelerated processes of change, in which the gap between prescriptive dictates of the Hebrew Language Establishment and the actual usage of educated, literate but non-expert speaker-writers of current Hebrew is constantly on the rise. spoken in Cameroon. It presents a detailed and accessible account of the roots and history of the language, clearly situated within both the Niger Congo language group in general and the Grassfield Bantu language sub group specifically. The language portion begins with a descriptive introduction to the sound segments of Mbili and the methods of combining them. It then

moves into the suprasegments of the language, including tone, stress, and intonation; it investigates the interaction of tone, tense, and mood, as well as the distribution of tone and intonation in Mbili. Segmental and suprasegmental phonemes are related in terms of what they require, tolerate, and exclude. The next presentation deals with the morphology of nouns and verbs. On the

one hand it establishes a structural identification of the noun classes and determines a functional and semantic categorization of the classifiers; on the other hand it identifies and relates the temporal, aspectual, and modal categories of Mbili, and also studies the semantics of the verb through a case grammar analysis. Finally, the book approaches syntax through a

clause and sentence level of analysis to explain the nature of sentence structure in a manner related to English sentence structure. The appendix contains a lexicon as well as traditional folk stories and their translations to convey aspects of Cameroonian culture and examples of the nature of the Mbili language.

An Essential Grammar
Cambridge University Press
Meeting the need for a textbook for classroom use after first year Hebrew grammar, Waltke and O'Connor integrate the results of modern linguistic study of Hebrew and years of experience teaching the subject in this book. In addition to functioning as a teaching grammar, this

work will also be widely used for reference and self-guided instruction in Hebrew beyond the first formal year. Extensive discussion and explanation of grammatical points help to sort out points blurred in introductory books. More than 3,500 Biblical Hebrew examples illustrate the points of grammar under discussion. Four indexes (Scripture, Authorities cited, Hebrew

words, and Topics) provide ready access to the vast array of information found in the 40 chapters. Destined to become a classic work, this long-awaited book fills a major gap among modern publications on Biblical Hebrew.

SECOND EDITION

Bloomsbury Publishing Hebrew is regarded as a former living language which ceased to be a native language 1800 years

ago, only to be given a spoken function anew in the late 19th century. Since the re-acquisition of a lost colloquial function has never been documented, Modern Hebrew has become an object of fascination among linguists and laymen alike. In this book the author claims- Modern Hebrew is not a direct continuation of monolingual Semitic Hebrew-

Modern Hebrew was created when Yiddish speaker re-lexified their language to Biblical and Mishnaic Hebrew-Yiddish is a Slavic language, derived from Sorbian and thus, Modern Hebrew is a Slavic Language. These claims raise a number of interesting questions: why do most speakers believe that Modern Hebrew is a Semitic language, what are the contributions

of Modern Hebrew to the typology of diglossia, historical and genetic linguistics, universal grammar, 2nd language acquisition and political science? [Dynamics of Teaching and Learning Modern Hebrew as an Additional Language](#) University of Michigan Press One of the few Hebrew grammar books written with the student in mind rather than the scholar, A

Modern Grammar of Classical Hebrew focuses on pedagogy for the minister who needs to learn Hebrew. This book does a rapid overview of the essentials of grammar and then gets into the original text as students learn new material and review previously learned material. This textbook is geared toward being easily used in the classroom and easily integrated into any

teacher's
teaching
schedule.

A Reference Grammar of Mbilli University Press of America The aim of this book is to enable the student to read, write, and speak acceptable Israeli Hebrew and to understand less complex biblical Hebrew. A unique feature is the author's use of the principles of structural analysis. For students who are not acquainted with a language other than English, he elucidates those features of the language that are unfamiliar in the structure of English. The student is trained, from the first, to read "unvocalized" script as the native reader does, and "reading clues" (word and phrase patterns) are provided for this purpose. The work is organized into sections that can be worked through in an academic year—presentation of features, text samples, exercises, grammatical synopses, and individual and comprehensive glossaries. This text may be used by

teachers without specialized training in linguistics. It can be used by self-teaching students as well as by those at college level, and it will be valuable for immigrants to Israel.
