 Technologies and Approaches to
 Reducing the Fuel Consumption of
 Medium- and Heavy-Duty Vehicles
 evaluates various technologies and
 methods that could improve the fuel
 economy of medium- and heavy-duty
 vehicles, such as tractor-trailers, transit
 buses, and work trucks. The book also
 recommends approaches that federal
 agencies could use to regulate these
 vehicles' fuel consumption. Currently
 there are no fuel consumption standards
 for such vehicles, which account for
 about 26 percent of the transportation
 fuel used in the U.S. The miles-per-gallon
 measure used to regulate the fuel
 economy of passenger cars. is not
 appropriate for medium- and heavy-duty
 vehicles, which are designed above all to
 carry loads efficiently. Instead, any
 regulation of medium- and heavy-duty
 vehicles should use a metric that reflects
 the efficiency with which a vehicle
 moves goods or passengers, such as
 gallons per ton-mile, a unit that reflects
 the amount of fuel a vehicle would use
 to carry a ton of goods one mile. This is
 called load-specific fuel consumption
 (LSFC). The book estimates the
 improvements that various technologies
 could achieve over the next decade in
 seven vehicle types. For example, using
 advanced diesel engines in tractor-
 trailers could lower their fuel
 consumption by up to 20 percent by
 2020, and improved aerodynamics could
 yield an 11 percent reduction. Hybrid
 powertrains could lower the fuel
 consumption of vehicles that stop
 frequently, such as garbage trucks and
 transit buses, by as much 35 percent in

the same time frame.

 LOOKING FOR TROUBLE: Mark Dalton
 isn't sure if he finds trouble or if trouble

finds him. But ever since his wife traded him in for a prettier model, and he traded in his Private Eye business for a Peterbilt, it seems to be everywhere he goes. In this collection of loosely interwoven who-dunnits, Edo van Belkom introduces Mark Dalton, Trucker Detective. Whether he's scooping up pretty hitchhikers with secrets, getting back goods stolen right out from under his nose, making a shady repair shop pay, or solving a racially charged, post-9/11 murder, Dalton is one busy trucker. And truth is, he wouldn't have it any other way.

The icon and legend at last tells his story his way -- without the boring bits Paul Hogan first appeared on Australia's screens in 1971 as a 'tap-dancing knife thrower' on TV talent show *New Faces*. The then father of four and Sydney Harbour Bridge rigger from Granville did it as a dare, but when the network's switchboard lit up, he was invited back. So popular was he with viewers, Hogan became a regular on Mike Willesee's *A Current Affair*. The rest, as they say, is history. In collaboration with his business partner and best friend, John Cornell (who played his sidekick, Strop), 'Hoges' went on to become Australia's favourite TV comedian. His hugely popular comedy shows and appearances in unforgettable and ground-breaking ads for cigarettes, beer and tourism, came to personify Australia and Australians here and overseas, helping to change the perception of who we are as people and as a nation. Then, in 1986, *Crocodile Dundee*, the movie he conceived, co-wrote and starred in, became an international smash hit and earned its star a Golden Globe Award, as well as Oscar and BAFTA nominations. Despite

the fact that Hoges claimed to have retired, many more successful movies followed. Yet even as his star rose ever higher, he always expected someone to grab him by the arm and say, 'What are you doing here? You're just a bloody rigger!' *The Tap-Dancing Knife Thrower* is a funny and candid account of the astonishing life of this 'lucky bastard', as Hoges describes himself. Full of stories never previously shared, and recounted in the comedian's inimitable, funny and self-deprecating style, *The Tap-Dancing Knife Thrower* is Paul Hogan's story told his way - 'without the boring bits'.

Nigel Calder, a diesel mechanic for more than 25 years, is also a boatbuilder, cabinetmaker, and machinist. He and his wife built their own cruising sailboat, Nada, a project they completed in 1984. Calder is author of numerous articles for *Yachting Monthly* and many other magazines worldwide, as well as the bestselling *Boatowner's Practical and Technical Cruising Manual* and

Boatowner's Mechanical and Electrical Manual, both published by Adlard Coles Nautical. Here, in this goldmine of a book, is everything the reader needs to keep their diesel engine running cleanly and efficiently. It explains how diesel engines work, defines new terms, and lifts the veil of mystery that surrounds such engines. Clear and logical, this extensively illustrated guide will enable the reader to be their own diesel mechanic. As Nigel Calder says: 'there is no reason for a boatowner not to have a troublefree relationship with a diesel engine. All one needs is to set the engine up correctly in the first place, to pay attention to routine maintenance, to have the knowledge to spot early warning signs of impending trouble, and to have the ability to correct small ones before they become large ones.'

This book is a re-issue of the War Department's September 1943 edition of TM 9-2800. This technical manual was

the primary US Army reference work of the period and listed data and illustrations of all US Army vehicles in operation at that time. This edition includes a new supplement that contains details of additional US Army vehicles that were omitted from the September 1943 edition. As a further aid, the nomenclature of a number of vehicles has been updated.

Electrical Contracting, Second Edition is a nine-chapter text guide for the greater efficiency in planning and completing installations for the design, installation and control of electrical contracts. This book starts with a general overview of the efficient cabling and techniques that must be employed for safe wiring design, as well as the cost estimation of the complete electrical contract. The subsequent chapters are devoted to other electrical contracting requirements, including electronic motor control, lighting, and electricity tariffs. A chapter focuses on the IEE Wiring Regulations and Statutory Regulations to ensure compliance to the fundamental requirements for safety. The discussion then shifts to visual inspection and testing in accordance with the IEE Wiring

Regulations. The last chapter describes the special role of the Joint Industrial Council for Electrical Installation Contracting in introducing a rational and equitable incomes policy into the industry. This text includes many worked examples and illustrations to demonstrate how the technical and commercial aspects are put into practice.

Operation Market-Garden: Ultra Intelligence Ignored Iconografix

Authors and historians have made the words Market-Garden and intelligence failure virtually synonymous. Is this really the case? Operation Market-Garden, the plan envisioned by Field Marshal Montgomery, would open the gate into Germany and simultaneously force General Eisenhower to abandon his broad-front strategy in favor of his narrow-front strategy. Executed on 17 September 1944, this operation became one of the greatest defeats suffered by the Allies during the Second World War. Until 1974, when the British Government declassified Ultra, no one beyond the producers and consumers of Ultra intelligence knew of its existence. With

the program now declassified, it was learned that Ultra allowed Allied commanders an unprecedented capability to read high-level German messages that were thought to be unbreakable. The release of these documents now showed that senior Allied commanders knew that the 9th and 10th SS Panzer Divisions were located on the corridor that the Allies planned to make their narrow-front thrust on. Despite this new information, numerous authors still continue to describe Market-Garden as an intelligence failure. While intelligence was not perfect in supporting this operation, it is not justifiable to say that Operation Market-Garden failed due to the intelligence systems failure to warn commanders of the threat to the operation.
