Aircraft Maintenance Documentation Slideshare uses cookies to improve functionality and performance, and to provide you with relevant advertising. If you continue browsing the site, you agree to the use of cookies on this website. Aircraft Maintenance Documentation - SlideShare The AMP can (and should) be based on several documents which define the aircraft's maintenance requirements. Let's go through them

one by one: Maintenance Planning Document (MPD) – on first sight, the MPD looks exactly like an AMP. Just like the AMP, it contains a long table with entries for different maintenance tasks.

How to Create an Approved Aircraft Maintenance Program ...

43-9C - Maintenance Records. Describes methods, procedures and practices determined to be acceptable for showing compliance with the general aviation maintenance record-making and record-keeping requirements of Title 14 of the Code of Federal Regulations (14 CFR) parts 43 and 91. This material is issued for guidance and outlines several methods...

AC 43-9C - Maintenance Records – Document Information

documents — maintenance manuals, task cards, and illustrated parts catalogs.

7. Delegate approval from FAA to industry using established Organization Designation Authorization (ODA).

8. Improve usability of manual format, accessibility of manual, and training on manual use.

9. Initiate industry mandate requiring users to address

Technical Documentation Challenges in Aviation Maintenance ...

The maintenance documentation issues extend to the smaller general aviation (GA) aircraft and to all aircraft components but can manifest in different ways. GA operators often lack some of the standardization and documentation is required in air carrier operations.

Technical Documentation Challenges in Aviation Maintenance ...

Aircraft maintenance is the performance of tasks required to ensure the continuing airworthiness of an aircraft or aircraft part, including overhaul, inspection, replacement, defect rectification, and the embodiment of modifications, compliance with airworthiness directives and repair.

Aircraft maintenance - Wikipedia

Aircraft. Certification of aircraft by the FAA ensures that commercial and general aviation aircraft meet the highest safety standards, from initial design to retirement. This page outlines the aircraft certification processes, lists important aircraft safety information, and provides guidance on general aviation aircraft.

Aircraft - Federal Aviation Administration

The goals and objectives are to increase awareness of the importance of and the consequences of not following the Federal Aviation Regulations and proper procedures, as they pertain to aircraft maintenance documentation. Examine the processes for maintaining continuity during shift and task turnovers.

Activities, Courses, Seminars & Webinars - ALC_Content ...

Whilst the MPD is the document required for the initial aircraft operator's maintenance program it is by no means mandatory to comply in every case with subsequent changes to the MRBR. In fact following the accumulation of reliability data it is quite possible for the Maintenance Program tasks to be escalated beyond the initial periodicity.

Where Does the Maintenance Planning Document (MPD) Come ...

Maintenance Programme is a document containing the maintenance requirements/tasks that needs to be carried out on an aircraft in order to ensure its continuing airworthiness.

Description

The maintenance programme must be produced for each aircraft type by the Operator (AOC Holder) and subsequently approved by the NAA .

Maintenance Programme - SKYbrary Aviation Safety

Chapter 5 FACILITY DESIGN INTRODUCTION

Aviation maintenance has many features in common with other industries. The physical facilities in which aviation technicians work, however, are unique. No other industry uses aircraft hangars as its primary worksite. The primary reason for using hangars is obvious, of course.

Chapter 5 FACILITY DESIGN - Federal Aviation Administration

procedures to help prevent aircraft accidents

The problem

Mistakes made while performing aircraft maintenance and inspection procedures have led to in-flight emergencies and fatal accidents. System or component failures are among the most common defining events for fatal accidents across various sectors of general aviation (GA).
