BURNS HARVEY

A Critical Case Review Harvard University Press

A nonfiction collection includes stories featuring mighty submarines and their crews, from the tough subs that harassed the Japanese Navy during World War II to the cat-and-mouse games played by U.S. and Soviet subs during the Cold War.

The Routledge Companion to Performance Management and Control John Wiley & Sons

A healthy building does more than conserve resources: it improves the health and productivity of the people inside. Joseph Allen and John Macomber look at everything from the air we breathe to the water we drink to how light, sound, and materials impact our performance and wellbeing and drive business profit.

Tsunamis Harvard Business Review Classi

Shipping and Logistics Management serves to consolidate the knowledge its authors have acquired from being educators and observers of the shipping industry. Against the background of a global business environment, it explains how the shipping market functions, examining the strategic and operational issues that affect entrepreneurs in this industry. The authors discuss global trends and strategies in the shipping business, looking at the role of logistics service providers and at how the use of information technology can help shipping operations. Shipping and Logistics Management also aims to answer several important questions in the shipping industry, including: what are the shipping cost structures?, what are the patterns of sea transport? and how do companies in the shipping industry operate? An invaluable source of information for researchers and advanced, or graduate, students, Shipping and Logistics Management is also a useful reference for shipping practitioners and consultants.

Research Reviews Elsevier

A strategy text on value creation with case studies The ninth edition of Contemporary Strategy Analysis: Text and Cases focuses on the fundamentals of value creation with an emphasis on practicality. Topics in this edition include: platform-based competition and ecosystems of related industries; the role of strategy making processes; mergers, acquisitions and alliances; and strategy implementation. Within the twenty case studies, students will find leading companies that are familiar to them. This strategy analysis text is suitable for MBA and advanced undergraduate students.

Text and Cases Edition Springer Science & Business Media

Includes annual List of doctoral dissertations in political economy in progress in American universities and colleges; and the Hand book of the American Economic Association.

Harding, Denby, and the U.S. Navy's Trans-Pacific Offensive, World War II John Wiley & Sons

Foreword by Janet Yellen Weijian Shan's Out of the Gobi is a powerful memoir and commentary that will be one of the most important books on China of our time, one with the potential to re-shape how Americans view China, and how the Chinese view life in America. Shan, a former hard laborer who is now one of Asia's best-known financiers, is thoughtful, observant, eloquent, and brutally honest, making him well-positioned to tell the story of a life that is a microcosm of modern China, and of how, improbably, that life became intertwined with America. Out of the Gobi draws a vivid picture of the raw human energy and the will to succeed against all odds. Shan only finished elementary school when Mao Zedong's Cultural Revolution tore his country apart. He was a witness to the brutality and absurdity of Mao's policies during one of the most tumultuous eras in China's history. Exiled to the Gobi Desert at age 15 and denied schooling for 10 years, he endured untold hardships without ever giving up his dream for an education. Shan's improbable journey, from the Gobi to the "People's Republic of Berkeley" and far beyond, is a uniquely American success story - told with a splash of humor, deep insight and rich and engaging detail. This powerful and personal perspective on China and America will inform Americans' view of China, humanizing the country, while providing a rare view of America from the prism of a keen foreign observer who lived the American dream. Says former Federal Reserve chair Janet Yellen: "Shan's life provides a demonstration of what is possible when China and the United States come together, even by happenstance. It is not only Shan's personal history that makes this book so interesting but also how the stories of China and America merge in just one moment in time to create an inspired individual so unique and driven, and so representative of the true spirits of both countries."

The world's foremost experts write about the dynamics of geophysical processes involved in tsunami generation, propagation, and inundation, along with the statistical and geophysical properties of tsunami recurrence, and their application to tsunami forecasts and warnings.

My Story of China and America John Wiley & Sons

Blockchains are the distributed ledger technology that powers Bitcoin and other cryptocurrencies. But blockchains can be used for more than the transfer of tokens - they are a significant new economic infrastructure. This book offers the first scholarly analysis of the economic nature of blockchains and the shape of the blockchain economy. By applying the institutional economics of Ronald Coase and Oliver Williamson, this book shows how blockchains are poised to reshape the nature of firms, governments, markets, and civil society.

Introduction to Institutional Cryptoeconomics

Challenges and Innovations in Ocean In-Situ Sensors: Measuring Inner Ocean Processes and Health in the Digital Age highlights collaborations of industry and academia in identifying the key challenges and solutions related to ocean observations. A new generation of sensors is presented that addresses the need for higher reliability (e.g. against biofouling), better integration on platforms in terms of size and communication, and data flow across domains (in-situ, space, etc.). Several developments are showcased using a broad diversity of measuring techniques and technologies. Chapters address different sensors and approaches for measurements, including applications, quality monitoring and initiatives that will guide the need for monitoring. Integrates information across key marine and maritime sectors and supports regional policy requirements on monitoring programs Offers tactics for enabling early detection and more effective monitoring of the marine environment and implementation of appropriate management actions Presents new technologies driving the next generation of sensors, allowing readers to understand new capabilities for monitoring and opportunities for another generation of sensors Includes a global vision for ocean monitoring that fosters a new perspective on the direction of ocean measurements

This book argues that President Warren Harding and his secretary of navy, Edwin Denby exercised unusual foresight in preparing the navy for a war against Japan. This revised edition adds new evidence from original documents provides invaluable details and insights into the lasting legacy of the Harding administration.

CONTEMPORARY STRATEGY ANALYSIS

Edward Elgar Publishing

Time Domain Electromagnetics deals with a specific technique in electromagnetics within the general area of electrical engineering. This mathematical method has become a standard for a wide variety of applications for design and problem solving. This method of analysis in electromagnetics is directly related to advances in cellular and mobile communications technology, as well as traditional EM areas such as radar, antennas, and wave propagation. Most of the material is available in the research journals which is difficult for a non-specialist to locate, read, understand, and effectively use for the problem at hand. Only book currently available to practicing engineers and research scientists exclusively devoted to this subject Includes contributions by the world's leading experts in electromagnetics Presents the most popular methods used in time domain analysis are included at one place with thorough discussion of the methods in an easily understandable style In each chapter, many simple and practical examples are discussed thoroughly to illustrate the salient points of the material presented All chapters are written in a consistent style that allows the book to be of use for self-study by professionals as well as for use in a graduate-level course in electrical engineering

FAIRPLAY SHIPPING JOURNAL

University Press of America

As established markets become less profitable, companies increasingly need to find ways to create and capture new markets. Despite much investment and commitment, most firms struggle to do this. What, exactly, is getting in their way? The authors of the best-selling book *Blue Ocean Strategy* have spent over a decade exploring that question. They have seen that the trouble lies in managers' mental models--ingrained assumptions and theories about the way the world works. Though these models may work perfectly well in mature markets, they undermine executives' attempts to discover uncontested new spaces with ample potential (blue oceans) and keep companies firmly anchored in existing spaces where competition is bloody (red oceans). This article describes how to break free of these red ocean traps. To do that, managers need to: (1) Focus on attracting new customers, not pleasing current customers; (2) Worry less about segmentation and more about what different segments have in common; (3) Understand that market creation is not synonymous with either technological innovation or creative destruction; and (4) Stop focusing on premium versus low-cost strategies. The Harvard Business Review Classics series offers you the opportunity to make seminal Harvard Business Review articles a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world--and will have a direct impact on you today and for years to come.

Understanding the Blockchain Economy Elsevier

Henry Friendly is frequently grouped with Oliver Wendell Holmes, Louis Brandeis, Benjamin Cardozo, and Learned Hand as the best American jurists of the twentieth century. In this first, comprehensive biography of Friendly, Dorsen opens a unique window onto how a judge of this caliber thinks and decides cases, and how Friendly lived his life.

The Greek Paradigm Routledge

Revised edition of the author's Contemporary strategy analysis, 2013.

Out of the Gobi

Performance management is key to the ongoing success of any organisation, allowing it to meet its strategic objectives by designing and implementing management control systems. This book goes beyond the usual discussion of performance management in accounting and finance, to consider strategic management, human behaviour and performance management in different countries and contexts. With a global mix of world-renowned researchers, this book systematically covers the what, the who, the where and the why of performance management and control (PMC) systems. A comprehensive, state-of-the-art collection edited by a leading expert in the field, this book is a vital resource for all scholars, students and researchers with an interest in business, management and accounting.
