This book highlights the underlying importance of post-stroke complications during recovery, allowing healthcare professionals managing stroke patients to understand their frequency and identify which patients are at risk of developing such complications. Complications are categorised

into neurological and non-neurological, and the time-frame for these complications both in the short-term and long-term are discussed. The common practices in managing post-stroke complications and the skills required in their prevention are described, as is the evidence base from clinical trials around their management. The book concludes with a discussion of new developments and research priorities for the future. Management of Post-Stroke Complications is aimed at members of the multidisciplinary stroke team, stroke physicians, neurologists, general practitioners, stroke specialists in training, and medical students.

The popularity of distance running as a sport, and a recreational activity, is at an all-time high. Motivated by the desire to achieve a personal best, remain healthy, or simply complete an event, distance runners of all ages and abilities actively seek out advice from experienced coaches and sport scientists. This is also reflected in the growth of programmes of education for young coaches and aspiring sport scientists in recent years. There are a multitude of different approaches to training distance runners; however, the basic principles and ingredients required for success are applicable to any distance runner. The science that underpins the training and physical preparation of distance runners has developed considerably in recent years. The most experienced and successful coaches in the distance running community rarely have the opportunity to share their tried and tested methods of training. Similarly, the novel work of sport scientists is often only accessible to elite runners, their support teams and academia. The Science and Practice of Middle and Long Distance Running links together the science and coaching artistry associated with preparing distance runners for events ranging from 800 m up to ultra-marathon distances. It combines the latest scientific evidence, published by world-leading sport scientists, with the sound training principles and strategies adopted by experienced coaches. The book translates cutting-edge scientific research from the fields of physiology, biomechanics, psychology and nutrition into practical suggestions for achieving success. Important topical issues and contemporary practices related to health and performance are also addressed. This book is an essential addition to the library of any distance runner, coach or sport scientist.

*Energy Medicine East and West: A Natural History of Qi* provides a unique, comprehensive overview of Qi or bioenergy for students and practitioners of energy medicines, Chinese and Oriental Medicine, and all disciplines of Complementary and Integrative Medicine. Mayor and Micozzi start with a comparative historical account of the ancient concepts of Qi and vital energy before covering theories of Qi, a discussion of the organized therapeutic modalities based upon Qi and its applications to specific health and medical conditions. Contributions are included from international experts in the field. The book moves from anatomical and bioenergetic complementarity of Western vital energy and Eastern Qi, through convergence of perspectives and models to demonstrations of how the traditional therapies are being melded together in a new, original and creative synthesis. David Mayor and Marc Micozzi are experienced medical practitioners, authors and editors. David Mayor has been actively involved in bioenergy research, practice and publishing for over 30 years, and is author/editor of *Electroacupuncture: A practical manual and resource* (2007), as well as other acupuncture texts and studies. Marc Micozzi is Professor in the Department of Physiology and Biophysics at Georgetown University School of Medicine, Washington, DC. As author/editor of *Fundamentals of Complementary & Alternative Medicine*, 4E (2011), and 25 other books, he has been writing, editing and teaching on bioenergy, Qi and related topics for 20 years. Endorsements "This wonderful book has assembled some 25 authors expressing well a view of qi which entirely does justice to its nature. Meticulously referenced, it is a milestone to set beside Maciocias *Foundations of Chinese Medicine* and *Deadmans Manual of Acupuncture*. Here at last are the beginnings of a true science of qi...There is truly nothing like it in contemporary literature. Alone, it lays the foundation for the beginnings of a modern science of qi."Richard Bertschinger,

Acupuncturist and translator, Somerset, UK. "This book offers a timely and thorough examination of the experience and nature of qi, including a series of fascinating philosophical discussions with a direct application to our patients. Required reading for acupuncture practitioners seeking to justify and clarify their clinical reasoning."Val Hopwood PhD FCSP, Physiotherapist, acupuncturist, researcher and educator; Course director, MSc Acupuncture, Coventry University, UK. "Over the last decade most books on Asian medicine paid tribute to the aura of evidence-based medicine - experience counted little, RCTs were convincing. This book, at last, returns to an old tradition of debate, opening up quite a few new horizons. Reading it, my striving for knowledge was married with enjoyment and happiness. This book made me happy!" Thomas Ots MD PhD, Medical acupuncturist specialising in psychiatry, Graz, Austria; Editor-in-Chief, *Deutsche Zeitschrift für Akupunktur*. "To simply review the chapter headings is to know the truly remarkable expanse of this book...a wonderful bridge between the mysteries of the East and the sciences of the West...well documented, well written, and enlarging both. Enlightening...nicely depicts outstanding advances in energy psychotherapeutics, thus ultimately helping to move forward the human condition."Maurie D Pressman MD, Emeritus Clinical Professor of Psychiatry, Temple University School of Medicine, Philadelphia, PA; Emeritus Chairman of Psychiatry, Albert Einstein Medical Center, Philadelphia PA; past President, International Society for the Study of Subtle Energies and Energy Medicine, Lafayette, CO, USA.
