Your kids will love this storybook-creator notebook! It will keep them busy during rainy days, or whenever they need "something to do." They won't get bored, because they'll be entertaining themselves! Story paper is ideal for young children who are learning how to write and properly proportion letters (approximately Kindergarten - third grade). It may also be useful for older children who have delays with handwriting. Our story paper has a measured space at the top for a title, then a picture box for the child to draw an illustration and then five lines for the child to write their story. Each measured space consists of two lines (top and bottom) .65" apart and a dotted line in the center to

guide the child as they write. You may enjoy creating themed story books to reflect different childrens' interests or school subjects. It's a great way for children to get down their ideas for starting a new project, with a space for drawing up their plans, as well as practicing their writing. Fun and colorful journal for kids to use as they wish. The big 8.5" X 11" page is also helpful for young hands and fingers as they learn their fine motor control skills.

Exploring identity as a contemporary concern in everyday life and in the social sciences, this book focuses on how ideas about identity can be applied to organization and management studies. The contributors, all respected authorities

in the field, use and develop recent philosophical thought on the nature of identity, and question the key social divisions of gender, class and nation. Bringing approaches from contemporary philosophy into the area of organization theory, this book critically assesses their relevance and impact in a way which interrupts identity as a notion.

### SOFTWARE ENGINEERING ECONOMICS

Paul Mellon Ctr for Studies

"But this book is less concerned with a single utopian dream than with the complex stories of a great number of utopianist realities. It deals with the efforts as much as with the results, investigating the creation of institutions by charting the interaction of the diverse agendas of designers, educationalists, sociologists and politicians, tied, as they were, into each country's own traditions."--BOOK JACKET.

*The Visual Aural Digit Span Test* Routledge "This issue deals with a number of the salient statistical series which are presented in the report issued by the federal government entitled Social Indicators II, which appear late in 1980. As

in previous reports of this kind, the focus is on a number of indicators rather than on a single global indicator" --
