Gender Diversity in European Sport Governance Springer

The Shroud of Turin is the most important and studied relic in the world. The many scientific studies on the relic until today have failed to provide conclusive answers about the identity of the enveloped man and the dynamics regarding the image impressed therein. This book not only addresses these issues in a scientific and objective manner but also leads the reader through new search paths. In the second edition, besides including some of the most recent findings on the Shroud, the authors follow the many tips and comments received from readers. The Shroud's dating by means of alternative methods has not been free from controversies, some of which have even implied the non-authenticity of the Shroud's samples tested. So the authors duly expand Chapter 7 to include the proof of the origin of the samples used in the recent scientific research and also address the provenance and the path of the original sample. Furthermore, a new section contains a personal interview with the authors that is the result of the interesting and praiseworthy work of a Bavarian high school student. Although there are many books on the subject, none contains such a formidable quantity of scientific news and reports. Unique in its genre, this book is a powerful tool for those who want to study the Turin Shroud deeply.

[The Investigation of the Physical World](#) John Wiley & Sons

Originally published in Italian in 1976, this book describes the methods scientists use to investigate the physical world. It is ideal for students and teachers of science and the philosophy of science. It is both a high-level popularization and a critical appraisal of these methods, describing important

advances in physics and analyzing the historical development, value, reliability and philosophical implications of the way physicists approach the problems confronting them. The introductory chapter on the meaning of physical theories and the mathematical tools used to develop them is followed by a general discussion on the foundations of physics under four major headings: the physics of the reversible, the physics of the irreversible, microphysics, and cosmology. Throughout, the subject matter of physical theories is linked to discussion of the attendant philosophical and epistemological implications, such as the validity of the theories, inductive inference, causal explanation, probability, the role of observation and the reality of physical objects.

As a result of its Clarity Project, the Auditing Standards Board (ASB) has issued Statement on Auditing Standards (SAS) No. 128, Using the Work of Internal Auditors, to supersede SAS No. 65, The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements (AICPA, Professional Standards, AU sec. 322 and AU-C sec. 610), and amend: SAS No. 122, Statements on Auditing Standards: Clarification and Recodification, section 315, Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement (AICPA, Professional Standards, AU-C sec. 315); Various other sections in SAS No. 122 (AICPA, Professional Standards, AU-C secs. 200, 220, 230, 240, 260, 265, 300, 402, 500, 550, and 600); and Statement on Quality Control Standards No. 8, A Firm's System of Quality Control (Redrafted) (AICPA, Professional Standards, QC sec. 10). SAS No. 128 addresses the external auditor's responsibilities when using the work of internal auditors if it includes (a) using the work of the internal audit function in obtaining audit evidence and (b) using internal auditors to provide direct assistance under the direction, supervision, and review of the external auditor. Consistent with International Standard

on Auditing (ISA) 610 (Revised 2013), SAS No. 128 introduces the concept of a systematic and disciplined approach, which is not included in SAS No. 65. Paragraph 13 of SAS No. 128 would require, among other things, as a prerequisite to being able to use the work of the internal audit function, that the external auditor evaluate the application by the internal audit function of a systematic and disciplined approach, including quality control. Paragraphs A12-A14 of SAS No. 128 provide application guidance with regard to the application of a systematic and disciplined approach. The ASB believes that relative to SAS No. 65, this requirement represents an additional and explicit evaluation that the external auditor would need to perform to conclude on the appropriateness of using the work of internal auditors.

Widens traditional concepts of forensic science to include humanitarian, social, and cultural aspects Using the preservation of the dignity of the deceased as its foundation, Forensic Science and Humanitarian Action: Interacting with the Dead and the Living is a unique examination of the applications of humanitarian forensic science. Spanning two comprehensive volumes, the text is sufficiently detailed for forensic practitioners, yet accessible enough for non-specialists, and discusses both the latest technologies and real-world interactions. Arranged into five sections, this book addresses the 'management of the dead' across five major areas in humanitarian forensic science. Volume One presents the first three of these areas: History, Theory, Practice, and Legal Foundation; Basic Forensic Information to Trace Missing Persons; and Stable Isotopes Forensics. Topics covered include: Protection of The Missing and the Dead Under International Law Social, Cultural and Religious Factors in Humanitarian Forensic Science Posthumous Dignity and the Importance in Returning Remains of the Deceased The New Disappeared - Migration and Forensic Science Stable Isotope Analysis in Forensic Anthropology Volume Two covers two further areas of interest: DNA Analysis and the Forensic Identification Process. It concludes with a comprehensive set of case studies focused on identifying the deceased, and finding missing persons from around the globe, including: Forensic Human Identification from an Australian Perspective Skeletal Remains and Identification Processing at the FBI Migrant Deaths along the Texas/Mexico Border Humanitarian Work in Cyprus by The Committee on Missing Persons (CMP) Volcán De Fuego Eruption - Natural Disaster Response from Guatemala Drawing upon a wide range of contributions from respected academics working in the field, Forensic Science and Humanitarian Action is a unique reference for forensic practitioners, communities of humanitarian workers, human rights defenders, and government and non-governmental officials.

This book represents a collection of articles and papers by selected participants to the first Banking Board Academy, seminar jointly organized by Università G. Marconi and Oliver Wyman SPP. Today's environment puts unprecedented demands on board members in financial services firms and beyond. Geopolitical, secular and macro-economic trends pose shift towards a new normal. We have initiated The Banking Board Academy to provide an instructive and informative forum to allow private and public sector stakeholders to connect and discuss how this changing order impacts their role and position within the bank.

THE CONSERVATION OF CULTURAL LANDSCAPES

Springer Science & Business Media

This book deals with the process of the diffusion of cohabitation in Europe and discusses its impact upon fundamental changes in family formation. It makes use of highly dynamic statistical modelling that takes into account both changes occurring along the life course (individuals' biographies) and across birth cohorts of individuals (generational change) in a comparative perspective. It is thus innovative methodologically, but is written in such a way as to be easily readable by those with little knowledge of quantitative methods. The approach proposed is empirically tested on a selection of European countries: the social democratic Sweden, the conservative-corporatist France and West Germany, the former socialist East Germany, and the familistic Italy and Spain. The theory and its application are described in a clear and simple manner, making the arguments and their illustrations accessible to those from a variety of disciplines. The study shows evidence of the 'contagiousness' of cohabitation, providing new insights on a process relevant to many social science debates. It is thus directed to those interested in the mechanisms driving social and cultural change, the nature of demographic changes, as well as diffusion processes.

The Standard(tm) Drone Logbook is the perfect place for hobbyists and drone operators to begin recording their flight time and experience. Log flight or mission details including date, make & model of aircraft being flown, aircraft identification, takeoff location, landing location, aircraft category (multi-rotor, single rotor, fixed wing), flight conditions, types of operating time,

instruction received, PIC time, number of flights, number of takeoffs and landings, and total duration of flight. There is also a column to record special remarks related to the mission. A ground instruction log and maintenance log are also included, as well as a summary page to record flight time specific to make, model, dual instruction, and PIC time. Gray, soft cover, 7-3/4" x 4-1/8", 16 pages. With so many options, there is a logbook that's right for you. The Standard(tm) logbooks are versatile, easy-to-use, and flexible enough to fit any drone pilot's needs.

Cohabitation, Family & Society Bloomsbury Publishing

Thought-provoking and accessible in approach, this book offers a classic introduction to European law. Taking a clear structural framework, it guides the student through the subject's core elements from its creation and enforcement to the workings of the internal market. A flowing writing style combines with the use of illustrations and diagrams throughout the text to ensure the student understands even the most complex of concepts. This succinct and enlightening overview is required reading for all students of European law.

Financial reporting and Accounting Standards Université de Bruxelles

This book is built upon the outcomes of the EUfam's Project, financially supported by the EU Civil Justice Programme and led by the University of Milan. Also involved are the Universities of Heidelberg, Osijek, Valencia and Verona, the MPI in Luxembourg, the Italian and Spanish Family Lawyers Associations and training academies for judges in Italy and Croatia. The book seeks to offer an exhaustive overview of the regulatory framework of private international law in family and succession matters. The book addresses current features of the Brussels Ila, Rome III, Maintenance and Succession Regulations, the 2007 Hague Protocol, the 2007 Hague Recovery Convention and new Regulations on Property Regimes. The contributions are authored by more than 30 experts in cross-border family and succession matters. They introduce social and cultural issues of cross-border families, set up the scope of all EU family and succession regulations, examine rules on jurisdiction, applicable law and recognition and enforcement regimes and focus on the current problems of EU family and succession law (lis pendens in third States, forum necessitatis, Brexit and interactions with other legal instruments). The book also contains national reports from 6 Member States and annexes of interest for both legal scholars and practitioners (policy guidelines, model clauses and protocols).

Gender equality is one of the founding democratic principles of the EU. However, recent studies of the Federation of Olympic Sports in Europe have shown that women occupy only fourteen percent of decision-making positions in sport organizations. This book presents a comprehensive and comparative study of how various regions and countries of Europe have addressed this lack of gender diversity, discussing which strategies have brought about change and to what extent these changes have been successful. With contributions from leading sport sociologists, covering countries such as Germany, Hungary, Norway, Poland, Spain, Turkey and the UK, it provides a foundation for future policymaking, methodological analyses and theoretical developments that can result in sustainable gender equality in European sport governance. Gender Diversity in European Sport Governance is important reading for scholars and students in the fields of sociology of sport, sport management, sociology, gender studies and studies of organization, management and leadership. It is also a valuable resource for policy makers in the EU, as well as national sport organizations and activists.

More than a tenth of the land mass of the UK comprises 'urban fringe': the countryside around towns that has been called 'planning's last frontier'. One of the key challenges facing spatial planners is the land-use management of this area, regarded by many as fit only for locating sewage works, essential service functions and other un-neighbourly uses. However, to others it is a dynamic area where a range of urban and rural uses collide. Planning on the Edge fills an important gap in the literature, examining in detail the challenges that planning faces in this no-man's land. It presents both problems and solutions, and builds a vision for the urban fringe that is concerned with maximising its potential and with bridging the physical and cultural rift between town and country. Its findings are presented in three sections: the urban fringe and the principles underpinning its management sectoral challenges faced at the urban fringe (including commerce, energy, recreation, farming, and housing) managing the urban fringe more effectively in the future. Students, professionals and researchers alike will benefit from the book's structured approach, while the global and transferable nature of the principles and ideas underpinning the study will appeal to an international audience.

The study of Asia and its plural legal systems is of increasing significance, both within and outside Asia. Lawyers, whether in Australia, America or Europe, or working within an Asian jurisdiction, require a sound knowledge of how the law operates across this fast-growing and diverse region. Law and Legal Institutions of Asia is the first book to offer a comprehensive assessment of eleven key jurisdictions in Asia - China, Hong Kong, Taiwan, Japan, Korea, Vietnam, Malaysia, Indonesia, Brunei Darussalam, Singapore and the Philippines. Written by academics and practitioners with particular expertise in their state or territory, each chapter uses a breakthrough approach, facilitating cross-jurisdictional comparisons and giving essential insights into how law functions in different ways across the region and in each of the individual jurisdictions.

This book offers a clear and comprehensive introduction to the policy area of multilingualism and to translation practice within the EU institutions. This first edition in English builds on the success,

among academics and practitioners alike, of its two preceding Italian editions (published respectively in 2003 and 2007 with the title 'Tradurre per l'Unione europea', Milan, Hoepli), which have closely followed the EU journey through its successive enlargements, and the impact of these multiple accessions on the politics and practice of institutional translation. It proposes an in-depth, up-to-the-minute analysis of the direct relationships between member-state languages and the problems of knowledge transfer between the diverse languages and cultures that make up the patchwork which is the EU. Enriched throughout with practical examples from many among the twenty-four official languages of the European Union, specially selected and adapted for an Anglophone readership, *The Language of Europe* features detailed studies on the following topics: the background to and arguments in favour of EU multilingualism; the language features of EU documents; variations in translation practice between the different EU institutions, agencies and consultative bodies; the day-to-day working practice of translators and lawyer-linguists; the impact of ICT on translation practice; distinctive genres of EU institutional translation; what the future holds for EU translation. The volume incorporates a range of sample texts from a variety of EU official languages, provided in the source-language original and English target-language translation, in order to give the student and specialist an insight into and overview of the rigour and procedural expertise which are demanded and can be seen at work from initial (co-)draft to final version in the rendering of a "multilingual" EU document.

Drone Logbook G Giappichelli Editore

Based on the expertise of thirty leading experts on confiscation in the EU, this is the first book to analyse the practice of proceeds from crime confiscation in the original fifteen EU Member States. It examines the implementation of confiscation provisions in all three (investigative, judicial and disposal) phases of confiscation proceedings. It quantifies the enforcement of confiscation

provisions in the EU, using an innovative and unique methodology and thereby furnishes understanding of obstacles and best practices. The conclusion of the book is that the 'tough on criminal wealth' philosophy is largely alien to the everyday practice of law enforcement agencies. Putting criminals behind bars is still the main aim of the system, and most of the scarce resources available are devoted to achieving this. This title is of interest to academics and students in the fields of criminology, sociology, and law, as well as to law enforcement officers, public prosecutors, and policymakers.

Management of Periprosthetic Joint Infections (PJIs): Management of PJIs discusses periprosthetic joint infection (PJI), a fairly rare occurrence that is nonetheless one of the most serious complications in joint replacement surgery. Intricate interactions between the pathogen, the host, and the implant can result in PJIs which are not only physically devastating for the patient, but also financially crippling for health authorities and insurance companies. Actions taken to minimize the risk of PJIs can be extremely challenging for the orthopaedic community. Consequently, new research, which is detailed in this comprehensive book, is being undertaken to minimize and manage these challenging infections. Provides essential background knowledge on the mechanisms and identification of PJIs Dedicated chapters focus on the complex, but vital eccentricities between PJIs in different areas of the body Contains contributions from a mixture of clinical and academic experts in the field, thus ensuring balanced coverage

This student version of a classical professional text provides a rigorous, yet highly readable, introduction to the theory and practice of auditing. The emphasis throughout is on the need for audit efficiency as well as audit effectiveness and the student is constantly reminded of the need to inject efficiency considerations into strategy decisions for each audit.
