PHI Learning Pvt. Ltd. Accounting is often referred to as the language of business. The primary purpose of this book is to help managers and business owners from diverse professional and educational backgrounds to (1) converse more effectively with their accounting and finance colleagues; (2) understand the structure and the elements of general purpose financial

statements; (3) identify both the usefulness and the limitations of accounting information; (4) prepare budgets and financial forecasts; and (5) make sense of commonly used decision-making models. The theory is flawlessly combined with the practical elements taken from the top-notch multinational companies of the country to provide the students an analytical insight into the current market scenario. **NEW TO THE THIRD EDITION** □ Incorporates a new chapter on 'Introduction to IFRS and Ind AS'. □ Presents two caselets at the end of chapter on 'Depreciation, Reserves
