 William Minter
 “Engrossing and even at times uplifting, Scott-Heron’s self-portrait grants us insights into one of the most influential African American musicians of his generation.” —Booklist
 The stunning memoir of Grammy Lifetime Achievement Award winner Gil Scott-Heron, *The Last Holiday* has been praised for bringing back to life one of the most important voices of the last fifty years. *The Last Holiday* provides a

remarkable glimpse into Scott-Heron’s life and times, from his humble beginnings to becoming one of the most influential artists of his generation. The memoir climaxes with a historic concert tour in which Scott-Heron’s band opened for Stevie Wonder. The Hotter than July tour traveled cross-country from late 1980 through early 1981, drumming up popular support for the creation of Martin Luther King Jr. Day. King’s birthday, January 15, was marked with a massive rally in

Washington. A fitting testament to the achievements of an extraordinary man, *The Last Holiday* provides a moving portrait of Scott-Heron’s relationship with his mother, personal recollections of Stevie Wonder, Bob Marley, John Lennon, Michael Jackson, Clive Davis, and other musical figures, and a compelling narrative vehicle for Scott-Heron’s insights into the music industry, the civil rights movement, governmental hypocrisy, and our wider place in the world. The

Last Holiday confirms Scott-Heron as a fearless truth-teller, a powerful artist, and an inspiring observer of his times. “Leave it to Scott-Heron to save some of his best for last. This posthumously published memoir is an elegiac culmination to his musical and literary career. He’s a real writer, a word man, and it is as wriggling and vital in its way as Bob Dylan’s *Chronicles: Volume One*.” —The New York Times “Even after his death, Scott-Heron continues to mesmerize

us in this brilliant and lyrical romp through the fields of his life. . . . [A] captivating memoir.” —Publishers Weekly, starred review
Neo-Colonialism Pluto Press
 Chronicles the life and political activism of the Guyanese historian told through interviews with some of the people closest to him.
Walter Rodney Speaks Black Classic Press
 The essays in this collection examine the life-histories of carefully chosen megalithic

monuments, stelae and statue-menhirs, and rock art sites of various European and Mediterranean regions during the Iron Age and Roman and Medieval times. By focusing on the concrete interaction between people, monuments, and places, the volume offers an innovative outlook on a variety of debated issues. Prominent among these is the role of ancient remains in the creation, institutionalization, contestation, and negotiation of social

identities and memories, as well as their relationship with political economy in early historic European societies.

How Europe

Underdeveloped Africa

Verso Books

The fact that 50% of the world's currently impoverished is African is a calculated result of European and American neocolonialism in Africa, a concept Dr. Walter Rodney could only begin to analyze. What he did thoroughly recognize is that "in order to understand present

economic conditions in Africa, one needs to know why it is that Africa has realized so little of its natural potential, and one also needs to know why so much of its present wealth goes to non-Africans who reside for the most part outside of the continent." I wrote this book for two reasons. One, Walter Rodney's *How Europe Underdeveloped Africa* is arguably the most brilliant and influential book I've personally ever read. As a social studies teacher, I can't teach a world

history, economics, or global issues lesson without somehow referring to it. Same thing goes for many of the books I've written. However, with all due respect to Dr. Rodney who himself even realized that "ideally an analysis of underdevelopment should come even closer to the present than the end of the colonial period in the 1960s. The phenomenon of neo-colonialism cries out for extensive investigation in order to formulate the strategy and tactics of African

emancipation and development. [How Europe Underdeveloped Africa] does not go that far," but How Europe and America Are Still Underdeveloping Africa does. Moreover, several current issues related to neocolonial underdevelopment in Africa, which are again beyond the scope of Rodney's original volume, need special emphasis, such as the tyrannical role of the International Monetary Fund and its Structural Adjustment Policies, the

assassinations of several socialist African leaders like Muammar Gaddafi, water privatization, the external debt crisis, global warming, environmental racism, the scramble for African oil, genetically modified food with "Terminator" technology, land grabbing for agrofuel production and export, AFRICOM, endemic African-on-African violence, joblessness, food insecurity and imported food dependency, father hunger, endemic HIV/AIDS, toxic waste

colonialism, and hazardous drug trials led by and for the principal benefit of Western pharmaceutical companies. Two, is the impact of the image of Africa accepted by African-Americans on our collective self-concept. The image of Africa internalized by African-Americans largely determines our self-concept and self-confidence, and if that image is egregiously negative, then we, especially African-Americans, should have

access to the true reasons why this image exists. The situations that this negativity is based on are often blamed on corrupt, rapacious, immoral African leaders and the haplessly apathetic African masses, with little if any mention of the fact that European and American governments and multinational corporations are still intentionally underdeveloping Africa.

HAMMER AND HOE

East African Publishers
Hirji makes a case that

Rodney's seminal work retains its value for understanding where Africa has come from, where it is going, and charting the path towards genuine development for its people. It is a succinct, coherent defence of an intellectual giant who lived and died for humanity, an essential read for anyone interested in Africa.

In this ambitious work, first published in 1983, Cedric Robinson demonstrates that efforts to understand Black people's history of resistance solely through the prism of Marxist theory are incomplete and inaccurate. Marxist analyses tend to presuppose European models of history and experience that downplay the significance of Black people and Black

communities as agents of change and resistance. Black radicalism, Robinson argues, must be linked to the traditions of Africa and the unique experiences of Blacks on Western continents, and any analyses of African American history need to acknowledge this. To illustrate his argument, Robinson traces the emergence of Marxist ideology in Europe, the resistance by Blacks in historically oppressive environments, and the influence of both of these traditions on such

important twentieth-century Black radical thinkers as W. E. B. Du Bois, C. L. R. James, and Richard Wright. This revised and updated third edition includes a new preface by Tiffany Willoughby-Herard, and a new foreword by Robin D. G. Kelley.

This book explores how African countries can convert their natural resources, particularly oil and gas, into sustainable development assets.

Using Ghana, one of the continent's newest oil-producing countries, as a lens, it examines the "resource curse" faced by other producers - such as Nigeria, Angola, and Equatorial Guinea - and demonstrates how mismanagement in those countries can provide valuable lessons for new oil producers in Africa and elsewhere. Relying on a broad range of fieldwork and policymaking experience, Panford suggests practical measures for resource-rich developing countries

to transform natural resources into valuable assets that can help create jobs, boost human resources, and improve living and working conditions in Ghana in particular. He suggests fiscal, legal, and environmental antidotes to resource mismanagement, which he identifies as the major obstacle to socioeconomic development in countries that have historically relied on natural resources.

Women's Liberation and the African

Freedom Struggle

Pathfinder Press (NY)

The book traces the experience of a young East Indian migrant girl from an agricultural village called Rajipur in Uttar Pradesh, India. Lakshmi led a simple, carefree life, which changed when she lost her family in the floods of 1860 and faced neglect and abuse. Desperate for a better life and good pay, she accepted a local recruiter's offer of work in Guyana. Before leaving, Lakshmi married a young man she met at the

Emigration Office in Calcutta - it was a marriage of convenience to ensure her safety as she embarked into the unknown. The book reflects on Lakshmi's family, history and culture which, despite the arduous conditions of indentureship, are evident in Guyanese society today.

Imperialism and Underdevelopment in Nigeria

UNC Press Books

Early in life, Walter Rodney became a major revolutionary figure in a dizzying range of locales

that traversed the breadth of the Black diaspora: in North America and Europe, in the Caribbean and on the African continent. He was not only a witness of a Pan-African and socialist internationalism; in his efforts to build mass organizations, catalyze rebellious ferment, and theorize an anti-colonial path to self-emancipation, he can be counted among its prime authors. Decolonial Marxism records such a life by collecting previously unbound essays written

during the world-turning days of Black revolution. In drawing together pages where he elaborates on the nexus of race and class, offers his reflections on radical pedagogy, outlines programs for newly independent nation-states, considers the challenges of anti-colonial historiography, and produces balance sheets for a dozen wars for national liberation, this volume captures something of the range and power of Rodney's output. But it also demonstrates the

unbending consistency that unites his life and work: the ongoing reinvention of living conception of Marxism, and a respect for the still untapped potential of mass self-rule.

WALTER RODNEY

Verso Books

The classic work of political, economic, and historical analysis, powerfully introduced by Angela Davis In his short life, the Guyanese intellectual Walter Rodney emerged as one of the leading thinkers and

activists of the anticolonial revolution, leading movements in North America, South America, the African continent, and the Caribbean. In each locale, Rodney found himself a lightning rod for working class Black Power. His deportation catalyzed 20th century Jamaica's most significant rebellion, the 1968 Rodney riots, and his scholarship trained a generation how to think politics at an international scale. In 1980, shortly after founding of the Working

People's Alliance in Guyana, the 38-year-old Rodney would be assassinated. In his magnum opus, *How Europe Underdeveloped Africa*, Rodney incisively argues that grasping "the great divergence" between the west and the rest can only be explained as the exploitation of the latter by the former. This meticulously researched analysis of the abiding repercussions of European colonialism on the continent of Africa has not only informed decades of scholarship and activism,

it remains an indispensable study for grasping global inequality today.

The Russian Revolution
NYU Press

While Africa is too often regarded as lying on the periphery of the global political arena, this is not the case. African nations have played an important historical role in world affairs. It is with this understanding that the authors in this volume set out upon researching and writing their chapters, making an important collective contribution to

our understanding of modern Africa. Taken as a whole, the chapters represent the range of research in African development, and fully tie this development to the global political economy. African nations play significant roles in world politics, both as nations influenced by the ebbs and flows of the global economy and by the international political system, but also as actors, directly influencing politics and economics. It is only through an understanding of both the

history and present place of Africa in global affairs that we can begin to assess the way forward for future development. *Capitalism and Slavery* Africa Research and Publications
This is the book which, when first published in 1965, caused such an uproar in the US State Department that a sharp note of protest was sent to Kwame Nkrumah and the \$25million of American "aid" to Ghana was promptly cancelled. *How Europe Underdeveloped Africa.*

Walter Rodney 1973
Verso Books
Under-Education in Africa: From Colonialism to Neoliberalism a collection of edited essays on diverse aspects of educational systems that were written over a period of four and a half decades. With the focus on Tanzania, they cover education in the German colonial era, the days of Ujamaa socialism and the present neo-liberal times. Their themes include social function of education, impact of external dependency on

education, practical versus academic education, democracy and violence in schools, role of computers in education, effect of privatization on higher education, misrepresentation of educational history, good and bad teaching styles, book reading, the teaching of statistics to doctors and student activism in education. Two essays provide a comparative view of the situation in Tanzanian and the USA. Deriving from the perspective of an activist educator, these

essays connect the state of the education system with the society as a whole, and explore the possibility of progressive transformation on both fronts. They are based on the author's experience as a long term educator, original research, relevant books, newspaper reports and discussions with colleagues and students. The author is a retired Professor of Medical Statistics who has taught at colleges and universities in Tanzania and at universities in USA and Norway.

How Europe Underdeveloped Africa
iUniverse
Slavery helped finance the Industrial Revolution in England. Plantation owners, shipbuilders, and merchants connected with the slave trade accumulated vast fortunes that established banks and heavy industry in Europe and expanded the reach of capitalism worldwide. Eric Williams advanced these powerful ideas in *Capitalism and Slavery*, published in 1944. Years ahead of its time, his profound critique

became the foundation for studies of imperialism and economic development. Binding an economic view of history with strong moral argument, Williams's study of the role of slavery in financing the Industrial Revolution refuted traditional ideas of economic and moral progress and firmly established the centrality of the African slave trade in European economic development. He also showed that mature industrial capitalism in turn helped destroy the slave system. Establishing

the exploitation of commercial capitalism and its link to racial attitudes, Williams employed a historicist vision that set the tone for future studies. In a new introduction, Colin Palmer assesses the lasting impact of Williams's groundbreaking work and analyzes the heated scholarly debates it generated when it first appeared.

How Europe Underdeveloped Africa

Everest Media LLC
Why Europe Intervenes in Africa analyses the

underlying causes of all European decisions for and against military interventions in conflicts in African states since the late 1980s. It focuses on the main European actors who have deployed troops in Africa: France, the United Kingdom and the European Union. When conflict occurs in Africa, the response of European actors is generally inaction. This can be explained in several ways: the absence of strategic and economic interests, the unwillingness of European leaders to

become involved in conflicts in former colonies of other European states, and sometimes the Eurocentric assumption that conflict in Africa is a normal event which does not require intervention. When European actors do decide to intervene, it is primarily for motives of security and prestige, and not primarily for economic or humanitarian reasons. The weight of past relations with Africa can also be a driver for European military intervention, but the

impact of that past is changing. This book offers a theory of European intervention based mainly on realist and post-colonial approaches. It refutes the assumptions of liberals and constructivists who posit that states and organisations intervene primarily in order to respect the principle of the 'responsibility to protect'. How Africa Underdevelops Africa How Europe Underdeveloped Africa This comparison of the political and social

systems of Europe and black Africa from antiquity to the formation of modern states demonstrates the black contribution to the development of Western civilization.

The Lives of Prehistoric Monuments in Iron Age, Roman and Medieval Europe

Africa Research and Publications Extracting profit explains why Africa, in the first decade and a half of the twenty-first century, has undergone an economic boom. This period of "Africa rising" did not lead

to the creation of jobs but has instead fueled the growth of the extraction of natural resources and an increasingly-wealthy African ruling class.

History of the Upper Guinea Coast Open Road + Grove/Atlantic

Dr. Ben is at his best in this work. He argues with passionate certainty that there is a fatal contradiction when Blacks are fed a history of themselves based on materials written,

controlled and approved by whites. His arguments raise the powerful questions: would whites (or any other group) agree to embrace a history of themselves created and controlled by Blacks?
