The Natural Speaker John Wiley & Sons  
 Foreword by Michael Shermer, Publisher  
 of Skeptic Magazine and Monthly  
 Columnist for Scientific American  
 Stenger

confronts mainstream theologians and New Age gurus-anyone who tries to link physics to mysticism. He takes their theories seriously enough to examine them in detail and he finds that, so far, none of them live up to the standards of scientific truth. As we accompany him on his investigation, he guides us through

the most important concepts in modern physics from relativity to string theory. The world has needed a book like this for a long time. If you care about scientific literacy, Quantum Gods is not optional.

-GEOFF GILPIN, Author of *The Maharishi Effect: A Personal Journey Through the Movement That Transformed American Spirituality*

Physics has developed a reputation of providing support for all sorts of supernatural beliefs, from old-fashioned religions to New Age ideas. Quantum physics, especially, seems to mean 'magic' for too many people. ... Be grateful for the work of Victor Stenger, who is one of the best for diligently separating real physics from popular misconceptions.... Everyone interested in debates over physics and the supernatural should read this book.

-TANER EDIS, Associate Professor of Physics, Truman State University; Author of *The Ghost in the Universe and Science and Nonbelief*

Does quantum mechanics show a connection between the human mind and the cosmos? Are our brains tuned into a cosmic consciousness that pervades the universe enabling us to make our own reality? Do quantum mechanics and chaos theory provide a place for God to act in the world without violating natural laws? Many popular books make such claims and argue that key developments in twentieth-century physics, such as the uncertainty principle and the butterfly effect, support the notion that God or a universal mind acts upon material reality.

Physicist Victor J. Stenger examines these contentions in this carefully reasoned and incisive analysis of popular theories that seek to link spirituality to physics. Throughout the book Stenger alternates his discussions of popular spirituality with a survey of what the findings of twentieth-century physics actually mean.

Thus he offers the reader a useful synopsis of contemporary religious ideas as well as basic but sophisticated physics presented in layperson's terms (without equations). Of particular interest in this book is Stenger's discussion of a new kind of deism, which proposes a God who creates a universe with many possible pathways determined by chance, but otherwise does not interfere with the physical world or the lives of humans. Although it is possible, says Stenger, to conceive of such a God who plays dice with the universe and leaves no trace of his role as prime mover, such a God is a far cry from traditional religious ideas of God and, in effect, may as well not exist.

Like his bestselling book, *God: The Failed Hypothesis*, this new work presents a rigorously argued challenge to many popular notions of God and spirituality.

Victor Stenger (Lafayette, CO) is adjunct professor of philosophy at the University of Colorado and emeritus professor of physics and astronomy at the University of Hawaii. He is the author of the New York Times bestseller *God: The Failed Hypothesis*, and many other books, including *Has Science Found God?*, *The Comprehensible Cosmos*, *Timeless Reality*, *The Unconscious Quantum*, and *Physics and Psychics*.

Mind-opening writing on what kids need from school, from one of education's most outspoken voices Almost no writer on schools asks us to question our fundamental assumptions about education and motivation as boldly as Alfie Kohn. The Washington Post says that "teachers and parents who encounter Kohn and his thoughts come away transfixed, ready to change their schools." And Time magazine has called him "perhaps the country's most outspoken critic of education's fixation on grades [and] test scores." Here is challenging and entertaining writing on where we should go in American education, in Alfie Kohn's unmistakable

voice. He argues in the title essay with those who think that high standards mean joylessness in the classroom. He reflects thoughtfully on the question "Why Self-Discipline Is Overrated." And in an essay for the New York Times, which generated enormous response, he warns against the dangers of both punishing and praising children for what they do instead of parenting "unconditionally." Whether he's talking about school policy or the psychology of motivation, Kohn gives us wonderfully provocative—and utterly serious—food for thought. This new book will be greeted with enthusiasm by his many readers, and by teachers and parents seeking a refreshing perspective on today's debates about kids and schools.

In this shocking exposé, two government fraud experts reveal how private contractors have put the lives of countless American soldiers on the line while damaging our strategic interests and our image abroad. From the

shameful war profiteering of companies like Halliburton/KBR to the sinister influence that corporate lobbyists have on American foreign policy, Dina Rasor and Robert H. Bauman paint a disturbing picture. Here they give the inside story on troops forced to subsist on little food and contaminated water, on officers afraid to lodge complaints because of Halliburton's political clout, on millions of dollars in contractors' bogus claims that are funded by American taxpayers. Drawing on exclusive sources within government and the military, the authors show how money and power have conspired to undermine our fighting forces and threaten the security of our country.

In this Good and Beautiful Series book, James Bryan Smith helps us know how to live in relationship with others as apprentices of Jesus. "Apprentices of Jesus are not part-time do-gooders," he writes. "They live in continuous contact with the kingdom of God, and are constantly men and women in whom Christ dwells. They do not sometimes tell the truth, sometimes live sacrificially or sometimes forgive. There are myriad opportunities for us to impact the world in which we live." Yet many times we've gotten it wrong, tending to emphasize personal faith over social justice or vice versa. In these pages Jim Smith shows us how to bring spiritual formation and community engagement together, and then once again offers spiritual practices that root new, true narratives about God and the world in our souls. His insight and humility as a fellow learner with us will lead us to live in authentic ways as a good and beautiful community of Christ-followers, shining the light of the Spirit into every relationship. The Good and Beautiful Series includes four essential

discipleship books from James Bryan Smith. Work through these proven Bible study resources individually or with a group to learn who God is, what it means to be a Christian, how to live in community, and how to address toxic self-narratives that hinder spiritual growth.

Cutting-edge solutions to current problems in orthopedics, supported by modeling and numerical analysis Despite the current successful methods and achievements of good joint implantations, it is essential to further optimize the shape of implants so they may better resist extreme long-term mechanical demands. This book provides the orthopedic, biomechanical, and mathematical basis for the simulation of surgical techniques in orthopedics. It focuses on the numerical modeling of total human joint replacements and simulation of their functions, along with the rigorous biomechanics of human joints and other skeletal parts. The book includes: An introduction to the anatomy and biomechanics of the human skeleton, biomaterials, and problems of alloarthroplasty The definition of selected simulated orthopedic problems Constructions of mathematical model problems of the biomechanics of the human skeleton and its parts Replacement parts of the human skeleton and corresponding mathematical model problems Detailed mathematical analyses of mathematical models based on functional analysis and finite element methods Biomechanical analyses of particular parts of the human skeleton, joints, and corresponding replacements A discussion of the

problems of data processing from nuclear magnetic resonance imaging and computer tomography This timely book offers a wealth of information on the current research in this field. The theories presented are applied to specific problems of orthopedics. Numerical results are presented and discussed from both biomechanical and orthopedic points of view and treatment methods are also briefly addressed. Emphasis is placed on the variational approach to the investigated model problems while preserving the orthopedic nature of the investigated problems. The book also presents a study of algorithmic procedures based on these simulation models. This is a highly useful tool for designers, researchers, and manufacturers of joint implants who require the results of suggested experiments to improve existing shapes or to design new shapes. It also benefits graduate students in orthopedics, biomechanics, and applied mathematics.

“STAND FAST, AND hold the traditions which ye have been taught, whether by word, or our epistle .... Comfort your hearts; and stablish you in every good word and work .... Finally, brethren, pray for us, that the word; of the Lord may have free course, and be GLORIFIED, even as it is with you.” II Thess. 2:15, 17; 3:1. FASTING, like PRAYER, is a part of the word of God. To dispute this would be as foolish as denying water is wet. Shall we “STAND FAST” on this IRREVOCABLE “TRADITION,” which we have been taught in the WORD, since it is indisputably a part of the WORD of God? Let us pray that it will “have free course, AND BE GLORIFIED,” in its proper place in order that JESUS may receive more glory and honor from His children. The purpose of this volume is to popularize, perhaps one of the most downtrodden of all Biblical subjects, and assist in the author’s small way to reestablish this part of the Gospel, bringing it out in all its glorious aspects. We are dealing with a tremendous portion of the Word—able to open up an avenue to tremendous power and glory with JESUS for the mutual welfare of His body, and the bringing of a mighty last day revival. By the proper utilization of fasting, praying, crying and mourning for souls, and by going into the FASTING-PRAYER without a selfish motive, many pillars of the FAITH can pull together in this travail to such an extent that when tragedy, destruction, persecution, and

the rest of the last-day signs approach us more closely, we will have at our disposal a most effective weapon to carry us through for the glory of Jesus. It is NOT the purpose of this book, or any of the other articles on the subject of fasting, to leave an impression that this practice is the Scriptural cure-all for spiritual, moral and bodily complaints. Emphasis is given the subject for the purpose of quickly enlightening God's people who seem to be "falling away" from the old-time faith, and to prevent the unhappy drift towards modernism that is so sweeping the land. We do not emphasize fasting for the purpose of bragging, or for such great merit that it would be boasting before our God, but we are pressing it forward with such tempo so that the children of the Bridegroom will become more quickly and fully prepared for the closing of this

Holy Spirit dispensation. This work has grown to such an extent, we have had to give up the revival auditorium. The author is devoting his entire time to the work of fasting, even discontinuing most of the traveling speaking engagements, in order to assure it greater success and promotion over the world for the mutual welfare of Christendom and the Kingdom of God. To make it even easier to grasp, the author has gone to additional expense in constructing drawings, diagrams and charts for numerous cuts to bring forth quickly through the eye-gate, this precious vital truth of orthodox Christianity. May the reader be blessed by them. This was done solely for the purpose of glorifying our most lovable Jesus. In the name of Father, and of the Son, and of the Holy Ghost, we, therefore, dedicate this work to Jesus. May it bring praise and honor of Him. Revelation 22:17-21.
