Hello Archie: Yes, all the patterns, practices, and principles apply equally to Java and any SQL database.. However, the example code uses Visual Studio and is based on C# and SQL Server..
SQL + Database Design Pattern

Framework and Java - DoFactoryPatterns should address the fundamental concerns around the design of a database schema; therefore, the comprehensive treatment of all these concerns by a design pattern is unavoidable. To this day, there is a common agreement around the concerns that a designer faces: – Data integrity. The first concern for a database schema, introduced at the Design Patterns for Relational Databases
