Global Corruption BRILL

Authors Louis and Kruse examine the question: Why do some school communities succeed and others fail? They take a look at five urban schools that have been attempting restructuring for several years - enough time to show results. They describe how the development of a professional community - or the lack thereof - impacts the implementation of change and how teachers' efforts at professionalism can positively affect the process. Focusing on the structural, social, and human conditions of schooling, the authors describe how to form a professional

community. Using their extensive research on professionalism, they develop a framework for evaluating the elements of community and then use the framework to present a cross-case analysis of various schools in the study. Professionalism and Community is a potent source of information for all policymakers and school leaders who are committed to long-term, effective change. It reveals a significant reason why so many well-intentioned, well-planned reforms fail, in spite of individual commitment and the heroic efforts of the participants. By observing those who have gone before, readers can learn important lessons from this study and discover the keys to making their own reform efforts work.

CONFRONTING CONSUMPTION

Routledge

U.S. citizens fought and died in WW II long before the Japanese attacked Pearl Harbor. Among them were the pilots of the Eagle

Squadrons, three fighter squadrons of Britain's Royal Air Force manned by young U.S. flyers. This book tells how the Eagle squadrons were formed and summarizes the history of the units and evaluates their deeds, motivations, and contributions. Draws on interviews from more than 35 surviving Eagles, their letters and memoirs, and official records. Depicts their daily lives along with special heroes and amazing sacrifices. "An important contribution to the study of American involvement in WWII. Highly recommended."

History of the Colony of New Haven University of Chicago Press

This book represents an introduction to and overview of the diverse facets of the ethical challenges confronting companies today. It introduces executives, students and interested observers to the complex trends and developments in business ethics. Coverage presents industry-specific topics in ethics. The book also provides a general, interdisciplinary survey of the ethical dimensions of management and business.

Echoes and Evidences of the Book of Mormon Delta

Originally published in 1960, this is a details study of the successive forms of government in the Hausa chiefdom of Zaria in Northern Nigeria. It presents a comparative analysis of the political organization and development of Zaria under successive Habe, Fulani and British suzerains. The book tackles the problems of political history and theory from an anthropological point of view, distinguishing governmental forms, functions and modes, as well as elucidating necessary regularities within the processes of political change.

Artifacts of Thinking Corwin

From the bestselling author of *Blink* and *The Tipping Point*,

Malcolm Gladwell's *Outliers: The Story of Success* overturns conventional wisdom about genius to show us what makes an ordinary person an extreme overachiever. Why do some people achieve so much more than others? Can they lie so far out of the ordinary? In this provocative and inspiring book, Malcolm Gladwell looks at everyone from rock stars to professional athletes, software billionaires to scientific geniuses, to show that the story of success is far more surprising, and far more fascinating, than we could ever have imagined. He reveals that it's as much about where we're from and what we do, as who we are - and that no one, not even a genius, ever makes it alone. *Outliers* will change the way you think about your own life story, and about what makes us all unique. 'Gladwell is not only a brilliant storyteller; he can see what those stories tell us, the lessons they contain' Guardian 'Malcolm Gladwell is a global phenomenon ... he has a genius for making everything he writes seem like an impossible adventure' Observer 'He is the best kind of writer - the kind who makes you feel like you're a genius, rather than he's a genius' The Times

Government in Zazzau Penguin UK

From the inimitable mind of award-winning author Jesse Ball, a novel about an unsettlingly familiar society that has renounced the concept of equality—and the devastating consequences of unmitigated power. The old-fashioned struggle for fairness has finally been abandoned. It was a misguided endeavor. The world is divided into two groups, pats and quads. The pats may kill the quads as they like, and do. The quads have no recourse but to continue with their lives. *The Divers' Game* is a thinly veiled description of our society, an extreme case that demonstrates a

truth: we must change or our world will collapse. What is the effect of constant fear on a life, or on a culture? The Divers' Game explores the consequences of violence through two festivals, and through the dramatic and excruciating examination of a woman's final moments. Brilliantly constructed and achingly tender, The Divers' Game shatters the notion of common decency as the binding agent between individuals, forcing us to consider whether compassion is intrinsic to the human experience. With his signature empathy and ingenuity, Jesse Ball's latest work solidifies his reputation as one of contemporary fiction's most mesmerizing talents.

Towards Resilient Organizations and Societies MIT Press
Theoretical Perspectives on Gender and Development demystifies the theory of gender and development and shows how it plays an important role in everyday life. It explores the evolution of gender and development theory, introduces competing theoretical frameworks, and examines new and emerging debates. The focus is on the implications of theory for policy and practice, and the need to theorize gender and development to create a more egalitarian society. This book is intended for classroom and workshop use in the fields of development studies, development theory, gender and development, and women's studies. Its clear and straightforward prose will be appreciated by undergraduate and seasoned professional, alike. Classroom exercises, study questions, activities, and case studies are included. It is designed for use in both formal and nonformal educational settings.

Living Fountains Or Broken Cisterns Springer

Theodore Kaczynski saw violent collapse as the only way to bring down the techno-industrial system, and in more than a decade of

mail bomb terror he killed three people and injured 23 others. One does not need to support the actions that landed Kaczynski in supermax prison to see the value of his essays disabusing the notion of heroic technology while revealing the manner in which it is destroying the planet. For the first time, readers will have an uncensored personal account of his anti-technology philosophy, including a corrected version of the notorious "Unabomber Manifesto," Kaczynski's critique of anarcho-primitivism, and essays regarding "the Coming Revolution."

Presentation Zen HarperCollins

Is there a theory that explains the essence of consciousness? Or is consciousness itself an illusion? Am I conscious now? Now considered the 'last great mystery of science', consciousness was once viewed with extreme scepticism and rejected by mainstream scientists. It is now a significant area of research, albeit a contentious one, as well as a rapidly expanding area of study for students of psychology, philosophy, and neuroscience. This edition of *Consciousness*, revised by author team Susan Blackmore and Emily Troscianko, explores the key theories and evidence in consciousness studies ranging from neuroscience and psychology to quantum theories and philosophy. It examines why the term 'consciousness' has no recognised definition and provides an opportunity to delve into personal intuitions about the self, mind, and consciousness. Featuring comprehensive coverage of all core topics in the field, this edition includes: Why the problem of consciousness is so hard Neuroscience and the neural correlates of consciousness Why we might be mistaken about our own minds The apparent difference between conscious and unconscious Theories of attention, free will, and self and

other The evolution of consciousness in animals and machines
 Altered states from meditation to drugs and dreaming Complete
 with key concept boxes, profiles of well-known thinkers, and
 questions and activities suitable for both independent study and
 group work, Consciousness provides a complete introduction to
 this fascinating field. Additional resources are available on the
 accompanying companion website:

Consciousness University of Chicago Press

Two Sides of a Barricade argues that to construct global
 democracy, conflict and dissent must be taken seriously.
 Christian Scholl explores the political significance of the
 confrontations within four sites of interaction: bodies, space,
 communication, and law. Each site of struggle provides a
 different entry point to understand the influence of protester and
 police tactics on each other. At the same time, the four sites of
 struggle allow a comprehensive analysis of how the contestation
 of global hegemonic forces during summit protests trigger a
 preemptive shift in social control through increased deployment
 of biopolitical forms of power.

Life of Chopin Houghton Mifflin Harcourt

Reflecting current practices in the teaching of writing, the
 exercises in this compilation were drawn from the journal
 "Exercise Exchange." The articles are arranged into six sections:
 sources for writing; prewriting; modes for writing; writing and
 reading; language, mechanics, and style; and revising,
 responding, and evaluating. Among the topics covered in the
 more than 75 exercises are the following: (1) using the Tarot in
 the composition class; (2) writing for a real audience; (3) writing

and career development; (4) teaching the thesis statement
 through description; (5) sense exploration and descriptive
 writing; (6) composition and adult students; (7) free writing; (8)
 in-class essays; (9) moving from prewriting into composing; (10)
 writing as thinking; (11) values clarification through writing; (12)
 persuasive writing; (13) the relationship of subject, writer, and
 audience; (14) business writing; (15) teaching the research
 paper; (16) writing in the content areas; (17) writing from
 literature; (18) responding to literature via inquiry; (19) precision
 in language usage; (20) grammar instruction; (21) topic
 sentences; (22) generating paragraphs; (23) writing style; (24)
 peer evaluation; and (25) writing-course final examinations. (FL)

ANOMIE AND VIOLENCE

Springer

Foucault's writings on power and control in social institutions
 have made him one of the modern era's most influential thinkers.
 Here he argues that punishment has gone from being mere
 spectacle to becoming an instrument of systematic domination
 over individuals in society - not just of our bodies, but our souls.
 Throughout history, some books have changed the world. They
 have transformed the way we see ourselves - and each other.
 They have inspired debate, dissent, war and revolution. They
 have enlightened, outraged, provoked and comforted. They have
 enriched lives - and destroyed them. Now Penguin brings you the
 works of the great thinkers, pioneers, radicals and visionaries
 whose ideas shook civilization and helped make us who we are.
 Simon and Schuster

Drawing on more than four decades of experience as a

researcher and teacher, Howard Becker now brings to students and researchers the many valuable techniques he has learned. *Tricks of the Trade* will help students learn how to think about research projects. Assisted by Becker's sage advice, students can make better sense of their research and simultaneously generate fresh ideas on where to look next for new data. The tricks cover four broad areas of social science: the creation of the "imagery" to guide research; methods of "sampling" to generate maximum variety in the data; the development of "concepts" to organize findings; and the use of "logical" methods to explore systematically the implications of what is found. Becker's advice ranges from simple tricks such as changing an interview question from "Why?" to "How?" (as a way of getting people to talk without asking for a justification) to more technical tricks such as how to manipulate truth tables. Becker has extracted these tricks from a variety of fields such as art history, anthropology, sociology, literature, and philosophy; and his dazzling variety of references ranges from James Agee to Ludwig Wittgenstein. Becker finds the common principles that lie behind good social science work, principles that apply to both quantitative and qualitative research. He offers practical advice, ideas students can apply to their data with the confidence that they will return with something they hadn't thought of before. Like *Writing for Social Scientists*, *Tricks of the Trade* will bring aid and comfort to generations of students. Written in the informal, accessible style for which Becker is known, this book will be an essential resource for students in a wide variety of fields. "An instant classic. . . . Becker's stories and reflections make a great book, one that will find its way into the hands of a great many social scientists, and

as with everything he writes, it is lively and accessible, a joy to read."—Charles Ragin, Northwestern University

Outliers TEACH Services, Inc.

Which sort of seducer could you be? Siren? Rake? Cold Coquette? Star? Comedian? Charismatic? Or Saint? This book will show you which. Charm, persuasion, the ability to create illusions: these are some of the many dazzling gifts of the Seducer, the compelling figure who is able to manipulate, mislead and give pleasure all at once. When raised to the level of art, seduction, an indirect and subtle form of power, has toppled empires, won elections and enslaved great minds. In this beautiful, sensually designed book, Greene unearths the two sides of seduction: the characters and the process. Discover who you, or your pursuer, most resembles. Learn, too, the pitfalls of the anti-Seducer. Immerse yourself in the twenty-four manoeuvres and strategies of the seductive process, the ritual by which a seducer gains mastery over their target. Understand how to 'Choose the Right Victim', 'Appear to Be an Object of Desire' and 'Confuse Desire and Reality'. In addition, Greene provides instruction on how to identify victims by type. Each fascinating character and each cunning tactic demonstrates a fundamental truth about who we are, and the targets we've become - or hope to win over. *The Art of Seduction* is an indispensable primer on the essence of one of history's greatest weapons and the ultimate power trip. From the internationally bestselling author of *The 48 Laws of Power*, *Mastery*, and *The 33 Strategies Of War*.

Offers profiles of nine personality types, tells how to avoid misidentifications, and offers advice on becoming aware of one's

own personality type.

CORPORATE ETHICS AND CORPORATE GOVERNANCE

Springer Nature

Indonesia suffered an explosion of religious violence, ethnic violence, separatist violence, terrorism, and violence by criminal gangs, the security forces and militias in the late 1990s and early 2000s. By 2002 Indonesia had the worst terrorism problem of any nation. All these forms of violence have now fallen dramatically. How was this accomplished? What drove the rise and the fall of violence? Anomie theory is deployed to explain these developments. Sudden institutional change at the time of the Asian financial crisis and the fall of President Suharto meant the rules of the game were up for grabs. Valerie Braithwaite's motivational postures theory is used to explain the gaming of the rules and the disengagement from authority that occurred in that era. Ultimately resistance to Suharto laid a foundation for commitment to a revised, more democratic, institutional order. The peacebuilding that occurred was not based on the high-integrity truth-seeking and reconciliation that was the normative preference of these authors. Rather it was based on non-truth, sometimes lies, and yet substantial reconciliation. This poses a challenge to restorative justice theories of peacebuilding.

Technological Slavery (Large Print 16pt) Oxford University Press

Consciousness, the last great mystery for science, remains a hot topic. How can a physical brain create our experience of the world? What creates our identity? Do we really have free will? Could consciousness itself be an illusion? Exciting new

developments in brain science are continuing the debates on these issues, and the field has now expanded to include biologists, neuroscientists, psychologists, and philosophers. This controversial book clarifies the potentially confusing arguments, and the major theories, whilst also outlining the amazing pace of discoveries in neuroscience. Covering areas such as the construction of self in the brain, mechanisms of attention, the neural correlates of consciousness, and the physiology of altered states of consciousness, Susan Blackmore highlights our latest findings. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable. Professionalism and Community John Benjamins Publishing The classic collaboration from the internationally bestselling authors Neil Gaiman and Terry Pratchett, soon to be an original series starring Michael Sheen and David Tennant. ?Season 2 of Good Omens coming soon! "Good Omens . . . is something like what would have happened if Thomas Pynchon, Tom Robbins and Don DeLillo had collaborated. Lots of literary inventiveness in the plotting and chunks of very good writing and characterization. It's a wow. It would make one hell of a movie. Or a heavenly one. Take your pick." —Washington Post According to The Nice and Accurate Prophecies of Agnes Nutter, Witch (the world's only completely accurate book of prophecies, written in 1655, before she exploded), the world will end on a Saturday. Next Saturday, in fact. Just before dinner. So the armies of Good and Evil are

amassing, Atlantis is rising, frogs are falling, tempers are flaring. Everything appears to be going according to Divine Plan. Except a somewhat fussy angel and a fast-living demon—both of whom have lived amongst Earth's mortals since The Beginning and have grown rather fond of the lifestyle—are not actually looking forward to the coming Rapture. And someone seems to have

misplaced the Antichrist . . .
