COMPTON RIVERS

Rosa Manus (1881-1942) Beacon Press

Rosa Manus (1881-1942) uncovers the contributions of Jewish Dutch feminist and peace activist Manus, co-founder of the WILPF (1915), vice-president of the International Alliance of Women (1926-1940), and founding president of the International Archives for the Women's Movement in Amsterdam (1935)."

Studies in Jewish History and

Medical mistakes are more pervasive than we think. How can we improve outcomes? An acclaimed MD's rich stories and research

explore patient safety. Patients enter the medical system with faith that they will receive the best care possible, so when things go wrong, it's a profound and painful breach. Medical science has made enormous strides in decreasing mortality and suffering, but there's no doubt that treatment can also cause harm, a significant portion of which is preventable. In *When We Do Harm*, practicing physician and acclaimed author Danielle Ofri places the issues of medical error and patient safety front and center in our national healthcare conversation. Drawing on current research, professional experience, and extensive interviews with nurses, physicians, administrators, researchers, patients, and families, Dr. Ofri explores the diagnostic, systemic, and cognitive causes of

medical error. She advocates for strategic use of concrete safety interventions such as checklists and improvements to the electronic medical record, but focuses on the full-scale cultural and cognitive shifts required to make a meaningful dent in medical error. Woven throughout the book are the powerfully human stories that Dr. Ofri is renowned for. The errors she dissects range from the hardly noticeable missteps to the harrowing medical cataclysms. While our healthcare system is—and always will be—imperfect, Dr. Ofri argues that it is possible to minimize preventable harms, and that this should be the galvanizing issue of current medical discourse.
