POSTMODERN SOCIAL WORK

Praeger

Post-modernism offers a revolutionary approach to the study of society: in questioning the validity of modern science and the notion of objective knowledge, this movement discards history, rejects humanism, and resists any truth claims. In this comprehensive assessment of post-modernism, Pauline Rosenau traces its origins in the humanities and describes how its key concepts are today being applied to, and are restructuring, the social sciences. Serving as neither an opponent nor an apologist for the movement, she cuts through post-modernism's often incomprehensible jargon in order to offer all readers a lucid exposition of its propositions. Rosenau shows how the post-modern challenge to reason and rational organization radiates across academic fields. For example, in psychology it questions the conscious, logical, coherent subject; in public administration

it encourages a retreat from central planning and from reliance on specialists; in political science it calls into question the authority of hierarchical, bureaucratic decision-making structures that function in carefully defined spheres; in anthropology it inspires the protection of local, primitive cultures from First World attempts to reorganize them. In all of the social sciences, she argues, post-modernism repudiates representative democracy and plays havoc with the very meaning of "left-wing" and "right-wing." Rosenau also highlights how post-modernism has inspired a new generation of social movements, ranging from New Age sensitivities to Third World fundamentalism. In weighing its strengths and weaknesses, the author examines two major tendencies within post-modernism, the largely European, skeptical form and the predominantly Anglo-North-American form, which suggests alternative political, social, and cultural projects. She draws examples from anthropology, economics, geography, history, international relations, law, planning, political science, psychology, sociology, urban studies, and women's studies, and provides a glossary of post-modern terms to assist the uninitiated reader with special meanings not found in standard dictionaries.

POSTMODERNISM, OR, THE CULTURAL LOGIC OF LATE CAPITALISM

Cambridge University Press

Transforming Social Work Practice shows that postmodern theory offers new strategies for social workers concerned with political action and social justice. It explores ways of developing practice frameworks, paradigms and principles which take advantage of the perspectives offered by postmodern theory without totally abandoning the values of modernity and the Enlightenment project of human emancipation. Case studies demonstrate how these perspectives can be applied to practice.

A Report on Knowledge Macmillan International Higher Education
 'These sections represent the clearest rendition yet of these subjects, with difficult concepts introduced in a digestible form for the neophytic (or not so neophytic) researcher. Whilst in a book this size not every argument can be presented, there is ample extra material to be found to encourage further engagement... At the end of each chapter, there is a very useful Further Reading section provided by the authors, which gives useful guidelines. I believe to be an extremely useful text, which addresses what has until now been a significant gap in the market. This book will be my first choice in the future for introducing doctoral students of management-related subject to the philosophical underpinning they require for their studies. There is no other text which covers this area so clearly, so succinctly and in language that is readily accessible to a wide range of researcher back-grounds. I can enviSAGE this being a valuable source book to which researchers return again and again in order to deepen their understanding as

research projects progress; it certainly provoked some new questions for me. To conclude, an excellent buy' - International Journal of Entrepreneurship and Innovation This is an invaluable introduction for all students and researchers of management confronting a new research project. Understanding Management Research provides an overview of the principal epistemological debates in social science and how these lead to and are expressed in different ways of conceiving and undertaking organizational research. For researchers and students who are increasingly expected to adopt a reflexive understanding of their own epistemological position, the authors present a concise, accessible guide to the different perspectives available and their implications for research output. All students undertaking empirical research for theses and dissertations will find this book helps them comprehend the key ongoing debates and engage with their own pre-understandings when trying to make sense of management and organizations.

TRANSFORMING SOCIAL WORK PRACTICE

Greenwood Publishing Group

How much of science is culturally constructed? How much depends on language and metaphor? How do our ideas about nature connect with reality? Can nature be "reinvented" through theme parks and malls, or through restoration? Reinventing Nature? is an interdisciplinary investigation of how perceptions and conceptions of nature affect both the individual experience and society's management of nature. Leading thinkers from a variety of fields -- philosophy, psychology, sociology, public policy, forestry, and others -- address the conflict between

perception and reality of nature, each from a different perspective. The editors of the volume provide an insightful introductory chapter that places the book in the context of contemporary debates and a concluding chapter that brings together themes and draws conclusions from the dialogue. In addition to the editors, contributors include Albert Borgmann, David Graber, N. Katherine Hayles, Stephen R. Kellert, Gary P. Nabhan, Paul Shepard, and Donald Worster.

POSTMODERN THEORY

Scholarly Publishing, Inc.

The present work is an elaboration of the author's previous efforts in *Emile Durkheim and the Reformation of Sociology* (1988) and *The Coming Fin de Sicle* (1991) to demonstrate Durkheim's neglected relevance to the postmodern discourse. The aims include finding affinities between our fin de sicle and Durkheim's fin de sicle, and connecting the contemporary themes of rebellion against Enlightenment narratives found in postmodern culture with similar concerns found in Durkheim's sociology as well as in his fin de sicle culture, contributing to Durkheimian scholarship as well as to the postmodern discourse. The distinctive aspects of the present study flow from the focus on culture, communication, and the feminine voice in culture. Durkheim is approached as a fin de sicle student of culture, and his insights applied to our fin de sicle culture. Furthermore, because Durkheim claimed that culture is comprised primarily of collective representations, he was a forerunner of the current, postmodern concerns with communication. Because Durkheim shall be read in the context of his fin de sicle, this book shall

lead to the conclusion that Durkheim was a kind of psychoanalyst such that society is the patient, culture comprises the symptoms, and the sociologist must decipher, decode, and even deconstruct collective representations. Yet, the Durkheimian deconstruction proposed here is unlike the postmodern deconstructions, which criticize and tear apart a text without substituting a better meaning or interpretation. Postmodern discourse has made respectable again the synthesis of multidisciplinary insights that was fashionable in Durkheim's fin de sicle. In following this postmodern strategy, this book is more than a book about Durkheim. It is also a book about his contemporaries, among them, Carl Justav Jung, Thorstein Veblen, Henry Adams, Georg Simmel, and Max Weber. The author does not follow the postmodern strategy completely, because he f

An Introduction to Epistemology SAGE

- Are you confused by academic jargon? - Do you know your 'discourse' from your 'dialectic'? - Can you tell the difference between 'anomie' and 'alienation'? The Social Science Jargon Buster tackles the most confusing concepts in the social sciences, breaking each down and bringing impressive clarity and insight to even the most complex terms. 'This book successfully addresses the central task for any teacher of social theory - how to make the material accessible without making it simplistic and banal. The overall effect is a most effective text that hard-pressed students and lecturers will grab with both hands' - Dave Harris, Senior Lecturer in Social Science This practical, down-to-earth dictionary will help students new to social science discourse gain a thorough understanding of the key terms. Each entry includes a concise core definition, a more detailed explanation and an

introduction to the associated debates and controversies. In addition, students will find a useful outline of the practical application of each term, as well as a list of key figures and recommendations for further reading. This dictionary brings a refreshing clarity to social science discourse, making it essential reading for all students on undergraduate social science courses.

The Crisis of Social Modernism in Postwar America Guilford Press

The Cambridge Companion to Postmodernism offers a comprehensive introduction to postmodernism. The Companion examines the different aspects of postmodernist thought and culture that have had a significant impact on contemporary cultural production and thinking. Topics discussed by experts in the field include postmodernism's relation to modernity, and its significance and relevance to literature, film, law, philosophy, architecture, religion and modern cultural studies. The volume also includes a useful guide to further reading and a chronology. This is an essential aid for students and teachers from a range of disciplines interested in postmodernism in all its incarnations. Accessible and comprehensive, this Companion addresses the many issues surrounding this elusive, enigmatic and often controversial topic.

Collectivism After Modernism Routledge

Postmodernism and poststructuralism challenge fundamental positions in social theory. This book sets out some of the components of a postmodern social theory of health and healing, deriving from theorists including Derrida, Deleuze and Guattari, Foucault, Cixous and Kristeva. Nicholas J. Fox observes that the knowledge of the medical profession about the body, illness and

health supplies the basis for medical dominance. The body of the patient is inscribed by discourses of professional 'care,' an interaction which subjectifies the patient. Fox explores the character of this power - and how it may be, and is, resisted. The book illustrates with detailed examples how the organization of health care and the caring relationship itself are sites for this contestation of power. Elements of feminist theory, and Derridean concepts of différance and intertextuality, supply the framework for the politics and ethics of the postmodern position on health. Deleuze and Guattari's radical challenge to psychoanalysis and familial repetitions within the healer/patient contact allows a re-reading of central ideas in medical sociology. While focusing upon the possibilities of postmodern social theory, the book demands a reappraisal of issues of structure, identity and knowledge in modernist medical sociology. Modernist sociology, Fox suggests, has been complicit in the creation of 'the patient,' and of 'health' and 'illness.' Written with an emphasis on accessibility, this book explores the practical consequences of postmodern theory as well as familiarizing the reader with the concepts of postmodernism.

Psychology and Postmodernism James Nicholas Publishers

This groundbreaking book is the first to explore the implications of postmodernist ideas for psychology. It examines central themes of postmodernism as they relate to psychology - for example, the nature of the self, locally situated rather than universal knowledge and the pivotal role of language in social life. The contributors outline the new possibilities for psychology, setting theoretical reformulations alongside implications for psychological practice and method. The book presents critique as

well as support for postmodern perspectives, from feminist critique of postmodern deconstruction' to argument with the usefulness of sharp distinctions between a modern' and postmodern' psychology.

RESPONSES TO POSTMODERN DECONSTRUCTION

SAGE

Based on nearly a decade of scholarship, this is a highly focused book on the implications of postmodernism for the construction and assessment of theory and practice in educational administration. Current ideas of practice are deconstructed, from the notions of sound research to the use of national standards in the preparation of educational leaders along with ways of examining and resolving the theory-practice gap. Part One of the book contains chapters dealing with the rise of postmodernism and describes its broad-based dissent from a century of thought in the field, including a penetrating examination of whether the concept of a field itself is viable. Part Two of the book explores the many ramifications of postmodernism to practice, beginning with ideas concerning educational research. These chapters tackle the tough issues of the efficacy of the Interstate Leaders Licensure Standards (ISLLC) and the national exam as examples of job deskilling and deprofessionalization in the guise of raising standards of preparation of future educational leaders. Other chapters deal with deconstructing the popular managerial ideas contained in Stephen Covey's works and dispute Joe Murphy's call for a new center of gravity in the field as reinforcing the status quo. Finally, the book tackles the issue of the theory-practice gap and indicates that new and progressive theories which anticipate

problems of practice are what is required to deal with this persistent issue. The book contains many helpful exhibits in understanding the issues concerning theory and practice, as well as a glossary of terms most commonly found in postmodern discourse. This book is designed for college and university programs engaged in the preparation of educational leaders for elementary/secondary schools and college administrative positions.

POSTMODERNISM AND POPULAR CULTURE

Verso

This fully revised third edition of The Routledge Companion to Postmodernism provides the ideal introduction to postmodernist thought. Featuring contributions from a cast of international scholars, the Companion contains 19 detailed essays on major themes and topics along with an A-Z of key terms and concepts. As well as revised essays on philosophy, politics, literature, and more, the first section now contains brand new essays on critical theory, business, gender and the performing arts. The concepts section, too, has been enhanced with new topics ranging from hypermedia to global warming. Students interested in any aspect of postmodernism will continue to find this an indispensable resource.

POSTMODERN GEOGRAPHIES

U of Minnesota Press

The sudden and extensive growth of the body of postmodernist literature has created a daunting task for social science undergraduate students--to separate, assess, and digest those

materials they will find meaningful before they have acquired the knowledge to make appropriate choices. In *Postmodernism and the Social Sciences*, Robert Hollinger presents a valuable compendium of postmodernist writing relating to the social sciences. He reviews key postmodern discussions on such critical topics as values, identity, the self and society, and compares postmodern thinking with the enlightenment project, modernism, modernity, Marxism, and critical theory. Hollinger's treatment of leading postmodern theorists such as Foucault, Lyotard, Baudrillard, Derrida, Deleuze, Guattari, and how they have challenged traditional social scientific understanding make this an excellent volume for courses on social theory.

Postmodernism And Society Routledge

In *The Story of Post-Modernism*, Charles Jencks, the authority on Post-Modern architecture and culture, provides the defining account of Post-Modern architecture from its earliest roots in the early 60s to the present day. By breaking the narrative into seven distinct chapters, which are both chronological and overlapping, Jencks charts the ebb and flow of the movement, the peaks and troughs of different ideas and themes. The book is highly visual. As well as providing a chronological account of the movement, each chapter also has a special feature on the major works of a given period. The first up-to-date narrative of Post-Modern Architecture - other major books on the subject were written 20 years ago. An accessible narrative that will appeal to students who are new to the subject, as well as those who can remember its heyday in the 70s and 80s.

CRITICAL INTERROGATIONS

SAGE

In an introductory chapter, Murphy looks at the differences between modernism and postmodernism and discusses the "metanarratives" that characterize the former. He goes on to clarify key assumptions and concepts, especially the postmodern opposition to the traditional Western separation of subject and object. In subsequent chapters, he describes the research methodology used by postmodernists, their views of social ontology and the relationship between order and structure, and the creation of socially responsible institutions. The postmodernists' reconceptualization of key aspects of cultural reality, including time, space, reason, and social relations, is examined in detail. Murphy concludes by exploring the political ramifications of the postmodernist model and its potential as a vehicle for building a genuinely democratic society.

Understanding Management Research John Wiley & Sons

"Don't start an art collective until you read this book." —Guerrilla Girls "Ever since Web 2.0 with its wikis, blogs and social networks the art of collaboration is back on the agenda. Collectivism after Modernism convincingly proves that art collectives did not stop after the proclaimed death of the historical avant-gardes. Like never before technology reinvents the social and artists claim the steering wheel!" —Geert Lovink, Institute of Network Cultures, Amsterdam "This examination of the succession of post-war avant-gardes and collectives is new, important, and engaged." —Stephen F. Eisenman, author of *The Abu Ghraib Effect* "Collectivism after Modernism crucially helps us understand what

artists and others can do in mushy, stinky times like ours. What can the seemingly powerless do in the face of mighty forces that seem to have their act really together? Here, Stimson and Sholette put forth many good answers.” —Yes Men Spanning the globe from Europe, Japan, and the United States to Africa, Cuba, and Mexico, *Collectivism after Modernism* explores the ways in which collectives function within cultural norms, social conventions, and corporate or state-sanctioned art. Together, these essays demonstrate that collectivism survives as an influential artistic practice despite the art world’s star system of individuality. *Collectivism after Modernism* provides the historical understanding necessary for thinking through postmodern collective practice, now and into the future. Contributors: Irina Aristarkhova, Jesse Drew, Okwui Enwezor, Rubn Gallo, Chris Gilbert, Brian Holmes, Alan Moore, Jelena Stojanovi´c, Reiko Tomii, Rachel Weiss. Blake Stimson is associate professor of art history at the University of California Davis, the author of *The Pivot of the World: Photography and Its Nation*, and coeditor of *Visual Worlds and Conceptual Art: A Critical Anthology*. Gregory Sholette is an artist, writer, and cofounder of collectives *Political Art Documentation/Distribution* and *REPOhistory*. He is coeditor of *The Interventionists: Users’ Manual for the Creative Disruption of Everyday Life*. “To understand the various forms of postwar collectivism as historically determined phenomena and to articulate the possibilities for contemporary collectivist art production is the aim of *Collectivism after Modernism*. The essays assembled in this anthology argue that to make truly collective art means to reconsider the relation between art and public; examples from the Situationist International and Group Material

to Paper Tiger Television and the Congolese collective Le Groupe Amos make the point. To construct an art of shared experience means to go beyond projecting what Blake Stimson and Gregory Sholette call the “imagined community”: a collective has to be more than an ideal, and more than communal craft; it has to be a truly social enterprise. Not only does it use unconventional forms and media to communicate the issues and experiences usually excluded from artistic representation, but it gives voice to a multiplicity of perspectives. At its best it relies on the participation of the audience to actively contribute to the work, carrying forth the dialogue it inspires.” —BOMB
Postmodernism and the Social Sciences SAGE Publications Limited

The social sciences are still predominantly modernist disciplines and, as such, products of the Enlightenment. Recent challenges to Enlightenment thinking thus carry with them the potential or threat to transform the social sciences radically. *Postmodernism and the Social Sciences* examines the nature and potential of this postmodernist challenge in each of the major social sciences. Starting with the practices of particular disciplines and proceeding to matters of shared concern, the essays provide an accessible discussion of the contemporary impact of postmodernism on social scientific thought.

REINVENTING NATURE?

Guilford Press

This highly regarded anthology of primary readings in sociological theory covers the major theorists and schools from classic to contemporary, modernist, and postmodernist, in a chronological

organization. Its comprehensive coverage and excellent introductions make this book appealing as a main text for professors who want to encourage students to read and interpret original sources, or as a supplement for those who use a traditional main text.

Skepticism and Socialism from Rousseau to Foucault

Charles C Thomas Publisher

The social sciences are still predominantly modernist disciplines and, as such, products of the Enlightenment. Recent challenges to Enlightenment thinking thus carry with them the potential or threat to transform the social sciences radically. Postmodernism and the Social Sciences examines the nature and potential of this postmodernist challenge in each of the major social sciences. Starting with the practices of particular disciplines and proceeding to matters of shared concern, the essays provide an accessible discussion of the contemporary impact of postmodernism on social scientific thought.

The Troubles With Postmodernism SAGE Publications, Incorporated

Proceedings of a symposium, held as a satellite meeting of the Second World Congress of Neuroscience, at the University of Bremen in August 1987. An overview of lesion-induced neural plasticity in such areas as the spinal cord; vestibular, oculomotor, visual, and olfactory systems; the cerebellum; and the cerebral cortex. Many diagrams, charts, and illustrations. Some

implications for the general understanding of neural plasticity are discussed. The title essay was published in 1984 in *New Left Review*, and a number of the other essays presented here also appeared in previous publications, sometimes in an earlier form. Jameson (comparative literature, Duke.) evaluates the concept of postmodernism and surveys developments in a wide range of fields--market ideology, architecture, painting, installment art, film, video art, literature. Annotation copyrighted by Book News, Inc., Portland, OR

Post-modernism and the Social Sciences Routledge

Written by one of America's foremost geographers, Postmodern Geographies contests the tendency, still dominant in most social science, to reduce human geography to a reflective mirror, or, as Marx called it, an "unnecessary complication." Beginning with a powerful critique of historicism and its constraining effects on the geographical imagination, Edward Soja builds on the work of Foucault, Berger, Giddens, Berman, Jameson and, above all, Henri Lefebvre, to argue for a historical and geographical materialism, a radical rethinking of the dialectics of space, time and social being. Soja charts the respatialization of social theory from the still unfolding encounter between Western Marxism and modern geography, through the current debates on the emergence of a postfordist regime of "flexible accumulation." The postmodern geography of Los Angeles, exposed in a provocative pair of essays, serves as a model in his account of the contemporary struggle for control over the social production of space.
