Nitin's mother means the world to him and when she breathes her last in his arms, it changes him upside down. A soft and humble guy declares rebellion against his father. On the way to fulfill his father's desire of him becoming an engineer, he takes a bold decision and runs away to a completely new city for pursuing his ambition of becoming a famous singer. Against all the odds, he is not just able to fight the blues, but also forges new bonds of friendship in a completely new place. Once again destiny catches up with his happiness and he finds himself on the crossroad of life. His most loved friends

end up in grave trouble and Nitin is confronted with the most difficult choice of his life! Will Nitin be able to survive the outcome of his choice and come out of it as a champion or will he take the plunge towards deluge of depression? Nitin's journey is the one, which almost every individual has to undergo in one form or the other. This story gives the insight into the actual challenges that confront all of us and it also shares the wisdom to understand that most solutions are not just within our reach, but are within ourselves. The process is just about digging deep within.

The Indian Premier League (IPL) is one of

the most popular Twenty20 cricket leagues in the world. It began in 2008 and has since become a global sensation with millions of cricket fans tuning in every year to watch some of the best players from around the world compete against each other. The 2023 IPL promises to be another exciting tournament with a lot of buzz around which teams will make it to the top. One of the most talked-about changes for the 2023 IPL is the introduction of two new teams, bringing the total number of franchises up to 10. This addition will create more opportunities for players and create new rivalries within the league. The 2023 IPL will also be taking place just before the T20 World Cup, and teams will be looking to gather momentum and test their strongest lineups before the tournament.

It will be interesting to see how players perform on Indian pitches, with spin bowling being a vital aspect of the game in India. Overall, the 2023 IPL promises to be an exciting tournament with a lot of talent on display, new teams, and intense rivalries.

General Awareness 2020-21 for RRB Junior Engineer, NTPC, ALP & Group D Exams 4th Edition Springer Nature

This book is a culmination of sustained research work on the evaluation of cricket and its management to imbibe a balance between its various formats by using data and analytics. The book has identified three primary stakeholders—administrators, players and spectators—each having their own ambitions. In order for convergence of these ambitions, it has prescribed the networked governance in place of hierarchic governance for the International Cricket Council (ICC), the cricket's apex body. This book aims at creating a balance between formats that each country should play. There is as much dearth of academic research on this topic, as there is abundance of individual viewpoints from professionals related to the game. Hence at the outset, the book has created an action points and has underlined the lack of convergence with present way of governance. This book has created a meta-metric framework for formative assessment of influence across cricket

formats. In order to assess the influence of T20 on test matches and on India's performance, a comparison between pre-IPL period (1998-2007) and post-IPL period (2008-2017) by using this framework has been done.

This book focuses on the application of data mining techniques in cricket. It provides detailed examples of how data mining can be helpful for decision-making in sports with special reference to cricket, particularly the quantitative features related to Twenty20 cricket, the latest and the most popular format of the game. The book highlights the performance quantification of cricketers (batsmen, bowlers, all-rounders, and wicket keepers), determining the market valuation of cricketers based on their on-field performances and the effect of age on the performance of the cricketers. It also provides a comprehensive overview of the different aspects of the game where quantitative techniques are beneficial, and highlights the use of statistical and data mining tools in analysing sports-related data and objective decision-making in sports. The book appeals to a wide readership, including postgraduate students of statistics/mathematics, data analysts, sports management bodies. It also offers data miners, such as researchers in statistics, mathematics, operations research, and computer science ideas for projects.

INDIAN BUSINESS @75—DIFFERENT ASPECTS

Sam Samyik Ghatna Chakra
The extravaganza of IPL 2023 spanning 60 days and 74 cricket matches took place in early 2023. That has been an extraordinary crime, celebrated the most by the victims!! A tale of monumental corruption, all the leaders choosing to be

blind to it! While the world was being titillated through IPL, a daily fraud worth tens of billions of dollars was taking place. An amount sufficient enough to feed and sustain the 7 billion plus human beings all over the globe. thecricketmafia.com readily refers. Read to know all about the mind-boggling fraud controlled by ICC and BCCI, protected by all the authorities and the judiciary, and marketed by none other than the Media. Everyone must know the deep meanings of it all, of such a crime continuing unquestioned. A book that is meant to and does dwarf all the human endeavours, except probably some of the scientific accomplishments. The world and India will ignore it at their own peril.
