## LIFELONG LEARNING, PARTICIPATION AND EQUITY

Springer Science & Business Media

Most social studies of older people in the United States have focused upon problems and conditions encountered in urban centers. In Older Rural Americans sixteen social scientists representing various regions examine in depth the circumstances of older people in rural America. The authors first consider older people in the contexts of work, the family, and the community, discussing their social outlook, their place in these contexts, and the profound changes they face as they move away from an active part in these areas of life. Later chapters analyze the distribution of the rural aged population and their economic, housing, and health status. Of particular interest are essays treating the place and condition of older rural people in three major subcultures of the United States -- the American Indian, the Spanish-speaking people of the Southwest, and African Americans. Finally, the authors trace the development of local, state, and federal programs designed to assist the aged. The authors argue that an understanding of rural life some sixty years ago is of the utmost importance, for it is the values of that time that have largely formed the attitudes and outlooks of today's rural aged.

## RRA NOTES NUMBER 13 -- PARTICIPATORY RURAL APPRAISAL

World Bank Publications

In many countries, schools, universities and other traditional learning institutions are not providing for the educational needs of all members of the community. Many communities, particularly in regional, rural and disadvantaged areas, can offer only limited educational options. This book addresses the challenge of identifying effective ways of accommodating the learning needs of all people and in so doing achieving the goals of lifelong learning for all.

**E-Governance and Civic Engagement: Factors and Determinants of E-Democracy** Springer  
People's participation has begun to influence the practice of development substantially. This study provides an interpretation of how participation occurs, uses case studies to highlight various approaches, and develops elements of a strategy and a methodology.

**Electronic Participation** Palgrave Macmillan

The twentieth century was one of profound transformation in rural America. Demographic shifts and economic restructuring have conspired to alter dramatically the lives of rural people and their communities. Challenges for Rural America in the Twenty-First Century defines these changes and interprets their implications for the future of rural America. The volume follows in the tradition of "decennial volumes" co-edited by presidents of the Rural Sociological Society and published in the Society's Rural Studies Series. Essays have been specially commissioned to examine key aspects of public policy relevant to rural America in the new century. Contributors include: Lionel Beaulieu, Alessandro Bonnano, David Brown, Ralph Brown, Frederick Buttel, Ted Bradshaw, Douglas Constance, Steve Daniels, Lynn England, William Falk, Cornelia Flora, Jan Flora, Glenn Fuguitt, Nina Glasgow, Leland Glenna, Angela Gonzales, Gary Green, Rosalind Harris, Tom Hirschl, Douglas Jackson-Smith, Leif Jensen, Ken Johnson, Richard Krannich, Daniel Lichter, Linda Lobao, Al Luloff, Tom Lyson, Kate MacTavish, David McGranahan, Diane McLaughlin, Philip McMichael, Lois Wright Morton, Domenico Parisi, Peggy Petzelka, Kenneth Pigg, Rogelio Saenz, Sonya Salamon, Jeff Sharp, Curtis Stofferahn, Louis Swanson, Ann Tickameyer, Leanne Tigges, Cruz Torres, Mildred Warner, Ronald Wimberley, Dreamal Worthen, and Julie Zimmerman.

**Research Anthology on Citizen Engagement and Activism for Social Change** Springer

"This book focuses on the issues and challenges involving adoption and implementation of online civic engagement initiatives globally and will serve as a valuable guide to governments in their efforts to enable active citizen participation"--Provided by publisher.

**Digital Citizenship** Edward Elgar Publishing

"This book examines how e-government facilitates online public reporting, two-way communication and debate, online citizen participation in decision-making, and citizen satisfaction with e-governance"--Provided by publisher.

## FORCES AFFECTING PARTICIPATION OF FARM PEOPLE IN RURAL ORGANIZATION. A STUDY MADE IN FOUR TOWNSHIPS IN ILLINOIS....

SIU Press

This book focuses on private tutoring (sometimes also known as "shadow education"), an important but neglected topic in applied linguistics and language education research. Private tutoring has become a popular out-of-school learning activity worldwide. While its scope and definition are expanding, private tutoring commonly refers to the "paid service students used to supplement their

learning of academic subjects at school outside school hours” (Yung, 2019). Around the world, English language is one of the most popularly enrolled subjects in private tutoring, including both English as a first language and English as an additional language (EAL). Despite its popularity and implications for theories, practices, and policies, research on English private tutoring is still in its infancy. This book aims to provide an international perspective on the interface between applied linguistics and comparative education and open up an agenda for discussion in theories, practices, and policies in English language teaching (ELT). It will be of interest to students, scholars, and policy-makers in these and related areas.

Challenges for Rural America in the Twenty-First Century IGI Global

This book examines the key issues for consideration when evaluating information, consultation and public participation.

Selectivity of Membership and Participation in Rural Organizations IGI Global

"This book is a collection of knowledge on contemporary experiences on technological, societal and legal setups of e-Government implementation in emerging economies"--Provided by publisher.

Active Citizen Participation in E-Government: A Global Perspective OECD Publishing

Public authorities from all levels of government increasingly turn to Citizens' Assemblies, Juries, Panels and other representative deliberative processes to tackle complex policy problems ranging from climate change to infrastructure investment decisions. They convene groups of people representing a wide cross-section of society for at least one full day – and often much longer – to learn, deliberate, and develop collective recommendations that consider the complexities and compromises required for solving multifaceted public issues.

IGI Global

"This book provides research on the current actions being taken by developing countries toward the design, development, and implementation of e-government policies"--Provided by publisher.

Community Participation in Rural Alaska Education Springer Nature

Rural Literacies identifies the problems inherent in trying to understand rural literacy, addresses the lack of substantive research on literacy in rural areas, and reviews traditional misrepresentations of rural literacy. This innovative volume frames debates over literacy in relation to larger social, political, and economic forces, such as the impact of the No Child Left Behind Act on rural schools and the effects of out-migration, globalization, and the loss of small family farms on rural communities. Drawing upon traditional literacy and composition research and employing theory from education and sociology, the text engages compositionists in broader conversations regarding rural literacies. The authors share strategies that will help compositionists participate in pedagogies that are rooted in a richer understanding of rural literacies and work toward sustainability for all communities in a globalized age.

The Innovative CIO and E-participation in E-government Initiatives University Press of America

Senior information executives are currently confronted by a continually growing and increasingly complex set of challenges. These include rapidly changing technologies, environmental issues and the current global economic situation. This book, volume 3 in the Global E-Governance Series, brings

together the contributions of acknowledged experts from all over the world, who have presented papers and participated in discussions at three recent conferences on e-government, the role of the CIO (Chief Information Officer) and e-governance. They give us their frank and honest insights, and share with us not only their successes, but also their failures and the lessons they have learnt from them. Divided into five parts, the book covers subjects such as: e-participation and perspectives from citizen involvement, national e-government strategies, innovative CIO, ICT (Information & Communication Technology) in the context of the world economy and finally, global e-government rankings. Despite the different backgrounds and nationalities of the contributors, what is notable are the common themes which emerge from their work. This book will undoubtedly be a valuable resource of interest to all those involved in the field of e-government. IOS Press is an international science, technical and medical publisher of high-quality books for academics, scientists, and professionals in all fields. Some of the areas we publish in: -Biomedicine -Oncology -Artificial intelligence -Databases and information systems -Maritime engineering -Nanotechnology - Geoengineering -All aspects of physics -E-governance -E-commerce -The knowledge economy -Urban studies -Arms control -Understanding and responding to terrorism -Medical informatics -Computer Sciences

Information and Communication Technology for Agriculture and Rural Development OECD Publishing

This analysis of how the ability to participate in society online affects political and economic opportunity finds that technology use matters in wages and income and civic participation and voting. Just as education has promoted democracy and economic growth, the Internet has the potential to benefit society as a whole. Digital citizenship, or the ability to participate in society online, promotes social inclusion. But statistics show that significant segments of the population are still excluded from digital citizenship. The authors of this book define digital citizens as those who are online daily. By focusing on frequent use, they reconceptualize debates about the digital divide to include both the means and the skills to participate online. They offer new evidence (drawn from recent national opinion surveys and Current Population Surveys) that technology use matters for wages and income, and for civic engagement and voting. Digital Citizenship examines three aspects of participation in society online: economic opportunity, democratic participation, and inclusion in prevailing forms of communication. The authors find that Internet use at work increases wages, with less-educated and minority workers receiving the greatest benefit, and that Internet use is significantly related to political participation, especially among the young. The authors examine in detail the gaps in technological access among minorities and the poor and predict that this digital inequality is not likely to disappear in the near future. Public policy, they argue, must address educational and technological disparities if we are to achieve full participation and citizenship in the twenty-first century.

### **FROM SUBORDINATES TO CITIZENS**

Springer

The relationship between citizens and city governments is gradually transforming due to the utilization of advanced information and communication technologies in order to inform, consult, and engage citizens. Citizen E-Participation in Urban Governance: Crowdsourcing and Collaborative

Creativity explores the nature of the new challenges confronting citizens and local governments in the field of urban governance. This comprehensive reference source explores the role that Web 2.0 technologies play in promoting citizen participation and empowerment in the city government and is intended for scholars, researchers, students, and practitioners in the field of urban studies, urban planning, political science, public administration, and more.

[E-Government Implementation and Practice in Developing Countries](#) Springer

Among the many ways the world has changed in recent decades, using technology for city planning has become one of the most innovative. Using new, pioneering methods that are reshaping the world into a more efficient and effective society has become the new reality. Citizen-Responsive

Urban E-Planning: Recent Developments and Critical Perspectives is a collection of innovative research that presents and discusses various perspectives on facets of citizen engagement in open urban policy processes, all of them based on the widespread use of information and communication technologies in the field of urban/spatial planning. The book offers an updated outline of recent advances in this field as well as a critical perspective of the challenges with which citizen e-participation in urban e-planning is confronted. While highlighting topics including smart ecosystems, urban development, and global intelligence, this book is ideally designed for urban planners, IT consultants, government officials, policymakers, academicians, researchers, students, and industry professionals.
